GENERAL INFORMATION

SECTION 1

GENERAL INFORMATION

Introduction (3/22)

The Front End team consists of the Front End Manager, supervisors, cashiers, assistants, and on occasion a floater. As a team everyone that works on the front end has the same goals:

- Serve our members (Member Service)
- Keep our employees and members safe and injury free
- Control our inventory
- Maintain security in our warehouses

The following information applies to the US, Puerto Rico and Canada, unless specifically noted.

Front End Management Responsibilities (11/24)

In addition to the general responsibilities of a staff manager, the front end manager is responsible for the entire operation of the front end. This manual outlines the responsibilities of the front end manager, supervisors, cashiers, assistants, and floaters. The front end management team is responsible for the following on a regular basis:

Member Service / Complaints	Employee Annual Reviews
Employee Performance/Development	Opening and Closing Procedures
Breaks and Lunches	Cash, Check, Credit/Debit Slips
Sales/Door Counts (LSWM/LSCM)	Check Approvals
Coupons	Control till (non-cash recycler locations)
Cash Pickups	Front End Training
Door Audits/Cashier Accountability	One to One Ratio
Department Rings	Front End Productivity (IAFEP)
UPC Link Problems	Maintenance of FE Equipment
Emergency Procedures	Self-Checkout
Front End Renewals and Upgrades	RTV Items
Go Backs	HIPAA Certifications
Merchandise Pickup items (MPU)	Emergency Price Changes (EPC)
Hand Held Scanners	Front End Equipment Storage
Procedural Updates	US: Form #8300 -Cash Payments > \$10,000
Unused registers blocked	CN: Cash Purchases of \$10,000 or more of Jewellery
Maintain Opening/Closing Checklists	CN: Suspicious Jewellery Transaction Form
Membership Information	Shopper Assistant Card management
	No \$10.83 or \$65 non-expired upgrades on the Front End

GENERAL INFORMATION

Front End Management Responsibilities (cont.)

The [Front End Manager Responsibilities Checklist](#) was created to assist front end management with their daily, weekly, monthly, quarterly, and yearly tasks. In addition, the following option has been created to add the checklist to Google calendar. Each event on the calendar has links and information for how to complete the task. To add the calendar, use the following link and click accept when prompted: [Front End Checklist for Google Calendar](#)

The front end management staff should control the tempo of the front end. The supervisor should not only manage the front end, but also be an active participant in the entire process. By monitoring and anticipating sales, a balance must be obtained between serving our members, taking care of our employees, controlling payroll, and accomplishing those tasks that are vital to the successful operation of the front end. The function of the supervisor is to ensure the smooth flow of members through the front end in an expedient, courteous, and cost-efficient manner.

The front end management staff has many responsibilities in addition to those related to members and employees. Additional responsibilities of the front end management staff are not limited to, but do include the following:

- Have a thorough understanding of the register system and the interaction of sales and inventory.
- Ensure not only the front end is clean and organized, but also the entire warehouse is clean and safe to shop and to work.
- Monitor front end and member service payroll in addition to monitoring expenses such as supplies and potential liability issues.
- Evaluate employee performance by monitoring some of the following: punctuality, member service, cash handling, and efficiency of work and side tasks.

Adjusting Hourly Sales Distribution for LSDT (5/20)

Instructions can be found in the [AS400 guide](#). For further information see the [Adjusting Hourly Sales Distribution for LSDT](#) job aid.

GENERAL INFORMATION

Employee Development (9/04)

Front end supervisors and managers are responsible for the conduct, training, counseling, and adherence to Costco procedures of all front end personnel. All personnel should be treated fairly, equally, and consistently.

Front End Supervisors:

- Have the responsibility of training all front end personnel and updating personnel on new procedures.
- Work under the direction of the front end manager to schedule personnel in accordance with the Costco Employee Agreement.
- Closely monitor the performance of the front end personnel and communicate to each employee how management perceives their work performance (e.g., as acceptable or unacceptable).
- **US:** Under the guidance of the front end manager, conduct annual front end employee performance reviews.

Breaks and Lunches (12/04)

The issuance of breaks and lunches is a primary function of the front end management staff. It is imperative that all front end management personnel have a complete understanding of both state and federal laws regarding employee rest periods. In addition to state and federal laws, where applicable, front end management must be aware of union agreements and their implications regarding employee rest periods.

Front End Member Service (1/08)

Member Service can be simply defined as the treatment of our members in a fair, courteous, respectful, and expeditious manner. This should be recognized as the standard treatment for Costco members. Supervisors must uphold the member service standards and ensure that warehouse personnel also maintain the highest standard of member service. Front end supervisors must ensure that members' needs and concerns are addressed quickly and professionally. Front end supervisors should ensure that:

- An adequate supply of shopping carts and flatbeds are available at all times.
- There is an adequate supply of boxes for packing merchandise.
- Merchandise is packed so it is not damaged and can be easily managed by the member.
- An adequate number of cash registers are staffed at all times to accommodate our members.
- Members are provided with a clean and safe environment for shopping.
- Ringing errors and voids are handled expeditiously.
- All employees have their Costco name badge attached on the upper part of their shirt.

MEMBERSHIP INFORMATION

SECTION 2

MEMBERSHIP INFORMATION

Memberships (1/25)

Costco offers two types of memberships: Business and Gold Star. Business members will have the business and individual's name on the back. A Gold Star membership only has the individual's name on the back. Each type of membership has unique qualifying criteria. Either membership type can have Executive status. Executive membership is an upgraded level of membership for which the member pays an increased membership fee and has access to a suite of personal and business services at substantial savings.

Temporary Membership cards can be printed by the membership department. After being used on the register, cashiers should destroy temporary membership cards.

Further Membership information is available from the [Membership Manual](#).

Return Policy (8/24)

Costco's return policy has an unconditional double guarantee: "On Membership: We will refund your membership in full at any time if you are dissatisfied." "On Merchandise: We guarantee your satisfaction on every product we sell with a full refund." "Exceptions: Costco will accept returns within 90 days from the date the member receives select electronics and appliances. Gift cards, tickets and precious metals are nonrefundable. Please visit Costco.com or Costco.ca or the membership counter for details on current exceptions."

Costco offers the [Costco Technical & Warranty Services](#) (CTWS) provides free technical assistance and warranty information to members for certain D24 items. The CTWS hotline is (866) 861-0450. In Canada the toll-free number is (866) 231-9731. Technical support for cellular phones will continue to be provided by the service provider.

Costco also extends the manufacturer's warranty certain D24 items to 2 years from the date of purchase.

If electronic merchandise is purchased, the Electronics Return Policy information prints below the members merchandise receipt.

Further information is also available in the [Refund Cashier manual](#).

MEMBERSHIP INFORMATION

Membership Register Blocks (2/25)

A number of codes are established in the membership and register system so information concerning memberships will be available to Front End registers when they are processing orders. A “No Shop” - hard block will be applied beginning the 1st day of the month for expired memberships the first time the primary and the primary’s domestic shop on an expired membership. Any add-ons and add-on’s household member will receive a “Membership Expired” - soft block the first day the member shops on an expired membership. If the membership is not renewed the add-ons and add-on’s household member will receive a “No Shop” – hard block on subsequent shops.

Blocks	Action/Description
Block 6	NSF payment required. Look up in the AS400 in option NSQ
Frequent Shops	Override to continue transaction. Block occurs at tender time for the third check on the same membership in a day or sixth in 5 days
Must Sign Up / Inactive	Void Transaction. Membership number no longer active. Retain card. Refer member to membership desk
Old Card	Override required. New account number on file. Retain old card and take member to membership desk for new card
Renewal Due	Override to continue transaction. Membership fee will print as a reminder on the bottom of the receipt if membership not renewed
Must Renew	Either the renewal needs to be paid, or do a Void Transaction
Supply Card	Override to continue transaction
Invalid Resale	Cashier clearable. Invalid information on file. Membership needs to be updated with correct resale information
Administrative	Override to continue transaction. Verify in GMP under the alerts section on the member and person overview
No Checks	No checks. If check tender key is pressed, supervisor override required
Code A	Cashier clearable. Checks are pre-approved for amounts up to \$10,000
Code B	Cashier clearable. Checks are pre-approved for amounts up to \$5,000
Code C	Cashier clearable. Checks are pre-approved for amounts up to \$2,000
Verify Address	Cashier clearable. Advise member their address needs to be verified in order for the block to be removed
Executive Upgrade	Cashier clearable. The message, “ Exec Upgrade? ” will display once for the primary and domestic cards only, if the upgrade is worthwhile based on a number of factors
2% Reward Owed	Override to continue transaction. For members whose 2% reward was returned due to a bad address. The member must be directed to membership.

MEMBERSHIP INFORMATION

Early Renewals (8/21)

A member may choose to renew or upgrade earlier than their expiration date. To renew or upgrade a member earlier than the expiration date, use the following steps:

- Use item #31 for Gold Star or #67 for Business Members or any Executive level renewal for the entire renewal fee
- Use #231590 to upgrade Gold Star or Business memberships

After the renewal or upgrade is paid for on the front end, the membership will automatically be updated in the Membership system.

Note: Before accepting an early renewal, the cashier should verify the member does not have a credit card on file for auto-renewal.

Front End Upgrades (8/21)

Periodically Marketing runs a promotion known as E-Blocks where members are prompted at the register with an invitation to upgrade their membership to the Executive level. Members may elect to upgrade their membership at any time and usually the upgrade fee can be collected on the Front End. Item #231590 is set up to prompt for price specifically for upgrades on the Front End. This item number is used to collect the upgrade fee and will also upgrade the membership in the membership system.

Determining the Upgrade Fee

Upgrade fees are prorated depending on the months remaining before the membership expires. When a member requests to pay for their upgrade on the Front End, the prorated fee can be determined using the following steps:

- On an RF scanner, enter option 75 (MFF if using AS400 option MBA9)
- Scan/Enter membership number
- Once shopping history is displayed, press **<ENTER>**
- Membership fee forecast (prorated upgrade fee) will display
 - If using MBA9, select **<N>** for Renewal Fee and **<Y>** for Executive Fee

Processing Front End Upgrades

Typically, Front End upgrades occur between \$15 and \$60. If the prorated upgrade fee displays as \$10.83 or \$65, the membership is either too close to the expiration date to accept an upgrade without a renewal, already expired or recently renewed/activated. The chart below breaks down best practices when these scenarios arise:

MEMBERSHIP INFORMATION

Front End Upgrades (cont.)

Upgrade Fee	Membership	Process FE Upgrade?	Required Action
\$10.83	Up to three months (61-90 days) before expiration date	No	Process renewal and upgrade in the membership system
\$65	Up to two months (0-60 days) before expiration date <i>or</i> recently renewed/activated	No	Process upgrade (with renewal if required) in the membership system
\$65	Expired	Yes	Accept renewal, then see steps below
\$16.25- \$59.58	Active	Yes	Process the upgrade using the steps below

Processing the Upgrade Fee

- Determine the prorated upgrade fee
- Key item #231590 on the keypad, \$ Amount, <ENTER>
- <TOTAL>, tender transaction
- Membership system will update in the overnight process

Note: A membership needs to be upgraded the same day the “Exec Upgrade?” invitation appears to qualify as a captured block percentage. The register number, time, cashier, and location do not impact the capture rate. Only the date matching the capture of the upgrade affects the warehouse capture percentage.

Option IMIN and International Memberships (10/24)

Option IMIN is an inquiry-only option that allows US and Canadian warehouses to look up the current membership status of Costco members from certain international countries. To ring a member with an international membership use <7>, </> and scan the membership card. Memberships that are expired or inactive must be renewed in the country of origin.

International Validation Block (03/26)

Membership status for members from Spain, France, Mainland China and Sweden is unavailable due to system or legal limitations and will always appear as active on the Front End. To assist with validation, a cashier clearable block displaying **[E056 INTL-VERIFY ID]** will appear for members from these countries. When the message appears, the cashier should ask for picture identification to ensure the membership card matches the person presenting it and the card is valid. If the picture or name on the membership card does not match the person, the transaction should be voided. To assist in validation, the [Membership Cards and Credit Cards by Country](#) document can be referenced.

Note: A supervisor override will be required at self-checkout to proceed with the transaction.

MEMBERSHIP INFORMATION

Non-Member Purchases (3/24)

Costco policy regarding non-member purchases is to provide a subtotal on the receipt and take full payment from the member. Guests are not allowed to pay, except if paying by shop card.

