GENERAL INFORMATION

SECTION 1

GENERAL INFORMATION

Introduction (03/18)

This manual is meant to detail the steps needed for the most commonly used options on the ACE controllers in the EDP room. These options include:

- Reprinting Receipts
- Viewing, Creating, Deleting, and Editing Operator IDs
- Opening Supervisor Procedures
- Closing Supervisor Procedures
- Sales Audit Reports
- Manually Performing the Automatic Store Close

EDP Admittance (01/25)

The following are required to ensure secure admittance:

- Digital keypad that tracks users by an audit trail
- Motion sensor
- Door should immediately rearm after entrance or exit
- If door is opened without a passcode or left open more than thirty seconds:
 - Local audible alarm sounds while the warehouse is open
 - Local audible alarm sounds and alarm sent to Central Station or alarm company if warehouse is closed

Locations with Non-tracking Alarm Panels or Not Monitored by Central Station:

The EDP Admittance Log ([#AD04](#)) must be completed when entering and exiting the EDP room. [Central Station](#) can be contacted at 800-361-0408 for monitoring verification.

[Locations with Non-Tracking Alarm Panels/Not Monitored by Central Station](#)

Non-Costco personnel may only enter EDP if they have authorization from Costco to perform work or monitoring on Costco communications or IS equipment and they must be accompanied by a Costco employee.

Locations monitored by Central Station: Warehouse visitors/vendors and non-Costco personnel may only enter EDP if they have authorization from Costco to perform work or monitoring on Costco communications or IS equipment and they must be accompanied by a Costco employee. All visitors/vendor and non-Costco personnel must sign the [AD04a - Visitor EDP Admittance log](#).

Note: All persons entering EDP without using their personal code on the keypad must sign the log (e.g., multiple employees going into EDP at the same time and only one code was entered or keypad not functioning). Sharing of codes is never permitted.

GENERAL INFORMATION

Logging In (03/18)

All supervisors and managers should have access to the controller. Sales auditors and inventory auditors may also have access. To sign on to the controller:

- Enter cashier number in Operator ID field and press **<ENTER>**
- Enter enhanced password and press **<ENTER>**

Navigating the Controller (03/18)

Depending the screen and options, the controller can be navigated using different methods.

Touchpad: The keyboard's touchpad can be used to move through most screens and options. Using the touchpad, hover the mouse over the option desired and left click to select.

Letters: Any option containing a bold letter can be selected by pressing that letter on the keyboard.

Arrows: The up and down arrow keys can be used to move up and down inside numerous reports.

REPRINTING RECEIPTS

SECTION 2

REPRINTING RECEIPTS

Introduction (04/24)

Occasionally it will be necessary to print a duplicate transaction for a member. There are two options on the controller that can be used:

- ACE Transaction Search Tool (Preferred method)
- View Summary Journals.

When a duplicate transaction is printed for a member, the member must be accompanied by a manager or supervisor to the exit, and the transaction must be inspected for accuracy by member service. After the transaction is inspected, it should be defaced and given to the member.

Note: Employees must not reprint receipts for themselves.

ACE Transaction Search Tool (03/18)

The ACE Transaction Search Tool is the preferred method for printing duplicate transactions. This option will print an exact copy of the transaction. To use the ACE Transaction Search Tool:

1. Sign on to the controller
2. Press **<1>** for TGCS ACE APPLICATION and press **<ENTER>**

```

REPRINTING RECEIPTS

View Summary Journals (cont.)

5. Select the desired terminal and date

The screenshot shows a terminal window titled "Electronic Journal File For Terminal 002 Date 10/10/2016". The search results are as follows:

