INTRODUCTION

SECTION 1

INTRODUCTION

The IBM Application System 400 (AS400 or iSeries) is the most used source for information in the warehouse. This guide is meant to show the basic steps for commonly used AS400 options, but is not meant to serve as an all-inclusive keying guide.

AS400 Sign-on Information (05/25)

Generic Sign-on

Each location is set up with generic membership and warehouse AS400 sign-ons, which should be used when logging into the AS400 by employees without specific role logins. The user and password are based off of the location number and differ according to number of digits in the location number.

Warehouse Sign-On information:

Warehouse Number	User	Password
1 or 2 digits: XX	WHSEINXX	EDP0XX
3 digits: XXX	WHSEINXXX	EDPXXX
4 digits: XXXX	WIN0XXXX	EDP0XXXX

Membership Sign-On Information

Warehouse Number	User	Password
1 or 2 digits: XX	WHSEMBXX	MEMBER0XX
3 digits: XXX	WHSEMBXXX	MEMBERXXX
4 digits: XXXX	WMB0XXXX	MBR0XXXX

Note: User specific management AS400 profiles must never be shared. Generic AS400 profiles should be used for general warehouse use.

Club/Wholesale Demo Services CDS/WDS Sign-on

Costco provides AS400 access to Demo Supervisors so they can access necessary options while unnecessary or inappropriate options for non-Costco personnel are restricted (e.g. EDSM, WII, LSDT, etc.) A CARTS+ request can be submitted for assistance with this profile.

Warehouse Number	User	Password
1, 2 or 3 digits: XXX	WXXXDMO	Set by User
4 digits: XXXX	WXXXXDMO	Set by User

Note: At the request of regional management, Demo profiles in Eastern Canada region have been eliminated. Demo employees needing sales or item information must ask warehouse personnel for assistance.

INTRODUCTION

AS400 Navigation (12/25)

Navigating within the AS400 system primarily involves using menus, function keys (F keys) and keyboard short cuts. The system was designed to function with keyboard commands, but a mouse can be utilized to assist in navigation. Any blue items on screen can be double clicked.

Function Keys (F1-F24):

The function keys (F Keys) are located at the top row of a standard keyboard, above the number key row. They are typically labeled F1 through F12. To access the F13 through F24 on a standard keyboard, use the Shift key in combination with the desired F key. The Shift key is used to activate a secondary set of the function keys. For example, Shift+F1 = F13, Shift+F9 = F21, etc.

The following are typical functions of the F keys in most screens:

F1 = Help (Displays information available for that option)
F3 = Exit (Exit the current option and returns to the main/previous menu)
F4 = Search
F12 = Cancel (Returns to the previous screen)
F21 = Print

Each program will display each F key's action at the bottom of the screen.

```

Note: Functions can also be clicked directly on the screen instead of using the keyboard.

Keyboard Layout

The QWERTY keyboard mapping has been modified to work with the AS400. Certain keys function differently than what is factory labeled on the QWERTY keyboard.

INTRODUCTION

Numeric Keypad

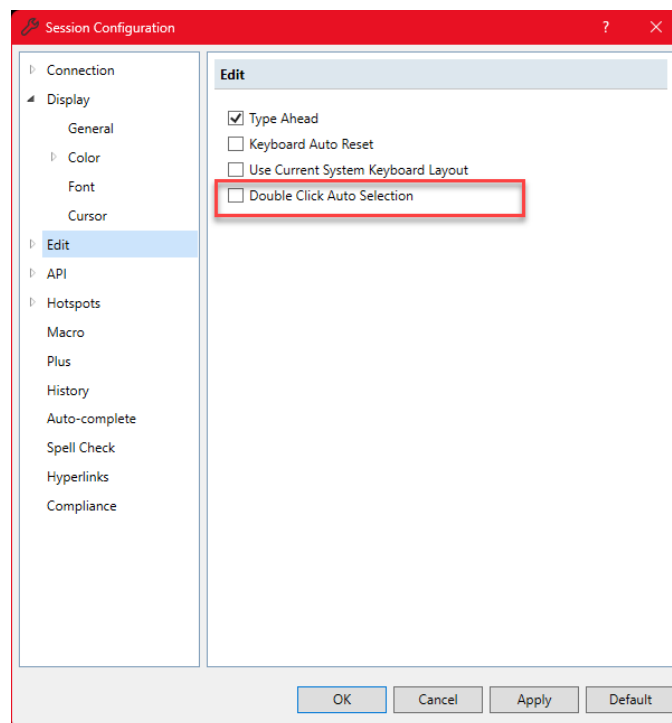

Key the desired entry in the selected field, and use the Field Plus (<+>) button to the right of the key pad on the keyboard. Once the appropriate fields are populated, press Field Enter (<ENTER>) to enter the data. These are located next to the keyboard's keypad as shown:

Note: On some keyboards, it is necessary to use the right <CTRL> key for Field Enter.

Double Click Auto Selection

Rumba also offers the ability to enable text selection when double clicked. By default, this functionality is disabled. When enabled, it allows any text appearing on the screen to be automatically selected when double clicked, making it easier to copy the correct text. To enable, click Options > Edit > Double Click Auto Selection.

Note: The session profile must be saved in order for the settings to be enabled on the next sign on.

INTRODUCTION

F1 Help Screen (10/23)

Many AS400 options have a Help screen. Select F1 for details of the option's function keys, definition of terms and other pertinent information about using the option.

```

INTRODUCTION

Toggle Between Sessions (10/23)

Two AS400 sessions are able to be accessed from a single login. To access a second session, press **[ESC]**, place a 1 next to Start New Session and press **[ENTER]**. Repeat this process to toggle back to the original session.

Custom View (10/23)

A custom AS400 home screen may be created to add frequently used options. To add custom options, enter the desired option into the Option field and select F15 (Shift + F3). To toggle between the default and custom AS400 main menus, select F18 (Shift + F6).