Costco will not take payment from the non-member; including cash, check, debit, credit or EBT. Non-members can use shop cards as a method of payment, for more information, see [Use of Costco Shop Cards by Non-Members](#). There are limited exceptions to this policy:

Pharmacy

Laws in both the US and Canada require Costco to sell prescription drugs to non-members. In order to provide complete pharmacy services, the sale of over-the-counter (OTC) medicines, including pseudoephedrine, to a non-member pharmacy customer should also be allowed. These OTC sales should be limited to department 93 items. Purchases for non-members must be completed only at the Pharmacy department. Non-members purchasing prescriptions and OTC medicines may not use checks.

To allow non-members to shop, a generic membership card should be created and retained in a secure location in the pharmacy. The steps for creating a generic membership card are outlined in the [Non-Member Membership Cards – Ancillary Cards](#) job aid.

Independent Doctors of Optometry

Locations with an Independent Doctor of Optometry must allow all non-members to see the doctor. With the exception of certain insurance holders in the US (see the below section), a membership is required to make any Optical (department 94) purchases.

Optical and Hearing Aid Centers - US

Non-members who use Costco Health Solutions through Navitus insurance are able to make purchases at both Optical and Hearing Aid. Non-members should be allowed to enter the warehouse should they state they are visiting either of these departments. More information can be found in the [Non-Member Costco Health Solutions \(CHS\) Clients Purchasing at Optical and Hearing Aid](#) memo.

Liquor – US

The majority of states do not require Costco to sell liquor to non-members; however, individual state licensing requirements may require that Costco allow non-members to purchase alcohol. Refer to the [Legal site](#) on Costco's Intranet for current information regarding your location. Where required by law, non-members should be allowed to purchase alcohol; however, may not use checks as payment.

In locations where alcohol is sold through the Front End, membership 99 should be used. In locations where alcohol is sold in a separate location such as an outside liquor pod a generic membership card should be created and kept in a secure location for the sole purpose of scanning each time a non-member requests to make a purchase.

Follow the steps for creating a generic membership card in the [Non-Member Membership Cards – Ancillary Cards](#) job aid. Non-member Liquor should be added as a "member" on the Pharmacy Non-member membership.

REGISTER FUNCTIONS

SECTION 3

REGISTER FUNCTIONS

Introduction

The Register Functions section is meant to show the basic keystrokes to perform everyday operations on the register. This section will begin with an overview of scanning operations both on the hand-held scanner and table top scanner, and will end with keystroke functions to perform specialized tasks on the register. For information in processing tenders, please see the Tender Types Section of this manual.

Processing an Order (10/25)

To start a Business or Gold Star order on the register, simply scan the membership card. In order to start other membership types, it is necessary to key 1/ for trial memberships, 3/ for supply orders, and 7/ for international members before scanning the card. If the membership card doesn't scan with either the tabletop or hand-held scanner, manually key in the membership number. Membership number 99 may be used for a non-member, a supervisor override will be required to proceed.

Note: Only approved QR codes (e.g., Digital Membership Cards, Instacart/Uber shopper memberships, etc.) should be scanned from a wireless device.

Each team will consist of one cashier and an assistant. The cashier scans the merchandise and the assistant packs the merchandise in boxes and into the member's cart or flatbed. Assistants help members unload their merchandise onto the conveyor belt, ask for their membership card, and place it on the cashier's keyboard face up. Assistants can ask the member how they are going to pay for purchases and if they found everything okay.

- Large or heavy items that are difficult to lift will not be unloaded by the member or placed on the conveyor belt.
- Large items remaining in the cart or flatbed must be shifted, tipped or repositioned to ensure that there is no concealed or missed merchandise under or around the item. Barcodes should be positioned for easy scanning.
- The member's cart may not be pulled past the register until all items remaining in the cart have been scanned.
- The cashier and assistant must verbally confirm the number of items left in the cart or on the flatbed after scanning. Once confirmed, the cashier should scan all remaining items on the belt.

In the event there is no merchandise to box, the assistant should:

- Assist members loading their merchandise onto the conveyor belt.
- Look ahead, be proactive, have boxes available and flatbeds when needed.
- Keep area neat, clean, and free of hazards and go-backs.
- Check with the supervisor for a side task that may need to be done.

REGISTER FUNCTIONS

Register Numbers (11/22)

Front End	1 - 50
Adjustment	51 - 54
Tobacco	61 - 64
Optical	71 - 74
Hearing Aid	79
Pharmacy	91 - 94
Tire Center	95 - 98
Liquor	99 - 104
Refunds	121 - 130
Marketing	151 - 159
Membership	191 - 199
Self Checkout	201 - 212
Full Screen Adj.	226 - 230
Food Court Kiosk	231 - 240
Food Court	501 - 508
Control	800

Scanning Overview (01/25)

All items left in the basket should be scanned with the handheld scanner to begin the transaction. Utilize the power slide technique for items on the conveyer belt. Fragile items such as eggs, chips, bread, and light bulbs should be placed on the side of the take away to prevent damage.

Conveyor Belt

Let the belt move the items to the cashier. Wave your hand next to the electric eye to activate the belt. If the belt is not operating, check the switch located on the side of the check stand is turned on. The conveyor belt should be fully loaded for efficient packing organization and avoid any empty space between orders.

Power Slide

The power slide is the single most efficient way to process orders. Do not reach for items on the belt. The conveyer belt will bring the items to the cashier. Do not search for the bar code on the item to scan. The cashier's eyes should be focused on the display screen and the member, not looking at the item.

- Grasp the item with one hand and slide it across the tabletop scanner.
- Avoid twisting the wrist.
- Switch hands when sliding the item across the scanner and continue moving the item.
- Gently but firmly push the item so it slides to the end of the rear take away area.
- Repeat this process for all items to be scanned.

REGISTER FUNCTIONS

Scanning Overview (cont.)

Transferable / Invisible Line

This imaginary line crosses between the two check stands and is used to separate the un-scanned (unpaid) and scanned (paid) merchandise. This is a procedure for both the cashier and assistant to follow. The member's cart stops at the line. Merchandise is unpacked onto the conveyor belt. Any items left behind must first be scanned in the basket before it crosses the line. If the cart is empty it should stay on the line until the assistant needs it to set up for the next order. Then the assistant can pull the empty cart through, and pack the next order into it.

Note: Baskets should be placed between closed registers to prevent merchandise from crossing the point of sale line without employee involvement. This applies to both paid and unpaid merchandise.

Utilizing Bottom of Basket (B.O.B.) Barcode

- A B.O.B barcode should be laminated and placed at every register.
- Cashier will scan the B.O.B. UPC at the beginning of every order.
- Cashiers will then scan each item on the bottom of the basket.
- Cashier will scan the same UPC after the completion of the B.O.B. items.
- The register screen displays the bottom of basket item count when B.O.B. is ended.
- [B.O.B. Barcodes](#)

Sign On/Sign Off/No Sale Functions (3/06)

Sign onto Register

- Key in your operator number
- Press the </> key
- Key in your password number
- **<SIGN ON/OFF>**
- Register will display, "Enter Member Number"

Sign Off Register Cashiers should sign off anytime they leave the register.

- **<SIGN ON/OFF>**, Wait for the "Repeat Sign On/Off key or Press Clear" message
- **<SIGN ON/OFF>**, The register display will read, "-----CLOSED-----"

Terminal Secure

Terminal secure should be avoided whenever possible, it is typically used in the event of a PIN pad freeze. Cashiers should terminal secure their register in this event before attempting any other fixes on the register.

- **<NO SALE>**, **<SIGN ON/OFF>**
- Register display will read, "***TERMINAL SECURED**"

Unlock Terminal Secure

- Key in your password, **<SIGN ON/OFF>**
- Register display will read, "THANK YOU PLEASE COME AGAIN"

Note: Register will cycle up to "*TERMINAL SECURED**", if there is no keyboard activity for 90 seconds.**

REGISTER FUNCTIONS

Sign On/Sign Off/No Sale Functions (cont.)

Open Cash Drawer:

- **<NO SALE>**, **<ENTER>**, cash drawer will open but no receipt will print

Password Changed or Expired (6/16)

If a cashier's password was changed on the controller or if their password is expired the following steps should be used after signing onto the register using the old password:

- Register displays, "Password Expired Enter New Password"
- Key in new password, 3 to 8 numbers, cannot start with Zero, **<ENTER>**
- "Verify New Password by Re-entering it", re-key in password, **<ENTER>**
- Register displays, "B070 New Password Accepted", **<CLEAR>**
- New password is valid for 90 days and cannot match the previous 5 passwords

Multiple Quantities (8/03)

Enter multiple quantities using the **<ENTER>** key

- Scan the item
- **<ENTER>** for each additional quantity
- Verify the quantity that displays on the cashier's screen

It is also possible to enter multiple quantities using the **<QTY>** key on the register

- Enter the quantity, **<QTY>**
- Scan or enter item

Print Subtotal (8/02)

To obtain a subtotal, press **<TOTAL>** key. The subtotal will show on both register display screens. The total will include any applicable tax. To print the subtotal on the receipt, follow these steps:

- **<TOTAL>**, **<0>**, **<CASH>** (Total will print with tax, if applicable)

Print Item Count (11/18)

Accumulated item count prints onto receipt tape and displays on the cashier's screen. Item count is used for cigarette counts and other quantity verifications.

- **<3>**, **</>**, **<TOTAL>**
- The number of items sold will display and print on the receipt.

REGISTER FUNCTIONS

Tender Cashing (12/24)

Cash Check

- Sign on
- <1>, <SIGN ON/OFF>
- Scan membership #, key \$ amount
- <CHECK>
- Checks over \$30 will require an override
- Insert check to print, change due to member

Cash Executive 2% Reward

- Sign on
- <1>, <SIGN ON/OFF>
- Scan membership #
- <6>, </>, <MISC TENDER>
- Scan or key barcode
- <ENTER>
- Insert certificate to print, change due to member

Cash Citi Reward (US)

- Sign on
- <1>, <SIGN ON/OFF>
- Scan membership #
- Scan reward or <9>, </>, <MISC TENDER>
- Key entire bar code, <ENTER>
- Change due to member

Cash CIBC Reward (CN)

- Sign on
- <1>, <SIGN ON/OFF>
- Scan membership #
- Scan reward or <7>, </>, <MISC TENDER>
- Key entire bar code, <ENTER>
- Change due to member

REGISTER FUNCTIONS

Verify Price and Linked Item Record (12/24)

- Sign on
- <6>, <SIGN ON/OFF>
- Scan or key item(s)
- <TOTAL>, to exit <SIGN ON/OFF> twice

Note: Pressing <ENTER> twice prints item detail.

Price Override (2/25)

All price changes (markdowns) at the register must be processed as a price override in the register system. This results in the appropriate markup or markdown being automatically posted to WDM. Department rings should not be used to process these price changes unless the item is not setup in the register. All price overrides, regardless of sell price, will create item movement.

Process Price Override:

- Key in the dollar amount of the item, <PRICE>
- Enter the item number, <ENTER>
- Supervisor override will be required

Department Rings (8/24)

Occasionally it may be necessary to ring an item up on a register that is not in the warehouse item file or move margin dollars. This is accomplished by performing a department ring. Inventory movement occurs when a department ring is performed with an item number. Margin dollars are moved, without inventory movement, when a department ring is performed using item number zero (0). The front end supervisor keys in the sell price, department number, and the item number of the product, if applicable. A list of department numbers is listed in the [Supervisor Quick Reference Guide](#).

Supervisors can search for the item number by using option IAI in the AS400.

Inventory Movement Department Rings:

- Key in the dollar amount of the item, <PRICE>
- Turn key to override mode
- Enter the item's department, <DEPT>
- Enter the item number, <ENTER>
- Supervisor override will be required

Note: Due to system limitations, quantities greater than 999 are restricted.

Margin Dollar Movement Department Rings:

- Key in the dollar amount of the item, <PRICE>
- Turn key to override mode
- Enter the margin dollar department, <DEPT>
- Enter the item number, zero <0>, <ENTER>
- Supervisor override will be required

REGISTER FUNCTIONS

Tender Exchanges (9/04)

A tender exchange is used to correct a tendering problem that involves cash or checks. For example, a member tells the cashier they will be paying by cash but does not have enough money and will have to go out to their car for their checkbook.