```

>10/10/2016 09:27 131 2 0 830      0.00
**TILL EXCHANGE** 1
10/10/2016 09:27 131 2 1 830
CASH
TOTAL LOAN      135.00
OPERATION COMPLETE 10/10/2016 09:27
10/10/2016 09:27 131 2 2 830      0.00
SIGNED OFF
10/10/2016 09:27 131 2 2 830
1U
OPERATION COMPLETE 10/10/2016 09:27
Free Memory: 994775040
Total Heap: 1738218 / 21099#
  
```

At the bottom, there are "Print" and "Cancel" buttons. The status bar at the very bottom shows "F1 Help F3 Quit", "Time=07:52", "Current Window=1", "Number of Windows=1", and "SYSTEM MESSAGE AVAILABLE".

6. Press **<TAB>** four times or use the touchpad to select the search area and entered the desired search information and press **<ENTER>**. The controller will search for the first example of the entered information. Move to the next example of the entered information by pressing **<ENTER>** again.

Any number or description can be searched for using this option including full or partial membership numbers, item numbers, descriptions, prices, and the last 4 digits of EFT payment information.

This screenshot is identical to the previous one, but the search field at the top is highlighted with a yellow box and contains the text "979669*". The search results and the rest of the interface remain the same.

Note: If an **<*>** is added at the end of the desired search, the View Summary Journal search will include all registers for the selected date.

OPERATOR IDs

SECTION 3

OPERATOR IDs

Introduction (03/18)

The Operator IDs section will show the steps required to view, create, edit, and delete cashier numbers on the controller.

Note: Supervisors and managers may never have more than one operator number.

Viewing Operator IDs (01/18)

A numeric operator number and password must be created for all employees who will be accessing the register system or the controller. Before assigning an operator number to an employee, the operator listing should be viewed to identify an available number. To view a current operator listing:

1. Sign on to the controller
2. Press <1> for TGCS ACE APPLICATION and press <ENTER>
3. Press <R> for Reports
4. Arrow down to Data Maintenance Reports and press <ENTER>

5. Arrow down to Operator Authorization and press <ENTER>
6. Select desired parameters and press <ENTER>

OPERATOR IDs

View Operator IDs (cont.)

The operator listing can be sorted by the following criteria:

- All operator names/models (by ID) – Cashier listing will be sorted in ascending order by operator number
- All operator names/modes (by Name) – Cashier listing will be sorted in alphabetical order by cashier name
- Selected operator details – Cashier listing will only show the selected operator number or model number

Note: The operator listing must be audited on a regular basis to ensure the listing is current. Operator numbers for former employees must be deleted immediately.

Model Numbers (08/23)

Operators will be assigned an operator number and model ID when they are created. The following table should be used to determine the operator number range and model ID for operators based on their position.

Manager (model *7) users may be assigned in the 900 range to create additional supervisor operators, if needed. In this case, all managers can be moved to 900 range to easily distinguish roles.

Model ID	Position	Operator ID Numbers
*1	Cashier	1 – 399
*2	Training Mode	500 – 505
*3	Refund Cashier	610 – 649
*4	Inventory Auditor	606 – 609
*5	Sales Auditor	600 – 605
*6	Supervisor	801 – 849
*7	Manager	850 - 898

Note: Although vault clerks will receive an operator number for the Cash Recycler between 500 and 505, they should not be given an operator number on the controller.

OPERATOR IDs

Creating Operator IDs (08/23)

Use the following steps to create an operator number:

1. Sign on to the controller
2. Press **<1>** for TGCS ACE APPLICATION and press **<ENTER>**
3. Press **<D>** for Data Maintenance
4. Press **<O>** for Operator Authorization Records

```

OPERATOR IDs

Creating Operator IDs (cont.)

9. **If a cashier or refund cashier model ID (*1 or *3) is selected** press <ENTER> and the prompt box will display "The operation was successful". The operator number has now been created and the cashier can now sign onto a register.

If a manager, supervisor, sales audit, or inventory audit model ID (*7, *6, *5, or *4) is selected an enhanced password must be created. To create an enhanced password hold <ALT> and press <C> . Enhanced passwords must be exactly eight (8) characters in length and contain at least one (1) letter and one (1) number.

Note: The enhanced password should be set to "expire" requiring the user to create a new enhanced password at their first sign on if they are not present at time of issuance.

Deleting Operators (06/25)

Use the following steps to delete an operator number:

1. Sign on to the controller
2. Press <1> for TGCS ACE APPLICATION and press <ENTER>
3. Press <D> for Data Maintenance
4. Press <O> for Operator Authorization Records
5. Enter the desired operator number and press <ENTER>
6. Press <TAB> to enable the option to erase the user
7. Hold <ALT> and press <E>
8. Press <ENTER> to confirm

CONTROLLER REPORTS

SECTION 6

CONTROLLER REPORTS

Department Totals Report (01/25)

The Department Totals Report will display all register sales in real time, excluding gas.