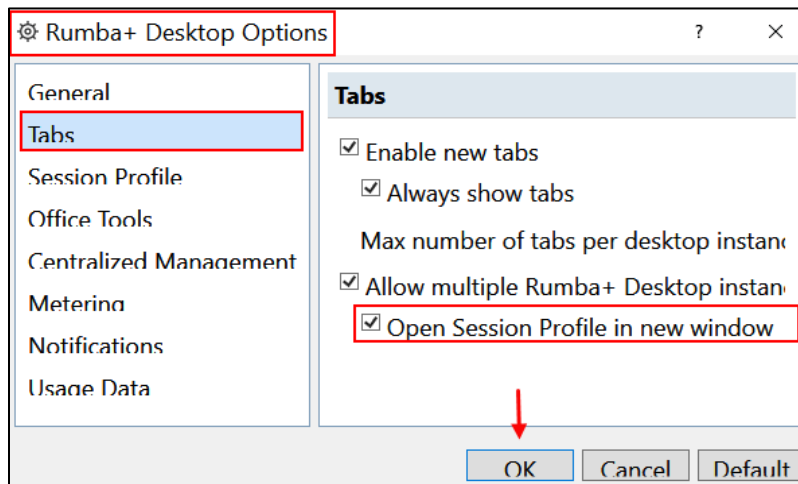

```
Option: IAFEP  
  
F1=Help   F4=Search   F10=Job info   F11=Signoff   F13=Alt language  
F15=Add to Custom View   F18=Custom View  
Option added to Custom View
```

The system will default to the custom view once any custom options have been added. Options may be removed by accessing the option and selecting F15 (Shift + F3).

Opening a New AS400 Session Profile in a New Window (12/23)

If AS400 sessions open in the same window and cannot be moved or separated, change the default from the Options tab on the menu bar:

Go to Options > Rumba+ Desktop Options > Tabs > and check Open Session Profile in new window.

ASSIGNING PASSWORDS

SECTION 2

ASSIGNING PASSWORDS

EPRFM (2/23)

Some AS400 profiles must be set up through option EPRFM. These profiles include Optical, Inventory Audit, RTV, Sales Audit and Vault. Only staff managers and above have access to option EPRFM. The Position Type and User Template fields determine the access of the user. Employees may only have one AS400 profile. If an employee works in multiple departments and needs access for each, select the position type and user template that best fits their needs. For example, a sales auditor who is a backup inventory auditor, will be set up under the Inventory Audit position type and multiple departments will be available under the User Template prompt.

Once in the option, press **[F4]** to see a list of available positions. Add the employee’s number for the person the account is being created for, press **[ENTER]** to continue.

EMPLOYEE/USER PROFILE MAINTENANCEAID051

Enter Position Type: SA F4 SALES AUDIT

And Warehouse: 1206 APEX

And Employee Number: ..

Press **<F6>** to assign the user.

EMPLOYEE/USER PROFILE MAINTENANCEAID051

Position Type: SA SALES AUDIT

Warehouse: 1206 APEX

Employee Number:

Employee First Name: ADAM

Employee Last Name: FENTON

Enter User Template:

Assigned Profile: W01206SA02

Profile Status: UNASSIGNED

F1=Help F3=Exit F8=Accept/Enable F12=Cancel

Tab down to the “User Template” field, **[F4]**. Find the applicable template based on the employee’s role.

TABLE OF CODES PROMPT			IN0TBLOC
Code	Description	Description #2	
WHSSA	WAREHOUSE SALES AUDITOR PROFILE	SALES AUDIT	
WHSSARTV	WAREHOUSE SALES AUDITR & RTV CLERK	SALES AUDIT & RTV	
WHSSAVULT	WAREHOUSE SALES AUDITOR & VAULT PROFILE	SALES AUDIT	
WHSSAVLRTV	WAREHOUSE SALES AUDITOR, VAULT & RTV CLERK	SALES AUDIT & RTV	
WHSSVULT	WAREHOUSE VAULT PROFILE	SALES AUDIT	
WHSSVLTRTV	WAREHOUSE VAULT AND RTV CLERK	SALES AUDIT & RTV	

ASSIGNING PASSWORDS

EPRFM (cont.)

Tab down to the appropriate template, press **[ENTER]** to select. When finished, press **[F8]** to finalize.

To disable an active profile from EPRFM, enter position type, employee number and press **[ENTER]**. Confirm employee information is correct and press **[F23]** to disable the active profile. Press **[F23]** to confirm and the employee profile will be disabled.

Note: When assigning a profile, verify the corresponding job code has been entered into the employee's [Job Transfer Set \(JTS\)](#). Assigned JTS automatically triggers training in Costco U.

EPRFD (2/20)

Option EPRFD is an inquiry option that allows users to view profiles that have been assigned through option EPRFM.

Note: Full-time sales auditors may not have any profile other than Sales Audit.

RPWD (9/23)

Option RPWD may be used to reset a role-based AS400 profile. Access to this option is available to warehouse staff managers and above. The user profile of the password you want to reset and the reason for reset must be entered. Upon completion, a temporary password will be given to the user. When the employee logs into their account for the first time, they will be required to set a new password.

Reset Password (RESETPWDMG)	
Type choices, press Enter.	
User profile	_____ Name
Reason reset required	_____

ASSIGNING PASSWORDS

WPM – Warehouse Password Maintenance (01/26)

Warehouse Password Maintenance (WPM) is used to add, change, or delete users and passwords for access to some protected warehouse programs. Option WPM is available to Assistant Warehouse Managers and Warehouse Managers.

Warehouse Password Maintenance	
Whse:	1379 IDAHO FALLS
Position to User ID:	
2=Change 4=Delete	

To add a new user, press **<F6>**. The screen will prompt for a User ID and User Name. User ID's are limited to 10 characters. User names should be assigned by individual name and never by warehouse roll as individual IDs are required for all users. Passwords must be entered by the user and must be a minimum of five (5) characters and no more than 10. Passwords can contain number and/or letters, but never special characters. Passwords must never be shared. Changes to passwords must occur through option WPM as the system will never prompt for a password change. After entering the user information, the following four options are available to be added.

APR - Refund Audit: This allows users to conduct refund audits. As of December 2025, the refund audit is no longer required though employees may still need access to log in and log out to initiate downstream processes. Access to this option is generally issued to all supervisors and RTV clerks.

EPC - Emergency Price Change: Access to EPC allows the user to change the price of items at the warehouse for the day. It also gives the user access to item downloads and item blocks at the warehouse. Regional rules may dictate who receives this option in the warehouse.

TCP - Tire Center Password: This allows users to access and assign release codes to employees in the Tire Center Password Maintenance option. Access to TCP should be limited to the Warehouse Managers, Assistant Warehouse Managers and Operations Managers only.