- Cashier will be directed by a supervisor to tender out the order to keep the line moving. The member returns with the check.
- A supervisor or manager will have to sign the cashier off and sign on with their code

Process Tender Exchange

From cash to check:

- Sign on as a supervisor or manager
- <2>, <SIGN ON/OFF>, scan membership card, display will read, Key Tender Correct
- <VOID>, key \$ amount, <CASH>, display will read, Key New Tender or Press Total
- Key \$ amount, <CHECK>, <ENTER>
- Display will read, B049 Insert Document to Slip Print, insert check, <CLEAR>

From check to cash, reverse the steps listed above.

Devaluing Shop Cards (03/26)

Shop cards are non-refundable and are prohibited from being cashed out. Where applicable by law, balances under certain thresholds may be exchanged for cash.

Current state cash out limits are as follows:

State	Cash Out Limit
CA	\$15
CO, CT, HI, MA, ME, MT, NJ, NY, OR, PR, WA	\$5
TX	\$2.50
RI, VT	\$1

If a member would like to redeem a shop card for cash with a balance below the state specific cash out limit, the below sequence should be used:

Physical Shop Card	Digital Shop Card
• Sign on • <1>, <SIGN ON/OFF> • Enter membership number • <CREDIT/DEBIT> • Swipe the shop card	• Sign on • <1>, <SIGN ON/OFF> • Enter membership number • <CREDIT/DEBIT>, <CLEAR>, <CLEAR> • Scan digital barcode • <ENTER>

REGISTER FUNCTIONS

Kiosk Shop Cards (1/10)

Many kiosk items offer a shop card rebate when purchased. If the validity of a shop card issued through a kiosk promotion is questioned, option KOM can be used. Notes in KOM and membership comments will reference the shop card issued to the member.

Purchase/Activate Costco Shop Card (11/19)

- Scan a trigger barcode or enter item #155 and press **<ENTER>**.
- Register will prompt for the dollar amount of the shop card. This can be for any amount between \$25 and \$2,000 in the US and for any amount between \$50 and \$2,000 in Canada. Enter the amount and press **<ENTER>**.
- When prompted for the shop card account number, scan the barcode on the back of the shop card using the table top or hand scanner.
- The shop card is now activated but the shop card must not be given to the member until payment is collected.
- Above steps must be repeated if multiple cards are purchased in one transaction.

Note: Non-activated Costco Shop Cards must be kept in a secure location unavailable to members.

Voiding Activated Shop Cards (12/24)

There are several methods of voiding transactions containing a shop card. It is important that when a shop card is involved extra care must be taken to ensure the card is devalued appropriately. Transactions involving an activation or recharge of a shop card can be voided prior to completion of the transaction using the "Void Transaction" function. If a transaction involving a purchase or recharge has been tendered and completed, the transaction can be voided by performing a "Void Previous".

Note: Shop cards that are activated or have value added must not be given to the member until the tender of the transaction has been completed and approved. Doing so may result in unpaid for shop cards leaving the building and may result in cash shortages for the warehouse and loss for the company.

Void Transactions

If a transaction that includes the activation of a shop card is to be voided as a "Void Transaction", any shop cards that were activated as part of the transaction must be voided out before the "Void Transaction" can be performed. The cards must be voided by pressing the void key, keying item #155, entering the value added to the shop card, then scanning the barcode on the back of the card.

Adjustment

Shop cards cannot be voided using the adjustment key. If a transaction including an activation of a shop card is to be voided in adjustment mode, only non-shop card items can be processed and the shop cards must be tendered in a separate transaction. Since these cards were active and then tendered, they must be thrown away.

Note: Shop cards should not be re-used once funds are depleted.

REGISTER FUNCTIONS

Voiding Tendered Shop Card (11/22)

If a shop card is used as a payment towards a transaction but the transaction is not completely tendered, the shop card payment can be reversed by pressing **<VOID>**, **<CREDIT/DEBIT>**. This will return the funds to the shop card which should then be returned to the member.

Note: At self checkout (SCO), if the member does not have another valid payment option, the entire transaction must be voided. Voiding the SCO transaction will return the value to the shop card.

Verifying Shop Card Balance (12/20)

Shop cards balances may be verified on Costco.com or using the following sequence on any register:

- **<21>**, **<SIGN ON/OFF>**
- Swipe shop card on PIN pad or manually enter number on register keyboard
- Chit displaying balance will print

Pre-Paid Cards (04/26)

The warehouse has two types of pre-paid cards: Point Of Sale Activated (POSA) cards are activated at the register at time of purchase. Pre-paid cards arrive at the warehouse preloaded and are available for pick up in MPU. Some POSA and pre-paid cards are non-refundable.

POSA card(s) (TopGolf, Google Play, Windows) are purchased and activated through the register by scanning the barcode on the unit.

- Scan Pre-paid card barcode
- **<TOTAL>**
- Tender transaction
- Member's receipt will print

The item number on Pre-paid card cannot be manually keyed into the front end register system. Cards must be scanned in order to be activated.

Declined Pre-Paid Cards

If the communication link for Pre-paid cards is offline it will not be possible to sell or activate pre-paid cards. Alarms will sound on the **CC** and **DD** controllers. A supervisor/ manager should be notified so proper procedures can be followed to restore communication.

If any activation is declined in a transaction a message will appear on the cashier's display:

- "PRESS CLEAR TO PRINT MESSAGES"
- **<CLEAR>**, **<OVERRIDE>**, **<ENTER>**
- REMOVE INACTIVE CARDS

The pre-paid card will be automatically voided from the transaction when a card's activation is declined.

REGISTER FUNCTIONS

Activation of Pre-Paid Cards (cont.)

Voiding Pre-Paid Cards

A pre-paid card can only be voided the same day it was activated by performing a void previous. Void previous will also void all other items included in the original transaction with the activated pre-paid card. If member still intends to purchase the other items, they must be re-rung.

Merchandise Pickup Slips (1/24)

For security reasons, some merchandise must be kept in a locked area called Merchandise Pickup (MPU). Members wishing to purchase this merchandise may present a Merchandise Pickup Slip (Form [#MR04](#)), empty box/display card or a take-a-ticket slip to the cashier. When an MPU slip is presented the cashier must verify the following: item number, description, quantity, and price. The completed slip should be processed early in the transaction to allow the supervisor time to retrieve the item(s) and return to the check stand, verify the merchandise with the member and initial the receipt. The MPU slip may be slip printed following the steps below.

Processing Merchandise Pickup Slip

- **<SLIP PRINT>**, display will read, "SLIP PRINT ON"
- Verify quantity; if quantity is used, key in quantity #, **<QTY>**
- Key item number to be slip printed, **<ENTER>**
- To turn off the slip printer, press **<SLIP PRINT>**
- Display will read, "SLIP PRINT OFF", **<CLEAR>**
- "INSERT DOCUMENT TO SLIP PRINT"
- Insert document, **<CLEAR>**
- The cashier should call for the supervisor to collect the slip and retrieve the merchandise from the MPU cage for the member

Note: One item number per merchandise pickup slip.

Pre-scan (12/25)

Pre-scan gives warehouses the ability to pre-scan selected orders on the front end, typically 15 items or less, improving front end productivity and enhancing member service. Pre-scanning is processed as the member is waiting in line and before they reach the cashier. When scanning an order, merchandise should be transferred from one side of the cart to the other or be boxed to show that all merchandise is scanned. The message "Pre-Scan Order Exists" will prompt on the register screen. When the cashier presses enter, the order will automatically generate, and the transaction can be completed.

Accessing Pre-scan

- Select the "POS-Mobile" icon on the RF home screen
- Select "Pre-Scan"
- Enter Operator ID, click Continue
- Scan/Enter membership #

More information can be found in the [Pre-Scan Job Aid](#).

REGISTER FUNCTIONS

Pre-scan (cont.)

Processing Pre-scanned Transactions at Register

- Scan Membership #, register will display [PRE-SCAN ORDER AVAILABLE, <ENTER> or <CLEAR>]
- **<CLEAR>** skips the pre-scanned order, **<ENTER>** will retrieve the order.
 - If accepted, there may be a delay while the order is retrieved. Do not press enter multiple times, doing so will add multiple quantities of the last item pre-scanned.
- If clear is pressed, a Void Transaction can be performed and the membership card can be re-scanned to activate the pre-scanned order.
- **<TOTAL>**, tender order.
- If multiple orders are pre-scanned press **<ENTER>** to retrieve the last pre-scanned order, repeat as necessary.

Note: It is the responsibility of the cashier to ensure that all pre-scanned items are accounted for before tendering the transaction.

THIRD PARTY GROCERY DELIVERY

SECTION 4

THIRD PARTY GROCERY DELIVERY

Introduction (9/21)

Costco currently utilizes two primary delivery services: Instacart and Uber. While Instacart is available throughout US and Canada, Uber is currently available in select states and provinces in US and Canada.

All third-party shoppers are independent contractors and should be treated in the same manner as any other member or guest.

Instacart and Uber (9/25)

Instacart and Uber shoppers will, on average, pick 1 to 3 orders before proceeding to the front end to purchase the items. Upon arriving at a front end register, shoppers will identify themselves by showing their shopper app to alert the cashier to the presence of orders. For member orders, the shopper will present a digital copy of the member's membership card to be scanned from the shopper's mobile device, allowing Executive members to earn 2% rewards on eligible items. For non-member orders, the shopper will provide a digital copy of a zone membership card meant to be used solely for non-member transactions. An Instacart/Uber debit or credit card will be used as payment for all third-party grocery orders. Each order must be processed as its own transaction. Self Checkout is not permitted to be used by shoppers to process orders.

Note: Third Party Shoppers are not permitted to make personal purchases with the non-member membership.

While Instacart offers alcohol and pharmacy purchases (in states where applicable), neither are offered via Uber.

For escalation issues or warehouse support see the [Instacart Directory](#) or [Uber Information](#) job aids.

Instacart Alcohol – (US) (8/24)

Items containing alcohol are available for delivery via Instacart on Costco.com to both members and non-members that reside in select states. Identification must be checked for all Instacart shoppers appearing under the age of forty purchasing alcohol. Identification will be verified at the time of delivery by the Instacart shopper. Specific guidelines for states that require stickers to be placed on items containing alcohol can be found below:

Note: The following states are legally required to sticker alcohol items being delivered through Instacart: Arizona, Kentucky and Illinois.

For alcohol state regulation questions refer to the [Legal site](#).

THIRD PARTY GROCERY DELIVERY

Instacart Pharmacy (Rx) – (US) (6/20)

Prescriptions are available to be delivered via Instacart throughout the US. For specific questions, see the [Pharmacy](#) page or email pharmacymod@costco.com

Instacart State-specific Marketplace Facilitator (MPF) Laws – (US) (11/24)

In Marketplace Facilitator states or states that accept EBT through Instacart the QR code must be presented to initiate the transaction. Instacart transactions will automatically tender as tax exempt when a new QR code membership is scanned from the shopper's mobile device.

For further Instacart questions refer to the [Costco Powered by Instacart and Costco Grocery](#) memo or the [Instacart Tax Update - Select US States](#) memo.

TENDER TYPES

SECTION 5

TENDER TYPES

Introduction

The Tender Types section of this manual will cover all acceptable tender types at Costco. This section will first outline acceptable tenders and will then outline some unacceptable tenders. This section will follow a general layout: introduction to each type of payment, instructions how to process this payment, and then any miscellaneous information on the unique situations that may arise with each type of tender.

Acceptable Tenders (08/25)

- [Cash](#)
- [Checks](#) - made out to Costco
- Costco Shop Cards / Costco Cash Cards
- [Visa Credit Cards](#) (US), [MasterCard](#) (CN)
- Costco Co-branded Credit Cards / [Instant Credit](#)
- [Debit Cards](#)
- [EBT Cards](#) (US only)
- [Costco Wallet](#)
- [Citi Reward Certificate](#) (US), [CIBC Rebate Certificate](#) (CN)
- Executive Member 2% Reward Certificate
- Visa Gift Cards (US), MasterCard Gift Cards (CN)
- Travelers Checks (Local Currency)
- Foreign Currency (specified locations - Canadian or US currency)
- Bank money orders and cashier's checks
- Manufacturer's checks made out to Costco
- Flexible Spending Account (FSA)
- MedFlex (Filtered Spend) debit Mastercard and Visa Cards in the US

TENDER TYPES

Debit (11/20)

Members can tap, insert, or swipe their debit card. Because debit transactions require the entry of a PIN by the member, identification does not need to be verified for the payment.

Note: If an item needs to be voided after a partial debit, credit, EBT, or shop card payment, the partial payment must be reversed first by pressing <VOID>, <CREDIT/DEBIT>.