To print or view the Department Totals Report:

- Sign on to the CC controller
- Select 1 for TGCS ACE APPLICATION
- Press <R> for Reports
- Select Sales Report and press <ENTER>
- Select Department Totals and press <ENTER>
- Select **Current Period Short** for same day or **Previous Period Short** for previous day
- Select **All Departments**
- Select **Basic Report** for total sales or **Enhanced Report** to include refunds, voids and coupons
- Select **Display** or **Print** and press <ENTER>

Terminal Productivity Report (01/25)

The Terminal Productivity Report will display register sales. The user can select the reporting in interval minutes for specific or all terminals.

To print or view the Terminal Productivity Report:

- Sign on to the CC controller
- Select 1 for TGCS ACE APPLICATION
- Press <R> for Reports
- Select Performance Reports and press <ENTER>
- Select Terminal Productivity Report and press <ENTER>
- Select **Current** for same day or **Previous** for previous day
- Select **All Terminals** or **Selected Terminals**
- Select **Subtotals Only** for total sales for all registers or **Details and Subtotals** for total sales displayed by individual register
- Select **Display** or **Print** and press <ENTER>

CONTROLLER REPORTS

Store Totals Recap Report (01/25)

The S Report will display register sales. The user can select the reporting in interval minutes for specific or all terminals.

To print or view the Terminal Productivity Report:

- Sign on to the CC controller
- Select 1 for TGCS ACE APPLICATION
- Press <R> for Reports
- Select Accounting Reports and press <ENTER>
- Select Store Totals Recap and press <ENTER>
- Select **Current** for same day or **Previous** for previous day
- Select **Display** or **Print** and press <ENTER>

Aud Action Void Report (09/18)

The Aud Action Void Report will display any tendered transaction that had a negative total. Examples include cash adjustments, coupon adjustments, price adjustments, zero total receipts, and pharmacy voids. Refer to the [Sales Audit Manual](#) for more information.

To print or view the Aud Action Void Report:

- Sign on to the CC controller
- Select 1 for TGCS ACE APPLICATION
- Press <R> for Reports
- Select Costco Reports and press <ENTER>
- Select Aud Action Void Report and press <ENTER>
- Ensure that the report is set to "Today" and the report can be either Displayed or Printed. Press <ENTER>
- Report will either print or display all receipts that must be accounted for

Note: Refunds without merchandise should be performed in refund mode, not sale mode, so they will should not be on the Aud Action Void report.

Detail Terminal Void Report (09/18)

If a cashier scans a membership card and then immediately presses void and total, a transaction number will be used and counted as a void transaction. Because there was no merchandise rung, sales audit does not have to account for these transactions. If SAST is used to account for void transactions, these transactions will show. To make sure that all "real" void transactions are accounted for, sales audit should use the Detail Terminal Void Report to account for void transactions.

CONTROLLER REPORTS

Detail Terminal Void Report (cont.)

To print or view the Detail Terminal Void Report:

- Sign on to the CC controller
- Select 1 for TGCS ACE APPLICATION
- Press **<R>** for Reports
- Select Costco Reports and press **<ENTER>**
- Select Operator/Terminal Void Report and press **<ENTER>**
- Ensure that the report is set to "Today" and the report can be either Displayed or Printed. Press **<ENTER>**
- Report can be printed or displayed

Note: Any void transaction where merchandise is rung (no matter the dollar amount) must be defaced and attached to the Daily Register Sheet.

In line voids (an item was rung in and then voided out in the same transaction but the transaction was finished through tender) will also appear on the Detail Terminal Void

Report with the dollar amount, register and ring number. Sales audit should use this part of the report as a tool to identify patterns with cashiers that might need to be communicated to management. that has a zero dollar amount in both columns will also be a void transaction.

Using the Detail Terminal Void Report for Void Transactions

When using the Detail Terminal Void Report to verify that all void transaction receipts are present, sales audit should look for dollar amounts in the \$ Void Trans column. Any transaction listed that has a zero dollar amount in both columns is usually a void transaction.

Void transactions

CONTROLLER REPORTS

Summary Tax Report (03/18)

Sales audit is responsible for balancing and accounting for resale cards against the Summary Tax Report daily. Sales audit should run a calculator tape on the resale dollars from the cards and match that amount against the Summary Tax Report. If there is a discrepancy, SAST should be used to find the missing transaction(s). In SAST, enter the date and put a 1 in the Resale field. When the transactions display, press F11 = Member. Fold and verify off the Resale amount on the second line.

Detail Tax Report (03/18)

Sales audit should use this report to verify that there were no large manual tax adjustments. Labels do not print for tax adjustments therefore they are not audited by a supervisor. Sales audit should research any large amounts or excessive adjustments on this report and any issue found should be brought to the attention of management.