TSH - Trash: This allows users to key out merchandise that is being thrown away and needs to be removed from inventory. Access to this option is typically granted to managers and supervisors, however, other employees may be given access at warehouse manager's discretion. Inventory auditors may not have access.

Note: Option PWMI allows users to view who has passwords for the above options

ITEM LOOKUP

SECTION 3

ITEM LOOKUP

IAI (12/20)

Option IAI (Item Alpha Inquiry) is used to search for items using keywords and/or specific additional filters. This option is also used to access specific item information through other AS400 options listed below.

12/11/20 13:23:58		ITEM ALPHA INQUIRY		INA100	
Enter Description:				or UPC/Item:	
and/or Dept:	F4	Category Code:	F4	F10 FILTERS OFF	
and Location:	F4				
or Location Group:	F4	Display On Hand Items only: ☒			

Description: This field searches for items based on specific keywords and item description. This is the most commonly used search field in IAI.

Dept: This field may be used in conjunction with the item description or on its own. The most common use for this search is in conjunction with the item description to refine search results (E.g. narrowing down water by using dept. 14).

Location: This field may not be left blank and defaults to the home location. The location number may be changed, however.

Location Group: This field displays inventory results for a specific region, state or company by preceding the number with (*) (E.g., *NW for Northwest Region, *STUT for state of Utah, *CN for Canada, etc.).

Category Code: This field may be used in conjunction with the department field to further refine search results. (E.g. searching dept. 24 items with the category code for TVs).

Display On Hand Items only: This field defaults to (Y) and may not be left blank. (Y) Displays on-hand inventory results only, while (N) displays items previously carried or not in stock.

Once all necessary fields are completed, press Field Enter (<+>) and information will show for the given criteria.

Enter Description: WATER		or UPC/Item:		F10 FILTERS OFF	
and/or Dept:	14 F4 SUNDRIES	Category Code:	F4	Time since last update: 00:12:02	
and Location:	110 F4 ISSAQUAH (425) 313-0965	Display On Hand Items only: N			
or Location Group:	F4	0=STOP S=SWI			
1=IAI 2=WWPO 3=IIL 4=RHI 5=Sign Inquiry		7=Item Tier 8=ITM		Saleable	
Opt	Item Dpt	Item Description	Sell Price	On Hand	Status

4955	14	ARROWHEAD WTR SPORT TOP	24/23.7 OZ. 700ML P45	5.39	0 D
10134	14	KS WATER 35/16.9Z	P60	3.49	0 D
10136	14	KS WATER 15/1L	P=54 OR P=60	3.49	0 I
12731	14	PERRIER 24/500ML	P54	17.99	81 A
21364	14	KS SF SPKL WATER BEVERAGE	24/20 OZ BOTTLE P54	8.99	0 D
25864	14	TALKING RAIN SPARKLING	WATER 30 PK 16 OZ P54	10.59	0 D

The item number, the description, sell price, units on hand, and inventory status all show on the screen for the selected criteria. [PAGE UP] or [PAGE DOWN] may be used if multiple pages exist for the descriptions given. There is also a row of prompts in blue with associated numbers to drill into the item further.

ITEM LOOKUP

IAI (cont.)

1=IA1	2=WWPO	3=IIL	4=RHI	5=Sign Inquiry	7=Item Tier	8=ITM	0=STOP	S=SWI
-------	--------	-------	-------	----------------	-------------	-------	--------	-------

1=IA1: Key [1] in the Opt field to list the on hand inventory of the item for any warehouse in the region. This may be necessary if the warehouse is out of an item, but the member wishes to see if the item is carried at other locations. This information does not update until the following day.

3=IIL: Key [3] to get the sales for the item by region. This can be changed to other regions or the entire company. IIL is often used for focus items such as stamps and movies tickets to see how particular warehouses rank against one another in sales.

4=RHI: This option will show the receiving history of the item.

5=Sign Inquiry: This option lists the information on the sign without having to print the sign.

6=Print Sign: This function is to print a sign for the selected item number.

8=ITMW: This is the most commonly used number from the IAI screen. See the next screen for further details. [8] May be keyed next to multiple items to display ITMW for each item.

0=STOP: This will show any pertinent HAZMAT and disposal information.

IGM (2/21)

Option IGM is used by the warehouse to create, display and maintain group codes.

ITEM BY GROUP CODE MAINTENANCE				IND2554
Whse:	110	Group:	F4	Desc:

Creating and Maintaining group codes

To create a group, enter the warehouse number and group name, then press [ENTER]. This will allow you to add items, remove items and/or delete the group. Once all item numbers are entered, press [ENTER] to confirm the group. Only active items in the warehouse can be added to a group in option IGM.

ITEM LOOKUP

IRCI (12/20)

Option IRCI (Instant Rebate Coupon Inquiry) is used to view instant rebate coupon information. The affiliated item number, amount of the rebate and the start and end dates of the rebate can also be viewed. The most common uses include:

- Viewing active or future coupons for the warehouse
- Identifying the coupon number for warehouse IRC adjustments
- Identifying an expired coupon number when honoring an adjustment/refund outside of the active timeframe

12/11/20		INSTANT REBATE COUPON INQUIRY		Sortable By: IND4236

F1=Help F3=Exit F13=Restart F21=Print

The screen displays the location number on the first line and the department number on the first item of each department. It also shows the item number, description, full coupon number, IRC amount, quantity limit, start date and end date, saleable units on-hand and units in transit.

ITEM LOOKUP

IRCI (cont.)

A start date must be entered to view any expired IRCs. An end date is not required as it will default to the current date.

All Future IRCs may be viewed as long as both the start date and end date fields are filled out and the start date is greater than the current date.

This screen will show how many units are on hand, the item's department number, sell price, and units on order and expected arrival. In the bottom right corner, NSI (non-saleable inventory) on hand and Today's Sales in real time are displayed. In the example, the numbers were updated 10 minutes ago.

At the bottom of the screen, there is a series of **F** commands:

F9: Shows any rebates associated with the item.

F14: Show taxes associated with the item.

F21: Allows the user to print a sign from the inquiry screen.

F22: Shows the eligibility for the item. F22 displays associated environmental fees and any applicable fees or links as well as EBT eligibility.