Tender Debit – US:

- Scan membership card
- Member can tap, insert, or swipe debit card and enter PIN any time after the membership card is scanned
- **<TOTAL>**
- EFT Total displays
- Cashier presses **<CREDIT/DEBIT>**
- “PROCESSING REQUEST, and APPROVED”, will display on the PIN pad

If there is a problem processing a Debit Card, the following are possible reasons:

- When communication is offline, no debit transactions will process.
- Possible problem at the member’s bank, request an alternate form of payment.

Tendering Debit – CN:

- Scan Membership card
- Scan order
- **<TOTAL>**
- Cashier must ask the member if they would like cash back
- If cash is requested, the cashier must press **<NO SALE>**, then key in the dollar amount requested, **<CREDIT/DEBIT>**

Note: Debit cards have a maximum cash back limit of \$100 in Canada.

- If no cash is requested, **<CREDIT/DEBIT>**
- Tap, insert, or swipe debit card
- Purchase \$X.XX OK?
- Member will press **<OK>**
- Select Account
- Key in PIN, press **<OK>**
- “PROCESSING PLEASE WAIT”, then “APPROVED” will display on PIN pad and receipt will print
- If cash back was requested, “TENDER AMOUNT CHANGED BY MEMBER” will display, press **<CLEAR>**, and “CHANGE DUE” will display
- Cashier initials receipt for cash back amount given to member

Cheq	Sav
------	-----

TENDER TYPES

International Debit Cards - (US) (12/16)

Many international debit cards are designated as “Debit – no PIN”. When processing these cards, the member should be instructed to bypass PIN entry by pressing **<OK>** on the PIN pad when prompted for a PIN. If a PIN is entered for these cards the payment will be declined.

Credit Cards (11/18)

Tendering Credit Cards:

- **<TOTAL>**
- Press **<CREDIT/DEBIT>** to tender the order for the entire amount
OR
- Key \$ amount and press **<CREDIT/DEBIT>** to tender for a partial amount

Credit Cards - (US) (12/25)

Visa and Co-branded Costco credit cards are the only credit cards accepted at US warehouses. PIN pads in the US are capable of accepting contactless and chip enabled credit cards and credit cards that must be swiped. Unless fraudulent activity is suspected upon tendering a credit card, identification should not be verified. This verification process aligns with Costco's agreement with Visa in which management may ask for ID in the event of suspected fraud. Most use cases of normal credit card processing should not require the involvement of management. If a member requests a receipt for their records, a small duplicated receipt can be generated by keying: **<16>**, **<SIGN ON>**.

Note: Payment cards should never be placed on or near the PIN pad to avoid unintentionally charging a member's tap enabled credit card.

Credit Cards - (CN) (3/22)

In Canada, the only credit cards accepted at Costco warehouses is MasterCard and any Co-branded Costco credit card. PIN pads in Canada are capable of accepting cards with an embedded chip. These cards are inserted into the PIN pad instead of being swiped through the card reader. All Chip and PIN credit cards have an associated PIN. Once the membership card has been scanned, the PIN is sufficient for identification purposes for payment. No other information needs to be verified on the card.

If the card only has the magnetic strip and no embedded chip, additional verification is required. The cashier must:

- Verify that the name on the credit card is the same name that is on the membership card.
- Determine if it is visibly altered or mutilated. If a card is altered or mutilated a supervisor or manager should be notified immediately.
- Verify the last four digits of the credit card number on the front of the card match the last four digits of the credit card number printed on the member's receipt after the transaction has been tendered.

Note: Members will be required to enter a PIN and provide a signature the first time a new CIBC Costco MasterCard is used.

TENDER TYPES

Temporary Credit Cards (11/24)

Temporary credit cards are tokenized and are not the actual member's credit card number. These temporary credit cards are printed from the membership system and do not have the member's full limit available. Members must present a valid, government issued photo identification any time instant credit is used as payment. To process instant credit, use the following key sequence:

- **<TOTAL>**, **<IC>**, **<IC>** for total order or \$ amount **<IC>** for partial tender or **<TOTAL>**, hold **<SHIFT>**, **<IC>** **<IC>** on membership or refunds terminals.
- When prompted to "ENTER ACCOUNT NUMBER", scan or manually enter the temporary credit card number on the register keyboard, not the PIN pad.

Note: Temporary Credit cards cannot be used at Self Checkout or on the standalone.

EMV Contactless Payments (7/25)

As an EMV enabled retailer, Costco is exposed to minimal liability in cases of chargebacks. However, if a card is manually keyed, Costco is fully liable if a member disputes the charge. If both the chip and magnetic stripe fail, the card should never be manually keyed. Though there are legitimate reasons a card may be manually keyed (such as fax and pull orders where a copy of the credit card is kept on file), it should be avoided in almost all other situations. If a card is kept on file, all procedures in the [Credit Card Security Memo](#) must be followed.

EMV Contactless Payments (Tap Policy)- (CN) (04/26)

In Canada, limits may be set on contactless (tap) payments. These limits are not controlled by Costco and are instead implemented by the card provider. Costco assumes chargeback liability when limits are bypassed by allowing multiple taps within a single transaction. Similar to checks or other tenders that carries a risk, warehouse management can decided whether multiple taps are allowed at a given location. Payment cards should never be placed on or near the PIN pad to avoid unintentionally charging a member's tap enabled credit card when scanning the next membership card.

Note: Inserting the credit card will bypass the card provider's tap limits. Unique circumstances may require a member to insert their card even if it does not exceed the above limits.

TENDER TYPES

Digital Membership Card (4/24)

Digital Membership Cards (DMC) will allow members to access their membership card on a mobile device via the Costco App. DMC will serve as a member's membership card to gain entrance to the warehouse and as the membership to start a transaction on the register. Cashiers should scan the digital membership card with the hand scanner and must not handle the member's phone. The tabletop scanners and the back scanner at Self Checkout are enabled to accept digital membership cards. Membership types will be representative by color.

- Yellow - Gold Star Membership
- Red - Business Member
- Black - Executive Member
- Blue - Costco Wholesale Employee

If a DMC is invalid, the following message will display and a supervisor/manager override will be required: **E070 INVALID DIG CARD**

Costco Wallet - (US) (12/25)

Members have the option to link their cobranded Costco Anywhere Visa® Card by Citi to their Costco Wallet as well as a physical Costco Shop Card. The Costco Wallet may be used towards purchases at warehouses, gas stations, and Costco.com.

The DMC QR code must be scanned at the start of the transaction for the Costco Wallet tender to be available. Costco Wallet will allow members to auto-apply wallet shop cards and/or Costco Citi Visa without a PIN pad prompt. If auto-apply is not enabled, the member must select 'Yes' or 'No' on the PIN pad prior to finalizing the transaction. Costco Wallet cannot currently be accepted in the Food Court. To process the Costco Wallet, use the following key sequence:

- To indicate the tender is available, "EFT" will display on the register when the cashier presses **<TOTAL>**.
- To tender a transaction using the Costco Wallet, press **<DEBIT / CREDIT>**.
- If the member selects 'No' or cancels the payment on the PIN pad prior to tender and would like to use funds in the wallet, the wallet can be tendered via the steps below:
 - Shop Card: **<CTRL>**, **<STANDALONE>**
 - Citi Visa: **<CTRL>** + **<IC>**, **<IC>**

Register keyboard layouts can be found [here](#). For more information, refer to the [Costco Wallet Acceptance Memo](#).

Note: If the transaction is not initiated via QR code the Costco Wallet will not be available for tender.

TENDER TYPES

Mobile Payments (2/23)

Mobile payments allow EFT payment information to be saved on a cell phone or mobile payment device. The cell phone or mobile payment device is then able to transmit EFT payment information to a register's PIN pad as payment for a transaction instead of physically swiping, inserting, or tapping a physical card. If a virtual card is unable to be loaded onto the member's cell phone or mobile payment device, Costco is under no obligation to accept that form of payment.

When a member is utilizing a mobile payment, cashiers should process the payment using established EFT procedures. However, instead of swiping, inserting, or tapping an EFT card the member will activate their mobile payment and have their cell phone or mobile payment device within close proximity to the chip reader on the PIN pad. The following mobile payment applications are currently accepted:

- **US:** Apple Pay, Samsung Pay, and Loop Pay
- **CN:** Apple Pay, Samsung Pay, and Android Pay

Note: Cashiers should never handle a member's cell phone or mobile payment device.

Cash (2/25)

Tendering Cash

- **<TOTAL>**
- Key in the total cash amount received.
- **<CASH>**
- Change will display.

Penny Rounding (CN)

In Canada, the penny has been eliminated. When members pay by cash for their order, the register will automatically round the change due to the member to the nearest 5 cents. Members may still pay with pennies, though they will not receive change in pennies.

Note: The [Anti-Money Laundering](#) section of this manual must be reviewed before accepting cash transactions over \$10,000.00.

Cash Pickups (1/08)

Cash pickups are done at the register when the cashier leaves the register and needs to drop additional funds, or when the register forces a cash pickup. Please refer to the Daily Register Sheet Section of this manual for further information on when cash pickups are required.

TENDER TYPES

Keying Cash Pickups (1/08)

- <PICKUP>
- <\$ Amount of Pickup>
- <CASH>
- <TOTAL>

Forced Pickups (1/22)

The cash register will warn a cashier with "Pickup Required Soon" when the register reaches \$2,000. The register will lock out with the message, "Pickup Required Now" at \$2,500 in. The register will not be able to be used until a pickup is performed either on the register or cash recycler.

Cash Fund Increases/Loan (2/23)

When increasing a register fund, the cashier should notify a front end supervisor or manager that a cash increase is needed. The **white** copy of the **Cash Fund Increase** ([Form VT01US](#) or [#VT01CN](#)) and currency will be given to the cashier by a supervisor or manager. The cashier should count the amount received. The **Cash Fund Increase** ([Form VT01US](#) or [#VT01CN](#)) must be signed (not initialed) on the white copy after verifying that it is correct. A loan must be keyed into the register and the Cash Fund Increase form should be attached to the Daily Register Sheet.

- <LOAN>, key in the \$ amount, <CASH>, <TOTAL>

Note: Loans should only be keyed into the register if the cash recycler has been bypassed.

Foreign Currency (4/25)

A few warehouses located near an international border or in an area with a high volume of international business have the ability to tender foreign currency through the register system. Acceptance of foreign currency is limited to certain Canadian and US buildings and is only Canadian and US currency.

Tender with Foreign Currency Cash (3/22)

- <TOTAL>, hold <CTRL> and press <TOTAL> twice. This will convert the total to: Canadian currency in US locations or US currency in Canadian locations
- Key in the \$ amount to be tendered.
- <FOREIGN TENDER>
- Change due in local currency.

Note: To access the foreign tender key on Wave and Refund registers, press <SHIFT> + <IC> (US).

TENDER TYPES

Pickup Foreign Currency (5/04)

Immediately after receiving foreign cash, a cash pickup should be performed.

- **<PICKUP>**, **<0>**, **<CASH>**, **<TOTAL>**
- Log the Daily Register Sheet with the dollar amount of the pickup and mark the currency type: US, CN etc.
- Place cash and slip into tube and send to the vault

Counterfeit Currency Detection (6/24)

All cashiers, supervisors, and managers should be alert for possible counterfeit currency. If a member presents what a cashier suspects to be counterfeit currency, a supervisor/manager should be contacted. The supervisor/manager should examine the bill and authenticate the currency.

If the supervisor/manager, after examining the currency, merely suspects that the currency is counterfeit, it should be politely refused and the member told of our suspicion. It should be suggested to the member that he or she contact the United States Secret Service (US) or the R.C.M.P (CN) to determine the authenticity of the currency.

Note: For more information regarding how to authenticate U.S. and Canadian currency, see [Member Service & Loss Prevention](#) site.

Checks (6/03)

- Key in the \$ amount to be tendered from check
- **<CHECK>**
- Display will read, "INSERT DOCUMENT PRESS CLEAR"
- Insert check into slip printer
- **<CLEAR>**

Note: Occasionally a member will request that they may write their check over the amount of the purchase. Cash back limit is \$30.00 without a supervisor override.

Checks Written for Different Amount than Total (1/03)

If a check is written for a different amount than the total for the transaction, the register will warn the cashier, "Tender not for total. Enter/Clear". If the cashier has made an error in keying the check amount, they can hit clear and re-enter the check amount. If the check amount is indeed written for a different amount than the register total, the cashier can hit enter to process the check for the different amount.