Ancillary Report (03/18)

The Summary Ancillary Report lists each Food Court cashier (name and number) that made an in-line void along with the dollar amount and number of in-line voids. The report also shows the number of zero dollar pickups and loans per cashier. This report is only for food court registers.

If a cashier is identified as having a high amount of voids, zero dollar pickups or loans, the Detail Ancillary Report lists the register and ring number of these types of transactions and should be used for further research and to identify patterns. Management should be notified if any issue is found.

Re-printing Closing Reports (03/18)

The Auto Closing reports can be re-printed the next day by signing onto the controller:

1. Press <1> for TGCS ACE APPLICATION and press <ENTER>
2. Press <R> for Reports
3. Press <F10>, <ENTER>
4. Arrow down to Execute Auto Report and press <ENTER>
5. In the auto Report name field either type "Reprint" or use the drop down box to select "Reprint"

Retention of Reports (01/25)

ACE reports are retained as follows:

- Store Totals Recap – 5 years US, 7 years CN
- Department Totals – 5 years
- Detail Terminal Void Report – 6 months
- Summary Ancillary Report - 6 months
- Detail Ancillary Report – 6 months
- Summary Tax Report – Current and previous 7 years
- Detail Tax Report – 1 year
- Audit Exception Report (IND2384A) – 6 months
- Register Membership Details Listing (MBR1272) – 6 months

CONTROLLER REPORTS

Cash Drawer Position Report (03/18)

Occasionally it will be necessary to verify the cash balance of a till same day. Because a till's cash position cannot be verified until the next day using the AS400, the Cash Drawer Position Report should be used on the controller. To access the report:

1. Sign onto the controller
2. Press <1> for TGCS ACE APPLICATION and press <ENTER>
3. Press <R> for Reports
4. Arrow down to Accounting Reports and press <ENTER>
5. Arrow down to Cash Drawer Position Report and press <ENTER>
6. Enter an asterisk followed by the register number, select "Selected Terminals or Operators", and current and press <ENTER>

```

Reports Window      Help
-----
/-(X) Cash Drawer Position Report
Please enter the following:
Operator/*Terminal IDs:      *5
(*) Selected Terminals or Operators  (*) Detail
( ) All Terminals or Operators      ( ) Summary
(*) Current
( ) Previous
Select the destination
(*) Display      [Printers]
( ) Print
( ) File         [File]
>[OK] <[Cancel]
-----
F1 Help  F3 Quit  F6 Next Window  F7 Search  F8 Repeat Search
Time=13:11  Current Window=1 Number of Windows=1

```

The amount listed to the right of cash will be the amount the register system has calculated is in the drawer.

Age Verification on Restricted Items (09/19)

To verify what date was keyed by a cashier during a prompt for age on alcohol or tobacco follow these steps:

1. Sign onto CC in EDP
2. Press <1> for IBM ACE APPLICATION
3. Press <M> for Manager Procedures
4. Press <V> for View Summary Journals
5. Press <TAB> twice
6. Press the down arrow until the desire date is highlighted
7. **NOTE: Don't worry about the terminal number.**
8. Press <ENTER>
9. Enter membership number followed by an <*>
10. Press <ENTER>

CONTROLLER REPORTS

Age Verification (cont.)

The controller will scroll through the specified day's transactions until the membership number is found. When the transaction is found, press **<TAB>** and then use the up and down arrows to scroll through the transaction. Above the first alcohol or tobacco item in the transaction will be a line showing the date of birth that was entered by the cashier. Subsequent alcohol or tobacco items will not have a date of birth above them.

```
E 2619 ORG. BANANA 1.99
Date of Birth = Sun May 15, 1955 KEYED
1715 BUD LIGHT 36 22.89 A
```

Verifying Loans Manually Keyed on the Register (02/24)

In non-cash recycler locations, the loan report must be verified against CFIs given from the vault. In cash recycler locations, the loan report should show no loans. Any discrepancies should be fixed on the register. To view loans that were manually keyed

- IBM ACE Applications **[1]**
- Reports **[R]**
- Listing and Log Reports **[L]**
- Exception Log
 - To view Loans only, **[Page Down]**, **[Page Down]**, ensure option 13 Cashier Loan is starred. To select or deselect an option, use the space bar.
- Choose Display or Print
- **<ENTER>**

