

Wagyu Beef Tenderloin Steak - Filet Mignon

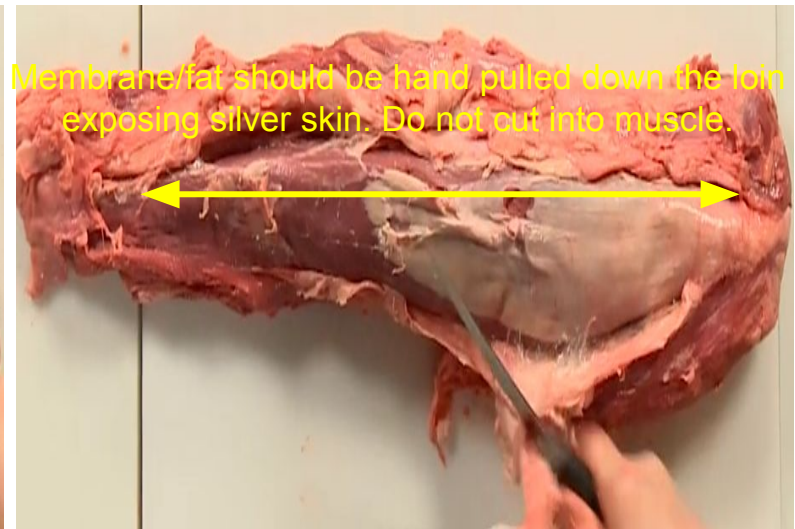

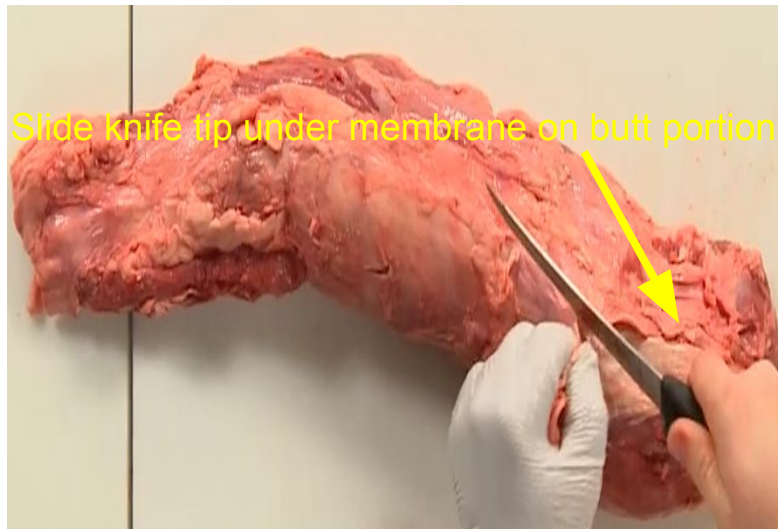

Note: Tenderloin Steaks (Filet Mignon) are cut from both whole tenderloins (PSMOs) and Butt Tenders.

1. Do NOT tenderize.
2. Remove external membrane and fat down to silver skin.
 - a. Membrane/fat should be pulled by hand to remove. Do NOT cut into muscle.
 - b. Be sure to keep side muscle (Psoas Minor) intact and attached to large muscle (Psoas Major).
3. Square Butt portion of loin to expose minimum 2 inch face.
4. Remove external fat and bone felt from bottom of Tenderloin where muscle attached to the bone.
5. Remove fat from between main muscle (Psoas Major) and wing muscle (Iliacus).
6. Cut Tenderloin into 2" steaks.
 - a. Be sure to keep wing muscle intact on 3rd steak.
7. Last steak before tail portion MUST have 2" face. Add tail to trim.
8. Trim the membrane and external fat exposing silver skin on all steaks.
9. Silver skin MUST be removed exposing red meat on first steak of Butt portion.
10. Tray like size steaks together in an **8P tray**. Butt Portion and Center Cut steaks.
11. Wrap and label with a Wagyu sticker.