Check Writer – (US) (12/15)

Check writer is a register function that allows the cashier to print a member's check (date, pay to the order of field, numeric and written amounts). This is a member service feature that each cashier should offer to the member at the beginning of the order if the member is paying by check.

TENDER TYPES

Check Writer for Total Amount (12/15)

- **<TOTAL>**, **<2>**, **</>**, **<CHECK>**, **<CHECK>**
- Display reads, "INSERT CHECK TO BE PRINTED"
- Bank account numbers face down against the wall of the printer
- **<CLEAR>**
- Once the check has printed, the display will read, "B870 SIGNATURE OK? / [ENTER] TO TENDER"
- Hand check back to member for signature and verification
- Insert check into the slip printer, face up
- **<ENTER>**, to print the check

Check Writer Less Than or Over Total Amount (12/15)

- **<TOTAL>**, **<2>**, **</>**
- Key in the \$ amount of check.
- **<CHECK>**
- Message will display, "TENDER NOT FOR TOTAL, ENTER/CLEAR", **<ENTER>**.
- Display will read, "INSERT CHECK TO BE PRINTED".
- **<CLEAR>** to print
- Message, "B870 SIGNATURE OK? [ENTER] TO TENDER".
- Hand check back to member for signature.

Note: Override is required if cash back is over \$30.00.

Check Pickups (12/20)

Checks must be dropped before a break, lunch, side tasks, or end of a shift whenever the cashier leaves their register for any reason. Do not key in dollar value for checks. Please see the Daily Register Sheet Section of this manual for further information about check pickups.

- **<PICKUP>**, **<CHECK>**, **<TOTAL>**
- Place slip and checks in tube, send to vault

TENDER TYPES

Check Acceptance Guidelines (4/23)

It is the responsibility of cashiers to determine if a member's check can be accepted or requires additional approval by management. The guideline is based on the number of years they have been a member. The starting date is printed on the back of the membership card. If the dollar amount is above the established guidelines, then additional ID is needed and management approval is required.

CHECK ACCEPTANCE GUIDELINE	
0 - 1 year member (all members)	\$300 (US) \$500 (CN)
1 - 5 year Business Member (business checks)	\$1,000
1 + year member (Gold Star and personal checks from Business member)	\$1,000
5 + year member (Business Member/business check)	\$5,000

Note: These are the standard guidelines. When appropriate, individual warehouse managers may establish lower limits based on local check history.

When checks are received above the established guideline for your location the cashier should obtain additional information. The following information taken from a valid State/Province ID or driver's license can be recorded on the front of the check:

- Type of ID (e.g., DL)
- State it was issued from
- Expiration Date (remember expired IDs are NOT valid)

The specific number (such as DL#) should not be recorded.

Note: Because many states have privacy laws relating to the use of Social Security Numbers, these must never be requested or recorded. In Canada, the Social Insurance Number must never be requested.

The membership card, check, receipt and ID are forwarded to a supervisor or manager when approval is required. Request the member wait by their shopping cart pending manager approval. Cashiers should start processing the next member's order.

If approved, management will give the member their receipt, membership card and ID. Management will initial the check for approval and return it to the cashier.

TENDER TYPES

Check Acceptance Guidelines (cont.)

General Information on Check Acceptance

- Verify that the date is correct, if not have the member change and initial it
- Verify that the member's name and address are pre-printed on the check.
- A physical address is preferred; however, a P.O. box may be accepted with management approval.
- Ask for a phone number if it is not printed or written on the check, with area code.
- Checks can be accepted for up to \$30.00 over the transaction total. An override is required if over \$30.00.
- Costco will accept pre-signed checks from wholesale members provided the business name (pre-printed) matches the member's business membership card.
- Business and personal checks should be accepted provided the pre-printed business and/or member's name matches the membership card.

Check Endorsement (12/15)

Costco tracks the check writing history for each member from all warehouses. The member's check writing history for the last 5 days will print on back of the check once it is tendered. On the back of the check the first line will list the number of warehouses at which checks have been written, the number of checks written, and the total dollar amount of checks. The next line will list the warehouse numbers where the checks were written.

Pre-approved Check Codes

These codes are entered into the membership system when a member provides bank information to Costco. Once the information is reviewed and rated, it will be entered and downloaded into the register system. These codes allow cashiers and management to accept the check for a higher dollar amount than the standard listed in the Check Acceptance Guideline table without additional ID and approval.

The cashier clearable code displays on the cashier's screen:

PRE-APPROVED CHECK CODES	
Code	Amount
A	\$10,000
B	\$5,000
C	\$2,000

TENDER TYPES

Check/Receipt Information Line (3/06)

Deposit \$ ***** (dollar amount) ONLY TO
 COSTCO WHOLESALE ACCT # 000000000
 \$***** (amount of order) \$*****.00 (second payment amount)
 MEM# 812393847362 **CODE: #N034**
***005*006*0015000**
***00115*00001*00304*00401*00092**

03/01/08 09:45 0110 01 0245 1

Note: Two Check History lines (*005 and *00115) only print when a member has written checks within the last 5 days.

Code: The Code field consists of one letter and three numbers, which correspond to different blocks that may have been received in the transaction. The most common codes are listed below. Additional codes used for research purposes are less common but possible.

Letter Blocking Code	
A = Immediately	M = Total Time (total key) W/Action required
B = Total Time, when total key is pressed	N = Immediately W/Action required
C = Tender Time, when tender key is pressed	

Numeric Cashier Display Screen Code		
001 = Must Sign Up	020 = Verify Address	036 = Renew Soon
003 = Inactive Member	030 = Renewal Due	037 = Supply Card
005 = Old Card	031 = Block 6	039 = No Checks
010 = Code A	032 = Block 5	040 = NOF – Must Signup
011 = Code B	033 = Invalid Resale	041 = EXP – Must Signup
012 = Code C	034 = Frequent Shops	045 = MBR 99 BLOCK
015 = Invalid Resale	035 = Must Renew	099 = Administration

Check History

***005*006*0015000**
***00115*00001*00304*00401*00092**

First Line:

*005 = Number of warehouses that the member has written at in the last 5 days = 5.
 *006 = Total number of checks written in the last 5 days = 6.
 *0015000 = Full dollar amount, in whole dollars = \$15,000.

TENDER TYPES

Check Receipt Information Lines (cont.)

Second Line:

Warehouse numbers where checks were written:

- *00115 = Lynnwood, WA
- *00001 = Seattle, WA
- *00304 = Brookfield, CT
- *00401 = Morena, CA
- *00092 = Miami Lakes, FL

Note: If the AS400 system is down no blocking information/check history will display.

Information Line:

03/01/08 09:45 0110 01 0245 1

The date, time (military time), warehouse number; register number, ring number and operator number are listed in this order on every receipt.

Frequent Shops Block (3/16)

A "Frequent Shops Call Supervisor" block is applied to a membership upon the third check tender of a day or the sixth check tender in a rolling five days. This block is meant to alert supervisors that more research may be required prior to accepting a check. A supervisor override is required to continue the transaction.

Traveler's Checks (4/16)

When accepting a traveler's check, a supervisor or manager must contact the issuer to verify the check's validity. After verifying the check is valid, the check must be signed in the presence of the cashier. Pre-signed checks must not be accepted.

Tender with Traveler's Checks:

- **<TOTAL>**
- **<3>**, **</>**, Key in the \$ amount of the Traveler's Check, **<CHECK>**.
- Display will read, "INSERT DOCUMENT, PRESS CLEAR".
- Insert Traveler's check into slip printer, **<CLEAR>**.
- For each additional traveler's check, repeat the steps listed above.

Note: If cash back is over \$30.00, an override will be required.

Credit Card Checks (03/26)

Credit card companies occasionally send checks to cardholders to use at merchants that do not accept their credit cards. These checks draw against the available balance on the member's credit card rather than a bank account. Unlike checks written off of a bank account, if a credit card check is returned to the warehouse due to non-sufficient funds (over limit, closed account, etc.), Costco has little recourse for collection. Therefore, credit card checks should be verified with [Check that Check](#) guideless and to be approved only by management.

TENDER TYPES

Manufacturer's Checks (7/23)

Costco may accept a manufacturer's check made out to "Any Retailer" or Costco provided the following: it is from a vendor that Costco uses, it has the member's name on it and, it is drawn from a financial institution. Similac and Enfamil are two common companies who issue manufacturer's checks. Tender manufacturer's checks for the face value and process as a check.

Vendor Sponsored Checks (US) (1/18)

Certain promotions will result in members receiving a vendor sponsored check. These checks will be made out to the member or to Costco. Vendor sponsored checks should be tendered as a check for face value. If the validity of a vendor sponsored check is ever in question, its authenticity can be confirmed by calling (866) 355-3137 or by emailing mailinrebates@costco.com.

Foreign Check Tender (3/16)

A few warehouses located near an international border or in an area with a high volume of international business, have the ability to tender foreign checks through the register system. This is limited to warehouses in Canada being able to accept US checks and warehouses in the United States being able to accept Canadian currency. To tender a foreign check on the register, use the following steps:

- **<TOTAL>**, then while holding **<CTRL>**, press **<TOTAL>**
- Release **<CTRL>**
- **<TOTAL>**. This will convert the total to Canadian currency
- **<4>**, **</>**
- Key in the \$ amount to be tendered
- **<CHECK>**
- Display reads, "ACCOUNT NUMBER NEEDED", **<CLEAR>**
- Scan Membership card
- Display will read, "INSERT DOCUMENT, PRESS CLEAR"
- **<CLEAR>**

Visa and MasterCard Prepaid Cards (6/16)

Visa (US) and MasterCard (CN) offer prepaid cards that may be tendered at the register. These cards process similar to shop cards. If the transaction total is more than the balance on the prepaid card, another form of payment must be taken to complete the transaction. If the transaction total is less than the balance on the prepaid card, the transaction will complete.

Store and Forward (12/22)

In rare instances, Costco's credit and debit system will go down. During these times all debit transactions and credit transactions over \$1,000 will decline on the PIN pad at the register. Until the credit and debit system comes back up, these payments must be processed on a standalone. However, all credit card payments under \$1,000 will be automatically approved and put into Store and Forward (SAF) on the controller. Once the credit and debit system has been restored, transactions in Store and Forward will automatically batch out, and the warehouse will be paid. Until the transactions have been batched out, they will appear in the Offline Pending Report on the controller.

TENDER TYPES

Standalone Credit / Debit Transactions (12/15)

The standalone terminals should be used for transactions that will not process through the register system on initial attempts.

Give membership card, receipt, and payment card to a supervisor or manager for standalone processing. Have the member follow the supervisor to the standalone terminal. After processing, the supervisor will give the receipt tape and a copy of the credit/debit slip to the member and return the signed copy of the credit slip or debit slip to the appropriate register. In Canada the supervisor must record the transaction information on the Front End Standalone Terminal Form (Form [#FE26CN](#)).

Standalone Processing (11/18)

- **<TOTAL>**
- **<STANDALONE>, <STANDALONE>**

The receipt, membership card, and credit or debit card must be given to a supervisor or manager for processing on the standalone.

EBT Cards - (US) (4/25)

When a member swipes their EBT card the PIN pad will present them with two options: EBT Food and EBT Cash.

Note: The cashier is not required to verify ID for an EBT card. Similar to a debit card, if the member knows the PIN, then no further verification is required.

Tender EBT Food:

- Ring the order as normal and press **<TOTAL>**.
- EBT-eligible items will show an "E" to the left of the item number on the receipt, regardless of the form of tender used.
- If the member wants to pay the entire EBT balance with EBT Food, press **<CREDIT/DEBIT>**.
- If the member wants to pay less than the EBT total with EBT FOOD, enter the EBT dollar amount to be tendered, then press **<CREDIT/DEBIT>**.
- Member swipes card and selects EBT Food. Member will be prompted to enter PIN on the PIN pad and the EBT Food balance will be processed.
- If the card cannot be read by the PIN pad, the card number can be manually entered on the register keyboard.
- Any remaining balance must be paid with another tender.

Note: The total balance of all EBT eligible items in the transaction can be displayed by pressing <TOTAL>, <EBT>, <TOTAL>.

TENDER TYPES

EBT Cards – US (cont.)

Insufficient Funds

Payments made with EBT cards will automatically tender for the amount available on the card. The transaction may be completed with a separate form of payment.

Voiding items after EBT Card has been processed but before the transaction is complete:

- To void an EBT-eligible item after the EBT card has been processed press **<VOID>**, **<CREDIT/DEBIT>**.
- This will reverse the EBT tender portion of the transaction.
- Void the selected items.
- Re-tender the order accordingly.