IXI (12/20)

Option IXI is used to cross-reference an item number with all associated UPCs. This option is primarily used if an item is not scanning at the register to verify if the UPC is set up. If the UPC is set up, an EPC download may be used to immediately download maintenance on the associated item.

TRANSACTION LOOKUP

SECTION 4

TRANSACTION LOOKUP

Please note, the following options are not available for same day purchases. For same day transaction lookup, the controller in EDP must be used.

Shopping History (9/25)

Member sales transaction history in search options WII, WIIA, and SAST is limited to 10 years from the original transaction date.

- When a search is performed by member number purchases older than 10 years will not be displayed
- When a search is performed by warehouse number and item number transactions older than 10 years will display with 99 as the member number

Providing Shopping History - US

To ensure Costco is complying with new privacy laws related to shopping history and releasing and sharing of personal information, it is imperative that all employees understand what information can be shared and to whom and when it can be provided. In addition to updates below regarding shopping history, the [Releasing and Sharing Private and Member Information Guide](#) has been updated for additional types of requests.

Member requests	When shopping history can be provided
Shopping history for their own purchases	Yes. Only after valid identification has been verified
Shopping history for their spouse or household member	No. Spouse or household must request their own and then only after identification has been provided
Shopping history for an affiliate to a Business Membership	No. Business owners will need to request receipts from their affiliates that made the purchase.

All requests to share or release member information by a member at the warehouse level must be done in person, by the individual to whom the information relates. A valid state ID must be verified prior to any release. Members are only entitled to their own information regardless of the type of membership account. Primary members are not entitled to see purchase history or contact information other than name for household or affiliate members. Cardholders are not entitled to view shopping history for other cardholders. At no time should a computer monitor or device be turned to show members any information appearing on the screen.

For further information, refer to the [Shopping History – US](#) memorandum.

TRANSACTION LOOKUP

EOI/CNI (12/20)

Options EOI and CNI (Ecommerce Order Inquiry / Canada Inquiry) are used to research transactions ordered from Costco.com/Costco.ca and to check in online orders being picked up at the warehouse.

Costco E-Commerce Whse 894	
Order Inquiry	
Enter one of the following :	
Order #:	Optional
Bill To Membership #:	Filter by: Item:
Ship To Last Name:	Ship To Zip:
Purchase Order #: 894 . . . 00	
F1=Help F3=Exit F12=Previous F13=Restart	

Researching Online Orders

Both EOI and CNI default to an order inquiry filter screen. The two most common filters used are Order # and Bill to Membership #.

Using the Order Number

Online order numbers are typically 9-10 digits in length. Once the order number is entered, the Order Detail Inquiry screen may be accessed by pressing **[ENTER]**.

Costco E-Commerce Whse 847	
Order Inquiry	
Enter one of the following :	
Order #: 333882340	Optional
Bill To Membership #:	Filter by: Item:

TRANSACTION LOOKUP

EOI/CNI (cont.)

The Order Detail Inquiry screen will display all items in the order, in addition to the order number, membership number, order date and order total.

The item detail screen displays the individual item price, shipping and handling fees (including delivery fees), sales tax, the item number and department number, and the coupon amount if applicable. The section below the dotted line displays the total order payment information.

Note: Unlike the warehouse, coupons are considered a tender on Ecom. The coupon field will not display if no coupon was applied to the item.

TRANSACTION LOOKUP

BDOI (7/25)

BDOI shows detailed order information for orders fulfilled through business delivery. This option is similar to EOI and can be searched using order number or membership number.

Once an order is selected, BDOI will display each item purchased, order totals and any adjustments made to the order. BDOI will not display individual item or price adjustments initially on the first screen, only total adjustments made to the order. Drill into each item by placing a **[5]** or **[X]** next to it.

This option is mainly used when processing refunds to process refunds for department 44 when the vendor picks up the merchandise and the member has nothing to return.

For further KOM information, refer to the [Department 44 – Special Events Refunds](#) job aid.

RLG (12/20)

Option RLG (member refund log) is used to view refund transaction information. Several filters may be applied to research refund transactions in option RLG. The initial screen will default to the home warehouse and previous day. Both of these fields may be changed.

Optn: RLG MEMBER REFUND LOG IND2495													
Whse: 01		Oper ID:		Item#:		X = Converted Items Only		X = Dept. Rings Only		X = E-Comm Only		1-Saleable	
Date: 12/14/20		Register #:		Dept#:		X = Refunds Only						2-Non-Saleable	
		Trans #:		Member#:									

Once all filters are entered, pressing **[ENTER]** will display all applicable refunds. The screenshot below displays all refunds performed for the selected warehouse and date. Notice in the Dept. Ring column, both a * and Y are displayed. "Y" will display for all refunds performed as a department ring, while "*" display when a department ring is converted to an inline item (e.g., item is set up for the warehouse).

Optn: RLG						MEMBER REFUND LOG						IND2495			
Whse: 01		Oper ID:		Item#:		X = Converted Items Only

SAST (1/16)

SAST can be accessed directly or via WII when viewing a transaction and is used to find several transactions on a specific register for a date or set of dates. It is also often used to a particular type of transactions or tender. Multiple filters can be used simultaneously when using option SAST.

SALES AUDIT - SEARCH TRANSACTIONS		IND2135
Warehouse: 01	SEATTLE	
Enter - Sales Date:	(MMDDYY)	To: (MMDDYY)

TAXI (5/22)

Tax laws allow taxpayers in limited states to deduct state sales tax on their federal income tax return. Because of this change, some locations have received inquiries from members wanting to know how much sales tax they paid the year before. This option displays the amount of sales tax a member paid during the previous calendar year.

For further information, refer to the [Sales Tax Inquiry – US](#) memorandum.

TRANSACTION LOOKUP

WII (12/20)

Option WII (Warehouse Item Sales Inquiry) is used to view transactions for a specific member or warehouse. This includes refunds and department rings. This option relies on having a membership number and item/department number or a warehouse and item number.