FOOD COURT KEYBOARD

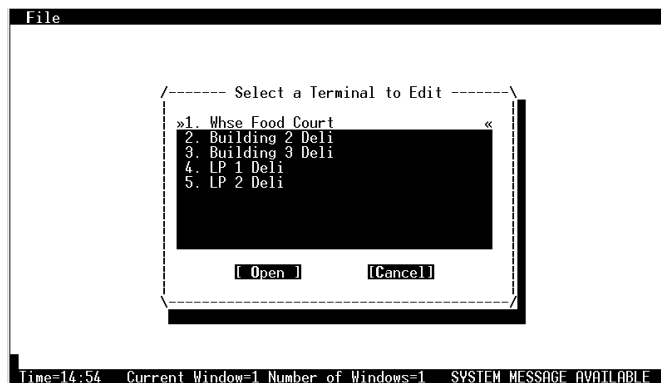

SECTION 7

FOOD COURT KEYBOARD

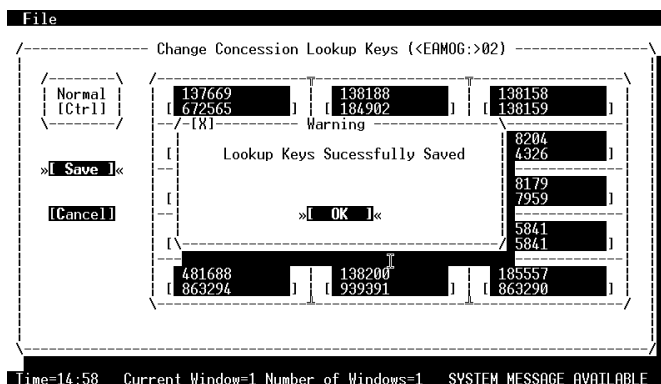

Changing the Food Court Keyboard (03/18)

Occasionally it is necessary to change the Food Court keys. This might be due to the elimination of an item or the introduction of a new item. Use the following steps to update your Food Court keyboard configuration:

1. Sign on to the controller
2. Press <1> for TGCS ACE APPLICATION and press <ENTER>
3. Press <U> for User Procedures
4. Tab to Keyboard Lookup Utility and press <ENTER>
5. Ensure Whse Food Court is selected and press <ENTER>

6. The keyboard that displays is the current food court keyboard. Tab between keys to edit, delete or add. The key on top is the primary key, and the key on the bottom are the keys only usable while holding down control. If you want to leave a key blank that is not currently blank, you will need to type in a zero.
7. Once all adjustments have been made tab to [Save] and press <ENTER>. "Lookup Keys Successfully Saved" will display.

AUTOMATED STORE CLOSE

SECTION 8

AUTOMATED STORE CLOSE

Introduction (01/25)

Every night sales from the registers will be uploaded to the AS400 during a process called the Automatic Store Close (ASC). The ASC will process at approximately 10:30P.M. local time Monday thru Friday and 9:00P.M. local time on Saturday and Sunday. Gas stations and Car Washes payment terminals operate on a separate system and are not affected by the ASC.

Overriding the Automated Store Close (01/25)

Occasionally locations need to upload register sales to the AS400 immediately instead of waiting for the ASC to process. Most commonly this will be done on the Saturday of a Physical Inventory or for a warehouse closure due to a natural disaster.

Note: The ASC must never be overridden if the warehouse is still open or any registers are still in use.

To override the Automated Store Close:

1. Sign on to the controller
2. Press <1> for TGCS ACE APPLICATION and press <ENTER>
3. Press <U> for User Procedures
4. Tab to "Run Manual Close" and press <ENTER>
5. While holding <ALT> press <O>
6. Ensure "Close Period" is highlighted and press <ENTER>
7. "(1) Daily Close" will display, press <ENTER>
8. Two consecutive warnings with regard to overriding the store close will appear. Press <ENTER> twice to continue
9. "A close period was performed within the last 24 hours. Do you want to continue?" will display
10. Select "Yes" and press <ENTER>

The manual store close will immediately run. Confirm the store close completed normally by pressing <ALT> + <PRINT SCREEN> and then press <M> for messages. The following message should appear:

MM/DD HH:MM CC 1 X223 CLOSE OF REPORTING PERIOD COMPLETED

The following day, the POS system will automatically revert back to the automated store close.

Note: The ASC can be confirmed in AS400 by using option IPSI.