Voiding Transactions with EBT

Adjustments made on the Front End and Adjustment tills as a void can be returned back onto the EBT Food option of an EBT card.

EBT Limitations

EBT benefits cannot be used as payment for a Resale transaction

Tender EBT Cash

If the member wishes to use the cash component of their card and selects EBT Cash, the cashier should process the tender like a debit card:

- Select **<CREDIT/DEBIT>** on the register keyboard.
- Member will be required to enter their PIN.
- Tax will not be forgiven on items paid for with EBT cash.

EBT Cash Restrictions

Legislation in certain states has limited what members can buy with EBT Cash. The register system will require all non-eligible items to be removed from the order before tendering. The non-eligible items will need to be rung in a separate transaction using an alternate tender.

EBT Signage Requirements

At this time, the only sign that is required to be posted is the Report Abuse sign. Warehouses need to ensure there is a copy printed and displayed in a conspicuous location within the warehouse. It is not necessary to place one at every register.

[SNAP Report Abuse](#)

TENDER TYPES

EBT Cards – US (cont.)

Voiding EBT Cash transactions

Occasionally it will be necessary to void a transaction in which EBT cash was used to partially tender the order. Before voiding the transaction, **<VOID>**, **<CREDIT/DEBIT>** should be pressed to ensure the funds are returned to the member's EBT card

Processing EBT Food and/or Cash transactions on the Standalone

- An EBT card that cannot be read by the PIN pad can be manually keyed at the register. However, if the member's EBT card will not process at the register, the standalone may be used as an alternative.
- If all items on the member's original transaction are EBT Food eligible, then tender as a standalone. However, if the order has mixed EBT Food and cash items, then a void transaction must be performed on the original transaction.
- Re-ring as two separate orders. All EBT Food eligible items on one, and all other items on the second.
- Ring the EBT Food items (using original receipt to determine eligibility) and press the **<TAX EXEMPT>** key to forgive any tax on the order. The order should be slip printed on a resale card with "EBT transaction" noted on it.
- The cashier must tender the EBT Food order as a standalone by pressing **<STANDALONE>**, **<STANDALONE>**.
- A supervisor or manager must then process the EBT Food total at a standalone.
- The non-EBT Food items should be rung and processed as the second transaction.

The tender process will be determined by tender type. If tender type is EBT cash, press **<STANDALONE>**, **<STANDALONE>** and process on the standalone by a supervisor or manager.

Process EBT Food or Cash at the Standalone

- Select **<Sale>**
- Enter \$ Amount
- Enter Clerk ID (Register #), **<ENTER>**
- Swipe Card, then Select **<EBT>**
- Follow prompts on standalone.

Manual Entry of an EBT Card - (US) (9/22)

Sometimes it will be necessary to manually enter an EBT card. This may be necessary for EBT cards that will not swipe.

- **<TOTAL>**, **<EBT>**, **<TOTAL>**, **<EBT>**, **<EBT>**
- Press **<CLEAR>**.
- Enter the card number and expiration on the PIN pad.
- PIN pad will prompt for member's PIN number. No override will be required.

Note: The sequence **<CREDIT/DEBIT>**, **<CLEAR>** will also allow manual entry.

TENDER TYPES

Tender a Costco Shop Card (12/24)

- The member swipes the Costco Shop Card on the PIN pad.
- **<TOTAL>, <CREDIT/DEBIT>**
- If the available balance on the card is less than the tendered amount the system will automatically tender the card for the available balance. This results in a split tender transaction and requires that another form of payment be collected for balance due.
- If the tender amount is less than the available balance on the card, the card will be tendered for the total amount of the transaction and the remaining card balance will print at the bottom of the member's receipt.
- If there is a zero-balance remaining on a Costco Shop Card after it has been tendered, the card can either be thrown away or returned to the member if they request to keep it. Zero-balance cards should not be re-used.
- Receipt will print.

Manual Entry of Costco Shop Cards (3/20)

Sometimes it will be necessary to manually enter Costco Shop Cards. This may be necessary for shop cards that will not swipe or programs such as Living Social and Digital Shop Cards where there is no physical card. If a card must be manually keyed, process by:

- **<CREDIT/DEBIT>**
- **<CLEAR>, <CLEAR>**
- Scan barcode or manually enter shop card number on the keyboard and press **<ENTER>**
- An override will be required if the shop card number is manually entered

Note: Gift of Memberships and Membership Activation Codes (MAC) requiring a balance transfer to a Shop Card can only be processed on a Wave terminal at membership.

Manual entry of GOM / MAC numbers may be processed with the following key sequence:

- **<F12>, <F12>**
- Display reads "WAIT FOR PINPAD OR CLEAR TO CANCEL, **<CLEAR>**
- Key MAC number on the keyboard, **<ENTER>**
- Display reads, "B175 KEYED ACCOUNT REQUIRED OVERRIDE", **<CLEAR>**
- Display reads, "ENTER MGR OVERRIDE OR CLEAR TO RETRY"
- Override required

TENDER TYPES

Use of Costco Shop Cards by Non-Members (1/25)

Non-members should be allowed to shop and use shop cards. A membership #99 will be required to start the non-members order. The non-member must use the shop card as the first form of payment and may pay the balance with cash, debit, or credit. Non-members may not pay remaining balances with checks and may not purchase or reload shop cards. If the shop card has a remaining balance, the card should be returned to the non-member. If the shop card has no remaining balance, the card must be retained by the cashier and thrown away.

High Value Shop Card and Gift Card Purchases (7/25)

Shop Card Services should be contacted to assist members wanting to buy a large volume of cards. This can include orders under \$10,000. Card Services can activate and mail bulk order shop cards to the member, which saves the warehouse the time of individually activating each card.

Card Services will help determine if the cards may be activated at the location itself or if it makes more sense to have the cards mailed to the member directly.

Card Services

1-888-668-9668

M-F 7 AM – 6 PM PT, Saturday 8 AM – 4:30 PM PT

shopcardorders@costco.com

CN Shop Card Hotline

1-877-258-9580

M-F 8 AM – 4:30 PM EST

cdncas@costco.com

As shop card purchases do not impact flash sales, locations are not in jeopardy of losing sales by sending bulk shop card orders elsewhere. Only the redemption of the shop card reflects as sales for the location.

Note: An individual member may still purchase \$10,000 or more of shop cards or gift cards (i.e., for restaurants, travel, events, etc.); however, form [#FE14 Costco Shop Card and Gift Card Purchase Certification](#) must be filled out and signed by the member.

TENDER TYPES

Flexible Spending Account (US) (7/25)

Flexible Spending Account (FSA) cards are accepted at all register groups. Receipts will identify FSA qualifying items by printing an “F” next to them on the receipt.

Processing the transaction

- Ring the order as normal, press **<TOTAL>**
- Member Swipes the FSA card
- Merchandise and signature receipt prints
- Follow established procedures for Credit/Debit processing
- Any remaining balance must be paid using another tender type

Note: To display an FSA subtotal at any time, press: <2>, </>, <TOTAL>. If the member wants to pay less than FSA total amount enter the FSA dollar amount, press <CREDIT/DEBIT>, swipe card.

MedFlex Cards - (US) (12/25)

MedFlex cards are an insurance sponsored program that allows members to purchase specific items at participating retailers. These items vary by member, as a result, Costco cannot identify specific item eligibility prior to a transaction being tendered. The card is be available for use at all registers, including the gas station, if the items being purchased are eligible for the specific member.

MedFlex cards can be tendered at any register by pressing **<DEBIT/CREDIT>**. Keyed partial tenders are not allowed, and filtered spend cards cannot be tendered on the standalone. If no items are in the transaction, the register will display “No Qualified Items.”

Void previous is not available for transactions tendered with a MedFlex card.

Note: Items purchased with MedFlex cards are not eligible for resale.

Executive 2% Reward Certificate (6/25)

Tendering Executive 2% Reward Certificates (Not redeemable for cash)

- **<TOTAL>**
- Scan the 2% Reward Certificate or **<6>**, **</>**, **<MISC TENDER>** to manually enter
- Key in the certificate number and press **<ENTER>**
- Insert document to slip print, **<CLEAR>**
- If the Reward Certificate is scanned twice, the error message of “Duplicate Rebate, press Clear”, displays
- Reward certificates will appear on the check pickup slip and should be forwarded to the vault with checks

Note: Rewards or multiple rewards tendered for greater than \$1250 will require a supervisor/manager override.

TENDER TYPES

Executive 2% Reward Certificate cont. (6/25)

Executive 2% Reward Certificates include security features to help verify the authenticity of the certificate.

- In the US, a “thermo-ink” box is present on the left side of the certificate. The authenticity of check can be verified by either rubbing the “thermo-ink” box with a finger or breathing on the box. In either case, the text should temporarily disappear.
- In CN, the cashier should verify the member’s name and membership number printed on the reward matches the information printed on the member’s membership card. “NUL – VOID” will appear on a photocopy of a certificate.

Note: If the reward amount exceeds the transaction total, the change due may be given as cash etc. There is no requirement that the amount of the purchase represent any minimum percentage of the reward.

Citi Credit Card Reward Certificates - (US) (1/18)

Citi Credit Card Reward Certificates will be issued from Citi in members’ February statements. These rewards are valid only at Costco and may be redeemed for goods, services, cash, check, or Costco shop card. All Citi Rewards will have an expiration of December 31 of the year they were issued. Expired Citi Rewards should be accepted but will require an override to tender.

All Citi rewards are loaded onto a file in Costco’s system. At the time of tender, the register validates the reward is on the file and confirms the dollar amount and expiration date. Once tendered the reward is removed from the file so it cannot be tendered a second time.

For a warehouse to be paid for a Citi reward the reward must be tendered on a register either by scanning the barcode or manually entering the number. If the barcode does not scan or the number is illegible, the member should be directed to request a replacement from Citi. Citi rewards must never be tendered as a check for the face value of the reward. Tendering as a check does not validate the reward against the file. Therefore, any rewards tendered as a check will result in a shortage to the building.

To redeem a rebate:

- **<TOTAL>**
- Scan barcode on reward OR **<9>**, **</>**, **<MISC TENDER>**
 - Enter the entire barcode number and press **<ENTER>**
- Citi rewards will not appear on the check pickup slip but should still be forwarded to the vault with checks

Note: Citi Credit Card Rewards may be scanned or manually entered from a member’s cell phone.

TENDER TYPES

CIBC Rebates - (CN) (5/22)

In Canada, CIBC Rebates are sent in the month of January. These rebates are valid only at Costco and may be redeemed for goods, services, cash, check, or Costco shop card. Only the cardholder, whose name appears on the rebate, may redeem the rebate. Members redeeming the rebate must sign where indicated.

To redeem a rebate:

- **<TOTAL>**
- Scan barcode on rebate or
- **<9>, </>, <MISC TENDER>**
 - Enter rebate number and press **<ENTER>**
- If a rebate is scanned twice, error message "Duplicate Rebate, press Clear" displays
- Credit card rebates will appear on the check pickup slip. Forward tendered rebates to the vault with checks
- Do not accept any rebates marked with VOID

Note: If the rebate was issued prior to January 2020, the key sequence <7>, </>, <MISC TENDER> must be used to manually enter the barcode number.

Can/Bottle Recycling - Can Do (2/24)

Tender a Can-Do Refund

- **<TOTAL>, <2>, </>**, \$ amount of Can-Do refund, **<MISC TENDER>**
- Key in Control # or scan bar code on Can-Do thermal paper receipt.
- A slip print will be required
- Deface the recycle receipt
- Recycle receipts placed in a separate plastic sleeve and send to vault with pickups
- The slip print can be performed on the Can/Bottle Recycling Card (Form #FE16) or scratch paper. The slip print does not need to be retained.
- Location may accept all beverage containers that are part of the deposit system, even if the item is not sold at Costco.

Note: If cans/bottles are recycled in the breakroom, Can Do must be deposited with the funds contributed to your Children's Miracle Network Hospitals (CMNH).

Can/Bottle Recycling – Quebec (2/24)

Locations in Quebec must accept beverage containers from non-members.

TENDER TYPES

Refund Credit Slips and Optical Vouchers (4/05)

Optical Vouchers are used in the Optical department only and are sent to the vault in a separate sleeve but in the same tube as cash and check pickups.