Option....:	WII	WAREHOUSE ITEM SALES INQUIRY											
Company...:	US	F4	Entire membership (Y/N).....: Y										
Warehouse..:		F4	Member#.....: F4										
Department:		F4	Category...: F4										
Item.....:		F4											
Start Date:	12/01/20	F4											
End Date..:	12/15/20	F4	When item not entered, display A F4										
Whse	Sale Date	Member	Number	Tax	Reg#	Trn#	Time	Dept	RFND	Item	Sell Quantity	Ext Sell	Paid Amt

From here company, warehouse and start and end dates are already populated. The most common way to look up a transaction from this field is to use the Member # field. Once a member number has been selected you must use either the department or item field. The start and end dates can also be modified if you are looking for a specific range of dates.

Option....:	WAREHOUSE ITEM SALES INQUIRY										IND1648		
Company...:	US	F4	Entire membership (Y/N).....: Y										
Warehouse..:		F4	Member#.....: 111807394439										
Department:	13	F4	FOOD										
Item.....:		F4	All items										
Start Date:	12/01/20	F4											
End Date..:	12/15/20	F4	When item not entered, display A F4 All items										
Whse	Sale Date	Member	Number	Tax	Reg#	Trn#	Time	Dept	RFND	Item	Sell Quantity	Ext Sell	Paid Amt
1033	12/06/20	111807394439	Y	4	76	11:41	13			354590	3.89	1	3.89
1033	12/13/20	111807394439	Y	6	95	11:47	13			660936	4.59	1	4.59
											2		8.48
											0		.00
											2		8.48
												Total Sales	
												Total Refunds	
												Total Net	

Once member number and department have been filled, all items matching the criteria will print for the selected dates. Refunds will show and be notated as a negative on the Ext Sell price column of the item. In addition, the warehouse number of purchase, the date, the item number, and other pertinent information will show.

At the bottom of the lookup screen, there is a series of **F** commands.

F11=Fold gives you the ability not only to see item numbers, but also to see a description of the item. This is especially useful in refunds when the item number may not be available but the description is.

Whse	Sale Date	Member Number	Tax	Reg#	Trn#	Time	Dept	RFND	Item	Sell Quantity	Ext Sell	Paid Amt

All available transaction details can be viewed here. Another set of **F** prompts are available at the bottom of the page. Use **[F12]** to revert to the previous screen or **[F21]** to print a transaction.

MERCHANDISING OPTIONS

SECTION 5

MERCHANDISING OPTIONS

EDSR (1/16)

Option EDSR (Electronic Data Sign Request) is used if a sign is necessary, the item number is known, and no manual changes are needed for the sign. Once the option has been accessed, you will be prompted for size of sign:

WAREHOUSE: 01		SIGN REQUESTS			IND1806
Size: M (T)iny, (S)mall, (M)edium, (L)arge, or (Q)Liquor					
Item/UPC	Item/UPC	Item/UPC	Item/UPC	Item/UPC	

Most signs in the warehouse are medium (M) or large (L), but other options are available. Once a size is selected, as many as 45 different signs can be printed for the selected size.

WAREHOUSE: 01		SIGN REQUESTS			IND1806
Size: M (T)iny, (S)mall, (M)edium, (L)arge, or (Q)Liquor					
Item/UPC	Item/UPC	Item/UPC	Item/UPC	Item/UPC	
8	998876	782796			

The item UPC may also be used. If the wrong item number is used or the item number entered is not recognized, you will be unable to print signs until the incorrect number is removed or fixed.

WAREHOUSE: 01		SIGN REQUESTS			IND1806
Size: M (T)iny, (S)mall, (M)edium, (L)arge, or (Q)Liquor					
Item/UPC	Item/UPC	Item/UPC	Item/UPC	Item/UPC	
8	998876	11360			

Input Error

Item not set up for warehouse

OK

Most buildings have two sign printers. After selecting [F21] ([SHIFT] + [F9]) to print, you will be asked which printer you want to use. [1] will send the sign to the designated sign printer, and [2] typically sends the sign to the mobile sign printer.

MERCHANDISING OPTIONS

EDMP (10/23)

All buyer maintenance affecting the item sign is displayed in option EDMP – Print Daily Maintenance. Option EDMP is updated daily at 3:00 am local time. To ensure maintenance has been uploaded, EDMP should not be run prior. After entering option EDMP, the following screen appears:

WAREHOUSE: 1379				PRINT DAILY MAINTENANCE				IND1805		
View: N Items w/o O/H				Date: 12/15/2020 (F4) Day: TUESDAY						
Prt	Prt	Itm	Cat							
Dpt	Item#	Y/N	Siz	O/H	Sts	Cod	Sign Line #1	Sign Line #2	Sign Line #3	Reason for Change

Option EDMP offers filters for items on hand or items with price changes. The current date is auto-populated, but it can be changed as needed. This is helpful for building closures for holidays so no price changed signs are missed. After filling all needed criteria, hit **<Field ENTER>**. This will sort all the price changes by department number.

WAREHOUSE: 1379				PRINT DAILY MAINTENANCE						IND1805	
View: N Items w/o O/H				Date: 12/21/2020 (F4) Day: MONDAY							
		Prt	Prt	Item Cat							
Dpt	Item#	Y/N	Stz	O/H	Sts	Cod	Sign Line #1	Sign Line #2	Sign Line #3	Reason for Change	
12	1157695	Y	M	127	P	KEA	GODIVA	ASSORTED CHOCOLATE BOX	10.9 OZ	Rebate change	
	1323765	Y	M	374	P	JBA	CAVE MAN	NUTRITION BAR VARIETY	22/1.4 OZ	Status change	
	1368689	Y	M	431	A	GZZ	TILLAMOOK	ZERO SUGAR JERKY	2/6 OZ	Rebate change	
	1374674	Y	M	252	A	FAA	BEQUET CARAMEL	SEA SALT CARAMELS	17.1 OZ	Rebate change	
13	71011	Y	M	170	A	CBA	KIRKLAND SIGNATURE	SOYBEAN SALAD OIL	4.60 GALLON	PRICE CHANGE	

From the Print Daily Maintenance screen in the Print field enter **Y** or **N**, choose the size (typically, default is [M] or medium), and press **<F21>**. The signs will automatically be sent to sign printer 1. For locations that highlight rebates, a time saving practice can be found [here](#).

Note: Signs must be printed and hung before opening every day.

ESPC (10/23)

Option ESPC (Sign Print Configuration) allows warehouses the ability to change the settings for option EDMP. This option is used to configure default settings for option EDMP – Daily Sign Maintenance. Configurable options include department default sign size and print with daily maintenance. Configurations can be adjusted by selecting Change (**F10**).