Tender refund credit slips and optical vouchers

- **<TOTAL>, <2>, </>**
- Key in the \$ amount of Refund Credit Slip or Optical Voucher
- **<MISC TENDER>**, display will read, "ACCOUNT NUMBER NEEDED", **<CLEAR>**
- "ENTER ACCOUNT NUMBER OVERRIDE OR CLEAR"
- Enter the Control Number (number printed on Refund Credit Slip or Optical Voucher's number), **<ENTER>**
- Display will read, "INSERT DOCUMENT, PRESS CLEAR", **<CLEAR>**

Supply Purchases (2/22)

A cashier can process a supply purchase transaction, but as with all other purchases made through the front end registers the merchandise must be present. The person performing the override must deface the receipt upon tendering and attach it to the daily register sheet (DRS). All original supply receipts must be defaced and attached to the DRS, unless the merchandise needs to leave the warehouse. If merchandise needs to leave the warehouse the original receipt should accompany the merchandise and a copy of the receipt must be attached to the DRS with an explanation.

Note: Departments may ring their own supply purchases.

Tender Supply Purchase

- **<3>, </>**, scan membership card, override will be required
- Scan items
- **<TOTAL>, <MISC TENDER>**

These cards must not be used for the purchase of Costco Shop Cards, safety incentives, donations, or any other non-supply items. It is acceptable to purchase food for warehouse functions with a supply card. Supply membership numbers should never be keyed from memory.

Note: Supply cards should be used to purchase inventory or supply items only for the specific account for which the card is set up. A physical supply purchase membership card must be used for all supply purchases. Supply cards must be kept in a secure location when not in use.

TENDER TYPES

Purchase Orders (5/22)

A purchase order (PO) is a form of payment usually used by government agencies, schools, non-profit organizations, etc. A supervisor or manager must ensure the PO is valid and has an authorized signature. It may be necessary to verify the member's signature with the signature on file on the Purchase Order Agreement (Form #[FE23US](#) or #[FE23CN](#)). The member should fill out the Purchase Order Invoice Slip (Form #[FE24US](#) or #[FE24CN](#)) and the transaction should be slip printed on the invoice. The invoice number is made up of the month, day, register number, and ring number (e.g., 1120/02/0123).

Tendering a Purchase Order

- Scan membership card, **<SLIP PRINT>**, scan items, **<TOTAL>**, **<PO>**, **<PO>**
- Press **<ENTER>** to charge admin fee or press **<CLEAR>** to not charge admin fee
- Register prompts Override Required
- **"INSERT DOCUMENT PRESS CLEAR"**, insert PO Order form to print, **<CLEAR>**

A 1.5% administration fee is automatically calculated by the register. In some cases, as part of the purchase order agreement, the warehouse may choose to waive this fee.

DAILY REGISTER SHEET

SECTION 6

DAILY REGISTER SHEET

Open Funds (2/22)

<big>COSTCO</big> WHOLESALE		DAILY REGISTER SHEET						
		DATE: _____				REG #: _____		
(Only required if cashier did not loan their own till)								
FUNDS	\$1	\$2	\$5	\$10	\$20	R Coin	STAMPS	MISC.
Open								

The first cashier on the register for the day is responsible for verifying and logging the contents sent from the vault or cash recycler. When cashiers write the totals they should enter dollar amounts, not quantities into the appropriate boxes. The till should come with a receipt breaking down the till's contents. If there is a discrepancy between what the cashier counts and what the receipt states, a supervisor should be alerted. When performing this verification, loose coin (excluding loonies and toonies for Canada locations) should never be counted.

Note (Cash Recycler Locations): The opening till funds should only be logged if the till was dispensed by someone other than the cashier.

Signing On (7/25)

	1	2	3	4	5	6	7	8	9	10
CASHIER #										
INITIALS										
Time On										
Time Off										
\$ 1										
\$ 2										
\$ 5										
\$ 10										
\$ 20										
R Coin										
Stamps										
Misc.										

This section is a log of the different cashiers and the times they were on this register. It allows the sales auditor to see who was cashiering when a discrepancy occurred. When a cashier signs off of a register, they will be responsible for filling in the first available column in this section. The second cashier will be responsible for verifying the previous person's count, and then filling out the next column when they step off of the register. This is done throughout the day. If a sheet gets full, a second sheet should be attached to the first, and both sheets given to the sales auditor. Notes, rolled coins (R Coins) and stamps should be logged in the appropriate columns.

If a cashier is stepping on to a register that has already been in use, they should perform a quick count to verify what is listed in the column matches the contents of the till. Report any discrepancies to a supervisor. The cashier will then put their cashier number and initials in the next available column. In a scenario where another cashier is closing out an open till the notes must be verified before performing the action.

Note: When cashiers count out of their tills (i.e., break, lunch, leaving for the day, etc.) all 100s, 50s and excess 20s should be deposited as a pickup.

DAILY REGISTER SHEET

Pickups/Notes to Sales Audit (2/24)

PICKUPS/NOTES TO SALES AUDIT			
REASON	\$ AMOUNT	CASHIER	WITNESS

FORM #FE04 ALL LOCATIONS 02/25 (Retention = 6 months)

Forced cash pickups, and notes detailing errors or exceptions that have been made on the register should be logged in this section. For more information on what needs to be logged, please see the [Voids](#) section of this manual.

Cash Pickups

Cash Pickups refer to the dropping of cash from a register and transferring them to the cash recycler or vault.

- The register will warn the cashier that a pickup is needed when the register totals \$2,000. **"Pickup Needed Soon"** will display.
- The register will lock when the register totals \$2,500. **"Pickup Required Now"** will display.
- The register will lock until **<CLEAR>** is pressed, and a pickup is processed.
- When the cashier leaves on a break, lunch, side task or at the end of their shift the till cash amount must be reduced to \$300 or lower by performing a cash pickup.
- All other tenders must be sent to the vault: checks, credit slips, debit slips and coupons.

Cash Pickups in Cash Recycler Locations

If a register has reached or exceeded \$2000 in cash, the cashier may perform a forced pickup.

- The cashier, along with the witness, must count the money, key it into the register and log it on the DRS.
- The witness that verified the pickup and signed for it will be responsible for depositing the funds into the cash recycler.
- The witness must bring the cash recycler receipt back to the cashier to initial and attach it to the DRS.

DAILY REGISTER SHEET

Cash Pickups in Cash Recycler Locations (cont.)

- To avoid a “double pickup” the cashier must now void the manually keyed pickup using the following steps:
 - **<PICKUP>**
 - **<VOID>**
 - **\$ AMOUNT**
 - **<CASH>, <TOTAL>**
- Both the original pickup and the voided pickup receipts should be attached to the DRS.

Note: To avoid having to perform a manual pickup on the register, cashiers should be proactive in having their cash dropped upon seeing a “Pickup Needed Soon” notice. These pickups must still be logged and signed for on the DRS.

Cash Pickups in Non-Cash Recycler Location

- Cash pickups must be made in even increments (i.e., \$1100, \$1150, etc.).
- Pickup slips will print the register number and pickup numbers in bold and large font and must be included with the cash in the sleeve.
- Do not write the dollar amount on the pickup slip.
- The cash drop must be recorded on the Daily Register Sheet and signed by a witness to verify the cash was sent to the vault.

DAILY REGISTER SHEET**Daily Register Sheet Logging Procedures (2/24)**

Transaction Type	Log on DRS?	Receipt Requirements
Pickup deposited by another employee (Cash Recycler locations only)	Yes	The cashier and supervisor/manager must count the notes, key it into the register and log it on the DRS. The cash recycler receipt is initialed by the cashier and attach it to the DRS
Zero Total Receipt – Coupon (Examples include free chicken)	Yes	Receipt is given to the member.

Transaction Type	Log on DRS?	Receipt Requirements
Adjustments & Ancillary Refunds	No	Record the date of original transaction (if different day) on the receipt, deface and attach to the DRS.
Void Total & Zero total with inline void items	No	Receipt must be defaced and attached to the DRS.
Void Previous and Adjustment Transaction used to void an entire transaction	No	Both the original and void previous receipt must be defaced and attached to the DRS.
Void Membership Number (Zero total with no items on receipt)	No	None, these can be discarded.
Zero Total Receipt	No	Receipt must be defaced and attached to the DRS.
Manual Loans from the vault (CFI)	No	Loan receipt and completed white CFI (VT01) form must be attached to the DRS.

VOIDS

SECTION 7

VOIDS

Introduction

The voids section of this manual is used to explain voiding one or more items from a transaction that has already been completed or voiding an entire transaction after the order has been tendered. This section will follow a general guideline of first giving background of when the type of void would happen on the register, how to complete this type of void, and then ends with what needs to be logged, if anything, on the Daily Register Sheet.

Void Items Within a Transaction (1/08)

Sometimes it is necessary to void an item(s) within a transaction if the item was scanned in error, or the member wishes to have the item removed from their transaction. Individual line item(s) voids are not recorded on the Daily Register Sheet. To void items within an order, use one of the following methods:

Void Previous Item

- <VOID>
- <ENTER>

The last item rung will be voided as long as the “**TOTAL**” key has not been pressed.

Void other items in order:

- <VOID>
- Scan or key item (if keyed, <ENTER>)

Note: If an item needs to be voided after a partial EFT payment, the payment must be reversed by pressing <VOID>, <CREDIT/DEBIT> before voiding the item.

Voiding Items After a Transaction Has Been Completed (03/24)

Sometimes it is necessary to void an item after a transaction has been completed. This most frequently happens when a member is overcharged. To void an item after a transaction has been completed:

- Scan the membership card.
- <VOID>, scan the item to be voided or key in the item number.
- Override will be required.
- <TOTAL>, <TENDER>
- Date if the original transaction occurred on a different day.

Note: All transactions that end in a negative dollar amount must have the receipt defaced and attached to the Daily Register Sheet. The following information must be recorded on the adjustment receipt:

VOIDS

Void Transactions (04/24)

Void transactions are transactions that are voided before complete payment has been taken for the order. Transactions sometimes need to be voided if a member has forgotten their form of payment, cannot pay for the transaction, or the transaction has been rung in error.

To void an entire transaction:

- Press **<VOID>**, **<TOTAL>**
- An override will be required
- VOID TRANSACTION prints on the bottom of the receipt.

All voided transactions must be defaced and attached to the Daily Register Sheet. It is not necessary to log these transactions.

Note: Partial payments must be voided before a void transaction can occur.

Void Membership Number (11/18)

If a membership card is scanned but no items have been rung, the transaction can be voided by pressing **<VOID>**, **<TOTAL>**. A receipt will print but does not need to be retained.

Note: This is the only void transaction receipt that can be thrown away.

Zero Total Receipt (1/08)

- Scan membership card
- Scan item(s)
- Void out all item(s)
- **<TOTAL>** = \$0.00
- **<CASH>**, **<CASH>**
- Zero Total receipts must be defaced and attached to the Daily Register Sheet

Zero Total Receipt – Coupons (12/17)

Occasionally there is a promotion for free product resulting in a zero-total transaction. The member must have the receipt to exit the building. In these instances, the cashier should log the transaction on the Daily Register Sheet.

Void Previous Transaction (03/25)

To simplify processing of voids, supervisors/managers can void a completed transaction (same day only) by turning on "Void Previous" mode. This transaction can be performed on the register of the original transaction or on the adjustment register with the exact ring number and dollar amount entered. To retrieve a transaction to be voided, the receipt barcode can be scanned to initiate the void. Void previous is not allowed on the following registers: Tire Center, Optical, Pharmacy, and Refunds.

VOIDS

Void Previous Transaction (cont.)

Void Previous on an Adjustment Till

- Hold down <CTRL> key and press <ADJUSTMENT>
 - Scan the transaction barcode or enter register number, <ENTER>
- If register number keyed, enter transaction number, <ENTER>
- Enter transaction amount, <ENTER>
- Press tender key twice
- An override will be required
- The void previous receipt and the original receipt must be defaced and attached to Daily Register Sheet.

Void Previous all other registers

- Hold down <CTRL> key and press <ADJUSTMENT>
- Key Transaction #, <ENTER>
- Enter transaction amount, <ENTER>
- Press tender key twice
- An override will be required
- The void previous receipt and the original receipt must be defaced and attached to Daily Register Sheet.

Note: Performing a Void Previous is the only way to devalue a Point of Sale Activated (POSA) card after a transaction has been completed. Once voided, the card should be forwarded to RTV as a precaution and not placed back on the sales floor.