WAREHOUSE: 1375		SIGN PRINT CONFIGURATION				IND1808	
----- ALL SIGN REQUESTS -----				----- DAILY MAINTENANCE REQUESTS -----			
Print UPC Bar Codes: N				Show Items With Out O/H: N			
Print Cut Lines: Y							
				DEPARTMENT SIGN DEFAULTS			
Dpt	Description	Default	Size	Prt	w/Dly	Maint.	
11	TOBACCO	M				Y	
12	CANDY	M				Y	
13	FOOD	M				Y	
14	SUNDRIES	M				Y	
16	LIQUOR	M				Y	

MERCHANDISING OPTIONS

EDSM (1/16)

EDSM can be used to customize signs. This may be necessary when an item needs to be noted as a "last one display." It is also necessary when the price, item description, or spelling has been changed but will not download until the next day's sign maintenance is run.

```

WAREHOUSE:  1379      SIGN CHANGE MAINTENANCE / FREE FORM
  Item:      Leave BLANK for Free Form
  Size:
  Qty:  1
  
```

To make changes to the item description, the size, or the quantity of signs to print, key in the item number and other details and proceed to the next screen. If the item number field is left blank, but the size and quantity is entered, the sign will come up completely blank (aka: Free Form). If the sell price of the item is changed, the unit price per ounce or per bottle will not automatically be changed and some math may be required. Signs will only print from EDSM after exiting the screen (**F3**).

EPC Emergency Price Change (1/16)

EPC is used to mark down items or to correct the price of an item. The warehouse manager decides who can have access to EPC but access is typically limited to staff managers. Instructions for setting up users for EPC access can be found in the Assigning Passwords section of this manual.

Once in option EPC, and enter your user ID and password:

```

                Emergency Price Change/Item Download
Option: EPC
Whse:  1343 MERIDIAN

Enter User ID:
Password:
  
```

The list of the day's price changes is displayed:

```

                Emergency Price Change/Item Download

```

Item Downloads (1/16)

Item downloads are used when there is a disconnect between the price on the AS400 and the price on the register or if a buyer adds a fee or link to an item mid-day. Also, if an EPC has been performed on an item, the only way to mark the price of the item back up to its original price is to perform an item download. Enter the requested fields and press **<F8>** to update.

To download an item, access EPC and press **<F15>**.

MERCHANDISING OPTIONS

EPCI (1/16)

Option EPCI is an inquiry only option that allows users to view any EPCs, item downloads, and blocked items entered into the AS400.

Blocked Items (1/16)

Through option EPC, it is also possible to block items from sale on the register. This may be necessary when an item is recalled or an item number has been changed. To block an item access option EPC and press F18. A list of currently blocked items and the type of block will be displayed. K indicates the item requires a key flick and P prohibits the item from being sold.

Type: K = Key Flick P = Prohibit Sale				
DEL	Item	T	Start	
(D)	Number	Y	Date	Reason
	20	P	7/17/18	OLD ITEM#
	25	P	7/17/18	OLD ITEM#
	405	P	10/28/15	OLD ITEM NUMBER
	500	P	4/19/06	OLD ITEM NUMBER
	749	P	11/29/05	OLD
	789	P	3/07/07	DELETED ITEM
	1096	P	9/16/10	DELETED ITEM
	7670	P	9/28/16	OLD #
	8691	P	9/19/17	DELETED ITEM
	10134	P	7/23/14	NO LONGER CARRY 35CT
	10231	P	1/30/07	OLD NUMBER
	13820	P	3/14/19	WRONG #

To add a new block, press **F6**. For a key to be required, enter **K**. To prohibit the sale of the item, enter **P**. In both cases, a reason will be required.

Deleting Register Blocks

If an item is scanned on a register and is blocked with the message, "**NOT FOR SALE**", the item may be blocked in option EPC. If the item needs to be used again on the register, the block can be deleted by following the steps to add a block but putting a D next to the item that the block needs to be removed from. An example of when this may be necessary is if the item number of a produce item changes, then reverts back to its original number.

MERCHANDISING OPTIONS

SNM (2/21)

AS400 options **SNM** (Serial Number Maintenance) and **SNI** (Serial Number Inquiry) replaced the High End Watch Tracking Log. See the [Updating Watches to Available in Option SNM Job Aid](#) for instructions for inputting on hand high end watches. Once complete, all high end watch receivings, sales, refunds, and RTD shipments must be recorded in option SNM.

Once in option SNM, select the appropriate transaction code then enter the item #, serial # or membership #.

```

SERIAL NUMBER - TRANSACTION ENTRY

Using Filters

The most common use for IATOP is researching top items for a specific warehouse. If the Dept. field is left blank, the top items for the warehouse will display. All top results will default to showing 10 results, however, this field can be changed.

WAREHOUSE SALES

SECTION 6

WAREHOUSE SALES

DSI (12/20)

Option DSI (Daily Sales/Inventory Inquiry) is used to view department sales and inventory information for a specific department, warehouse, region or company. This information is displayed in daily, weekly, period and year-to-date totals. Option DSI will not display real-time sales, therefore, this option cannot be viewed same-day. The data will be pulled and displayed the following day.

WAREHOUSE SALES

IAWD (12/20)

Option IAWD is used to access the warehouse dashboard. This option displays summarized inventory, membership, sales or front end productivity information for a warehouse, region or company. The data available in IAWD displays daily, weekly, period-to-date and year-to-date. Each view can be toggled using the code prompts for the View: field.

C o d e	D e s c r i p t i o n
0 0	W M D - M a i n S c r e e n
0 1	W M D - I n v e n t o r y
0 2	W M D - S a l e s S u m m a r y
0 3	W M D - F r o n t - E n d P r o d u c t i v i t y

View 00: Main Screen

The main screen defaults to the home warehouse and previous day. Both of these fields may be changed; however, same day information will not populate. The main screen shows major warehouse statistics for the selected date, week, period and fiscal year.

LABOR SCHEDULING

SECTION 7

LABOR SCHEDULING

The Labor Scheduling (LS) options are designed to assist the locations in forecasting sales, estimating lanes and scheduling needs.

LSDT (12/25)

Option LSDT is the primary option used by front end personnel for checking hours scheduled versus hours needed. This will give an almost real time view of the current day's sales. This option is available to anyone with an AS400 sign on and will only display the user's home warehouse.

The dates and intervals may be altered. The sales date intervals can be viewed in 15, 30, or 60-minute periods.

Definition of LSDT Terms

Actl Lane	Displays the total number of Front End registers open during the time interval.
Sched Lane	Displays the number of lanes scheduled based on number of employees designated as cashier.
Hrly Actual Sale	Actual sales from Front End registers
Hrly Plan Sale	Hourly planned sales based on the daily plan entered in LSWM. Calculated using an average percent of sales incremented over the last four weeks of same day sales, multiplied by the sales plan for the day.
Sls Diff	The difference in sales between planned and actual sales for the day. Each time interval displays the following calculation: Sls Diff = Cuml Act Sale – Cuml Plan Sale.

LSCM (06/25)

The Labor Schedule Control File Maintenance (LSCM) is used to maintain the control values with the Labor Scheduling (LS) system. The figures entered in this option will be used when forecasting future sales, estimating lanes and scheduling needs, and door count.

The LSCM is available to Staff Managers and above, as well as Front End profiles. Option LSCM is used to set up dollars (\$) per labor hour, number of registers, and opening and closing hours helping with schedule preparation. LSCM will calculate recommended scheduled hours based on sales plans and sales goals.

Whse Closing Time (HH:MM):		21:00	21:00	21:00	21:00	21:00	18:30	18:30

This option should be changed for holiday hours to reflect early or extended opening and closing hours.

LABOR SCHEDULING

LSWM (7/18)

Option LSWM is used to enter projected sales. This option will update the projected sales in LSDT and directly affects the number of suggested scheduled hours. LSWM is available to GMs, AGMs, FRNs, and ADMs.

LABOR SCHEDULING SALES DETAILS													IND2951
Worksheet

LABOR SCHEDULING

LSDC (1/16)

Option LSDC allows for the entry of door counts throughout the day. This will give supervisors on the FE an accurate representation of how many lanes should be open.

LABOR SCHEDULING SALES FORECASTING						
Door Count Entry						
Whse:	01	SEATTLE				
Date:	12/20/20	MMDDYY				
	Start	End	Actual		Start	Actual

	11:30	- 12:00	220			
	12:00	- 12:30	244			

LSIM (1/16)

Option LSIM allows for the entry of unusual sales impacts (for example large resale cigarette orders, large jewelry purchases, or large returns). Significant impacts should be entered to help with the next year's sales planning process.

SALES IMPACT MAINTENANCE					IND1272		
Whse: 01 SEATTLE					Whse Actual Sales:		687,308

			COUPON	32,893	Y	N	N
			DEPT 11 TOBACCO	178	Y	N	N
			DEPT 35 JEWELRY	3,469	Y	N	N

From this option, F6 will allow sales impacts to be added. A reason and a dollar amount will be required for all manually entered impacts. The date at the top can be changed to view the impacts for the chosen dates. Resale, refunds, kiosk orders, gasoline, jewelry, special events, and coupons are automatically added as impacts without manual intervention.

LABOR SCHEDULING

LSRM (10/23)

Option LSRM - Labor Schedule Rule Maintenance is used to create and maintain dollar limits to be used when calculating forecasted sales dollars and lanes needed. When a rule exists, a dollar limit is placed on a selected department. Member transactions exceeding that dollar limit will be excluded from sales figures when the system forecasts sales dollars and lanes need for future dates.

RULES MAINTENANCE					IND3188
Whse: 1375 SURPRISE			Include Inactive (Y/N): N		
2=Change 4=Delete 5=View History					
Sel	Dept	Minimum \$	Change User	Create Date	
■	25	5,000.00	W01375MGR3	02/18/21	

Note: These sales dollars will still be reflected in all LSDT and LSWT as they are true register sales.

LSSI (10/23)

Option LSSI - Labor Schedule Lane and Shift Coverage is used to view the system forecasted lanes need and lanes scheduled for a specific day and time. These figures can be used to compare the difference between eh forecasted and schedule lanes and help determine where adjustments may be need.

Note: Lanes scheduled is determined by number of Service Clerks scheduled. The system assumes all Service Clerks will be functioning as Cashiers.

Self-Checkout

Before drilling in to a specific location, Self-Checkout statistics may be viewed by entering a "Y" in the Self-Checkout field. This will display Self-Checkout sales, Self-Checkout Average Order, Self-Checkout dollars per sign-on hour, Self-Checkout members per hour, Self-Checkout items per minute and items per member, and the percent of Self-Checkout sales to total sales and transactions to members.

REPORTS

IAFEP (cont.)

F1 Help

Pressing the F1 prompt for help will display a thorough breakdown of each statistic and how they are calculated.

FE SALES: Displays the total front end sales.

FRNT END RENEWALS: Displays the total number of membership renewals completed at the front end.

INACTIVE TIME: Displays the average time between completing the tender and scanning the next member number in hours, minutes, and seconds.

WFBRP (12/20)

WFBRP (Warehouse Front End Block Report) is an AS400 generated report that displays the number of blocked renewals for each cashier ID by total count, accepted on renewals, voids by item number, department 95 ring void, FE signups and member #99 for the specified date range.

Note: This report can only be viewed by printed and is not accessible through the AS400.

REPORTS

OUTQ (4/22)

Use the print outque to manage print jobs. Access the print outque via option OUTQ. Each printer in the warehouse has an assigned outque, though several terminals may spool to the same outque. Most outques, with the exception of the payroll outque and warehouse manager's outque may be accessed from any other outque in the warehouse.

Signs are spooled to a sign outque. Use option SOUTQ to access the sign outque. Unlike document outques, the sign print jobs do not remain in the outque after they are printed. Occasionally, when the main printer is not functioning, document print jobs may be moved to the sign outque. Those jobs will remain in the sign outque until they are deleted.

====>								
F3=Exit		F11=View 2		F12=Cancel		F19=OutQueues		F24=More keys

The name of the queue is in the upper left corner of the screen. Outque names are location based. PRINT110 is the main office printer outque at warehouse 110. Press F19 (Shift+F7) to view other outques.

Some print jobs are spooled from the home office and others are reports requested by warehouse employees. The terminal used to request the report generally determines which outque the report will spool to. An exception to this is the Item Sales Inquiries report which is requested in option ISI. The IND256, Item Sales Inquiry report, prints at the main printer regardless of where it is requested.

Most reports requested at the warehouse print automatically. A few reports run and spool to the outque and must be manually released. A message at the bottom of the AS400 screen stating that the job completed normally indicates that it did not print but is ready to be released. The most recent reports are at the bottom of the outque. Press F18 (Shift+F6) to pass to the bottom of the outque.

Report Information in the outque includes:

- File: the name of the report.
- User: the AS400 sign on of the user that requested the report. WHSEIN110 is a generic sign on for Costco employees only. User Data: the name of the report.
- Status: Print status. HLD Hold, SAV Save.
- Pages: the number of pages.
- Copies: The default number of copies is usually one unless it has been changed by the user.

REPORTS

OUTQ (cont.)

The most common functions used in an outque include:

- Key a 2 to Change: Use this to move a report from one outque to another, to start or stop printing at a given page number, and to change the number of copies being printed.
- Key a 4 to Delete: Delete a report. This cannot be reversed.
- Key a 5 to Display: View the report without printing it.
- Key a 6 to Release: To print a report on the default or a selected printer.

Type choices, press Enter.

Additional Parameters

Output queue . . . . . PRINT110RC   Name, *SAME, *DEV
Library . . . . . QGPL               Name, *LIBL, *CURLIB
  
```

Change the printer by changing or removing the two-letter suffix in the Output queue. The report above will print at the receiving printer, PRINT110RC, if it is not changed. Press Enter then key a 6 in the Opt field to release it. To print on the main office printer, remove the RC from PRINT110 and then release the report. The name of the main report printer is PRINTLOC.

REPORTS

OUTQ (cont.)

With the exception of the private outques for management and payroll, access all outques via any warehouse outque. Press F19 (Shift+F7) to display the list of outques. Key a 5 in the Opt field to select the desired outque. Reports for any listed outque may be manipulated from the AS400 terminal being used.

RDPRT/SPRT (10/24)

To reroute or reset the printer's outqueue, RDPRT can be used. This eliminates the need to contact the Service Desk when a printer issue occurs, reducing downtime.

Rerouting Sign Printer

1. Select option **RDPRT** from the AS400 main menu.
2. Select Source Printer you want to reroute (Printer 1) and place a 1 next to it. Press Enter.
3. Choose the Destination Printer from the list of printers (Printer 2) and place a 1 next to it. Press Enter.
4. Confirm Reroute the "processing" message is displayed on the screen
5. Restart Printer by entering **SPRT** from the AS400 main menu for Printer 1.
6. Test Rerouting by sending a test print to Printer 1 (should now print on Printer 2)

Resetting Sign Printer

1. Select option **RDPRT** from the AS400 main menu.
2. Select Source Printer you want to reset (Printer 1).
3. Choose the Destination Printer by placing a 6 next to the source printer (Printer 1).
4. Restart Printer by entering **SPRT** from the AS400 main menu
5. Test Reset by sending a test print to Printer 1

Note: The reset option only undoes the last rerouting. For multiple reroutes, contact the Service Desk.

ANCILLARY

SECTION 11

ANCILLARY

FCP (2/21)

Option FCP is used to program specific item numbers to the Food Court printer. This printer is used to communicate whole pizza sales to the kitchen. Item numbers no longer in use can be deleted by using **F22**.

The screenshot shows the 'Food Court Printer Maintenance' screen. It contains the following text and annotations:

- Option: FCP** (Annotated with 'Defaults to Home Warehouse')
- Warehouse.....: 1389**
- Item.....: 138167** (Annotated with 'Whole Pizza Item Number')
- Print on Pizza Printer: Y (Y=Yes, N=No)** (Annotated with 'Yes or No to print')
- F1=Help F3=Exit F6=Display F8=Accept F22=Delete** (Annotated with 'Displays all item #s set up in FCP' and 'Finalizes setup')

The annotations are provided in boxes with arrows pointing to the corresponding fields or function keys.

ANCILLARY

CDCSI (2/21)

Option CDCSI (Cost Department Category Sales Inquiry) is used to view and work with cost department margin components by location, department and category. This option is primarily used to view the initial markup percent (IMU) for specific items within each cost department.

Inventory Options (2/21)

Ancillary departments conduct a physical inventory count for their departments on the first day of each fiscal period. Count results are processed through multiple AS400 options. Refer to the [AS400 Options for Fresh Foods Inventory](#) guide located on the Inventory Audit page of Warehouse Operations for specific information.

Note: Option FFI (Fresh Foods Inventory – input counts) can be accessed on an RF scanner using option 63.

RF SCANNER OPTIONS

SECTION 12

RF SCANNER OPTIONS

RF scanners can be used for handheld AS400 sessions and are capable of data entry by use of a keypad as well as a trigger scanner. RF scanners have wireless connectivity to the network and the ability to scan barcodes to populate item detail, which makes it a very efficient tool for on-the-go applications. The following options are the most commonly used:

07- Print Depot Labels (7/21)

Option 07 can be used to free form text onto pallet labels. Entering the printer number (1 for receiving or 2 for RTV), information in one of the fields, and the number of pallet tags to be printed.

In Tran:	4.69	In Tran:	1
RTV:	.00	RTV OH:	0
SELL:	4.69		

13- Item Alpha Inquiry (6/20)

Option 13 is used to display item detail by manually entering an item's description and/or department number. This option has two search fields where alphabetical text can be entered. A minimum of three characters per field is required to process search results.

```

13 Item Alpha Inq.

RF SCANNER OPTIONS

19- Item Group Code Maintenance (5/21)

Item by Group Code Maintenance is used to display and maintain item groups. Enter the appropriate information in the Item Group field or press <F4> to prompt the existing groups. Continue by selecting one of the groups. To add items to the group, the item must be active in the warehouse. Press <F4> and scan or key the item's UPC or item number. Press <F10> to review the item list. To delete an item from the list, place a <4> to the left of the item number and press <ENTER>.

RF SCANNER OPTIONS

88- Item / UPC # Xref (7/21)

Option 88 is used to cross-reference an item number with all associated UPCs. This option is primarily used if an item is not scanning at the register to verify if the UPC is set up. If the UPC is set up, an EPC download may be used to immediately download maintenance on the associated item.

```
ITEM/UPC# XREF