Adjustment Key (03/24)

If a transaction needs to be reversed, an adjustment is available. This process is used most frequently when a transaction has been completed on a previous day and the void needs to be done. This receipt and the original receipt must be defaced and attached to the Daily Register Sheet. To use the adjustment function:

- Scan membership card and place key in supervisor mode
- Press <ADJUSTMENT>
- Key each item from the receipt and press <TOTAL>
- Verify total matches original receipt
- Press tender key twice
- An override will be required
- Receipt and original receipt must be defaced and attached to Daily Register Sheet

Void Tax Key Sequences (CN) (11/18)

- <TOTAL>, <TAX EXEMPT> - Removes PST or GST depending on province
- <TOTAL>, <2>, <TAX EXEMPT> - Removes GST
- <TOTAL>, <3>, <TAX EXEMPT> - Removes both taxes

Void Tax After Order Has Been Tendered (9/22)

- Once an order has been tendered, tax may be refunded in a separate transaction. An override will be required on non-refund/adjustment lanes.
- Member must sign the resale card.
- A copy of the member's original receipt must be attached to the resale card

MISCELLANEOUS ITEM SALES

SECTION 8

MISCELLANEOUS ITEM SALES

Introduction

The Miscellaneous Item Sales section of this manual is meant to highlight certain items that have different sales rules than standard items in the warehouse.

Age Restricted Items (09/24)

When purchasing age restricted items such as alcohol, tobacco, or certain pharmaceuticals, the register will prompt for the cashier to verify the member's date of birth. The cashier should answer the prompt by entering the member's date of birth (US) / accepting the register prompt (CN) from a valid form of government identification. Age verification requirements may vary by state/province. Specific requirements can be found on the [Alcohol Ops Regulations](#) or [Tobacco Ops Regulations](#) legal site.

Acceptable forms of I.D. may vary by state/province, but generally include:

- A valid driver's license
- A valid passport
- A valid I.D. card issued by a government agency that has a photograph and the date of birth of the individual

Note: A full list of acceptable forms of identification for the US can be found on the Legal site under [Alcohol Ops Regulations](#). For assistance with verifying identification, refer to the ID Checking Guide found on the [Member Service and Loss Prevention](#) site.

Enter Birth Date Prompt (US)

- Scan age restricted item
- Register displays **[ENTER DATE OF BIRTH MMDDYYYY]**
- Enter the date of birth from the identification, **<ENTER>**
- If an underage date of birth is entered, the register will not allow the sale of any age restricted items in the same transaction

Note: A generic date of 01011961 can be entered for members who appear over a certain age. This age differs from state to state.

Age Restricted Item Prompt (CN)

Due to privacy laws, a date of birth may not be entered into the register system. Valid identification must still be verified in accordance with provincial guidelines.

- Scan age restricted item
- Register displays **[VERIFY DATE OF BIRTH ENTER OR CLEAR]**
- After verifying valid identification, **<ENTER>**

MISCELLANEOUS ITEM SALES

Alcohol Purchases (5/05)

Sales of alcoholic beverages to minors are prohibited in all jurisdictions. The legal age for the purchase of alcohol varies by state/province and all employees must be aware of the local age and requirements. Various law enforcement agencies attempt to make purchases of alcoholic beverages using individuals who are under the legal age but look older as the purchaser. Ask for ID when in doubt. In most states/provinces, the cashier is responsible and may be fined if a transaction of alcohol is sold to a minor. The [Legal Department's](#) intranet site lists state requirements for alcohol purchases.

Tobacco Purchases – (US) (06/25)

Federal law prohibits self-service displays of cigarettes and smokeless tobacco products. This regulation applies to both retail and wholesale members and affects Costco in the following ways:

Non-Business Costco Members

- All cigarettes and smokeless tobacco must be in a locked cage that a member cannot enter.
- Members cannot pick their own product.
- Employees will need to obtain the cigarettes and smokeless tobacco for members, and hand them to members at the cash register at the time of purchase.

Costco Business Members

Costco business members are only allowed entrance to the cage if the following conditions are met:

- The member may need to possess a license to resell cigarettes and smokeless tobacco; a general resale license is not sufficient in most states.
- Prior to allowing access, a copy of the current, unexpired tobacco resale license must be on file inside the tobacco cage.
- Properly licensed business members may only pull inventory to be purchased for resale.

Federal law requires that photo identification be verified for anyone under the age of 27 purchasing cigarettes or smokeless tobacco. Federal law prohibits sale of cigarettes and smokeless tobacco to individuals under age of 21. States may set a different age requirement. All employees must comply with the age requirement whether it is the Federal requirement or a lower age set by the state. Selling tobacco products to individuals under age can result in prosecution of the employee making the sale and may jeopardize Costco's licenses.

Tobacco Purchases - Oregon

Oregon state law requires the Oregon Cigarette/Tobacco Product Sale Form (Form #FE79a through Form #FE79n) must be used for all tobacco sales to retailers (not consumers). The member must fill in their business name and address on the form. The warehouse must then slip print all products onto that warehouse specific form. Once the transaction is completed the form must be given to the member for their records.

MISCELLANEOUS ITEM SALES

Tobacco Purchases – (CN) (4/13)

The sale of more than 5 cartons of cigarettes or 1000 grams of tobacco to members that do not have a valid tobacco or tax number is prohibited in the following Provinces: Alberta (AB), British Columbia (BC), New Brunswick (NB), Manitoba (MB), and Nova Scotia (NS).

In Quebec (QC), Ontario (ON), and Newfoundland (NL), 5 cartons is the limit with exceptions. More than 5 cartons may be purchased if the member confirms the product is for personal consumption. Form [#FE07CN](#) must be filled out and the transaction must be slip printed. Saskatchewan does not have a limit.

Contact the Tax Department at the Canadian Regional Office in Ottawa, Ontario at (613) 221-2000 for current tobacco provincial laws.

Note: There is no limit on cartons purchased with a valid tobacco or tax number. In Ontario, Form [#FE13CN](#) must be filled out anytime a wholesaler purchases tobacco for resale. Alberta does not require a tobacco number, so a GST number must be entered into the membership system.

Alcohol/Cigarette Audit Form – (US) (7/24)

Tobacco: The tobacco section of the **Alcohol/Cigarette Audit Form (Form [#FE07US](#))** must be filled out in entirety in the following situations in a single transaction:

- Over 50 cartons of cigarettes are purchased
- 500 single-unit, consumer-sized packages of smokeless tobacco are purchased

Note: The tobacco section of [#FE07US](#) must be filled out regardless if the purchase was done for resale or personal use when exceeding the above limits.

Alcohol: The alcohol section of the **Alcohol/Cigarette Audit Form (Form [#FE07US](#))** must be filled out in entirety in the following situations:

- Two hundred thirteen (213) 12-oz cans = eight cases of 24 12-oz cans per case, seven cases of 30 12-oz cans per case beer, or five cases of 36 12-oz cans per case
- 20 gallons or 75.7 liters of wine
- 75.7 liters of distilled spirits

Note: For inventory purposes, cigarettes must be scanned or the UPC keyed in full. Do not key in the Costco item number.

If a cashier determines that the Alcohol/Cigarette Audit Form is necessary the following steps should be taken:

- The cashier should have the member complete the Alcohol/Cigarette Audit form.
- The cashier should slip print the qualifying portion of the member's order on the back of the Alcohol/Cigarette Audit form.
- When the form is completed, a front end supervisor should be notified to verify the amount of alcohol or cigarettes purchased.

Completed forms must be retained at the warehouse in a secure location for the current year plus 3 additional years and must be made available if requested by the Bureau of Alcohol, Tobacco, and Firearms of the United States Government

MISCELLANEOUS ITEM SALES

Battery Sales (3/08)

When automotive batteries are sold it is important to scratch off the corresponding month and year located on top of the battery for warranty and identification purposes.

Battery Disposal Fee (11/18)

Upon purchase of an automotive battery, a battery disposal fee is automatically added to the transaction total. The refund for this fee should be performed at Tire Center in US locations and may be performed at the Tire Center or refund counter in CN locations using the following barcodes:

For further information about the refund of battery disposal fees, please see the refund manual.

Quantity Restricted Pharmacy Items (6/17)

Certain pharmacy items have quantity limits. When these items are sold, the register will display the specific quantity restrictions. The restrictions displayed by the register must be followed.

Note: Pseudoephedrine products must never be sold for resale.

Give Member Item Register Prompt (10/20)

Physical Inventory results indicate that in many instances warehouses have failed to give the member their pickup items (Allstate Protection Plan, Stamps, etc.) when purchased at the register. **GIVE MEMB ITEM** will prompt to serve as a reminder for cashiers to give members their items.

Warranty Included Register Prompt (9/25)

Select Samsung and LG TV's include an Allstate protection plan free with purchase. Once an eligible TV is scanned, the register will prompt **[B911 RESTRICTED QTY SCAN WARRANTY]**. The cashier must scan the warranty after which the applicable IRC will void the price of the warranty. The warranty must be scanned in the same transaction as the TV to activate the IRC.

To clear the block, use the following key sequence:

- **<CLEAR>, <OVERRIDE> then <ENTER>**

MISCELLANEOUS ITEM SALES

AppleCare (11/24)

AppleCare protection plans are sold both in the warehouse and online. These protection plans are only available for Apple products purchased in the same transaction as the plan. Both activation and deactivation must be processed through designated iPads at the warehouse level. See the sections below for enrollment procedures.

Enrollment (Purchase)

A cashier clearable message, **[ACTIVATION/DEACTIVATION REQ AT MPU-PRESS CLR]**, will appear after tendering an AppleCare transaction. Upon AppleCare activation, a supervisor/manager must initial and date the member's receipt in the designated area to confirm the activation was processed.

Enrollment (Front End)

To enroll a device, use the following steps:

- On the iPad, select Connect Apple Device with AppleCare+
- Enter the member's email address
- Scan the barcode at the bottom of the transaction receipt and tap **[Confirm]**
- Scan Apple device serial numbers and confirm information is correct.
- Acknowledge enrollment on the bottom of member's purchase receipt.

Note: If the barcode is unable to be scanned, users may select [Enter Transaction ID Manually].

AppleCare Receipt Authorization

APPLECARE PURCHASE ENROLLMENT REQUIRED

AppleCare PURCHASE has been ENROLLED
via the AppleCare kiosk on the date
of purchase.

Costco Employee Acknowledgement
Initial: _____ Date: __/__/__

For further AppleCare information, see the following documents:

- [AppleCare](#)
- [AppleCare FAQ](#)
- [AppleCare Enrollment Job Aid](#)

RESALE AND TAX EXEMPT

SECTION 9

RESALE AND TAX EXEMPT

Introduction

Costco Business Members may be exempt from tax based on their resale licenses or tax-exempt status. Eligible members will have their resale number or exempt status printed on their membership card. This section of the manual is to be used to identify these situations and also outlines how to perform the exemption of taxes for these members. Each state/province has a unique set of rules regarding tax exemptions. Details can be found [Tax Department's Intranet Site \(US\)](#) / [Commodity Tax Intranet Site \(CN\)](#).

Resale (02/26)

The Resale function should be used for all resale, tax exempt and non-profit businesses/agencies. Having their resale number or exempt status printed on their membership cards identifies members who are entitled to purchase for resale. It is the responsibility of the cashier to ensure that all resale transactions are documented properly.

A resale card must be completed for all resale and exempt transactions. Resale cards are state/province specific and can be ordered from the Materials Ordering Site or printed from the Forms Library. Cards are completed, by the member, with the member's resale number/tax exempt ID number/exempt status, business name and signature. Resale forms must be retained and forwarded to sales audit daily.

To process a resale transaction:

- Scan membership card
- Member fills out resale card, **<RESALE>** (on)
- Scan items for resale, **<TOTAL>**
 - If any items in the transaction are not for resale, **<RESALE>** (off), scan remaining items
- Once tendered, display will read "INSERT DOCUMENT, PRESS CLEAR"
- Insert resale card into the slip printer, **<CLEAR>**

Note: EBT cannot be used as payment for resale transactions.

Resale Error

If tax is inadvertently charged on a resale transaction, the taxes may be refunded using the manual tax function on the register. The member must complete a resale card and the tax refund should be slip printed on the back. A copy of the original receipt should be attached to the resale card.

RESALE AND TAX EXEMPT

Resale Transactions for Another State (3/22)

The states of Maryland and New Mexico, as well as Washington D.C., do not allow a resale exemption for any member using a resale license from another state. Documentation for the state of Florida differs from the remaining states in that form [#FE42 Florida Non-Resident Certificate for Resale](#) must be filled out for resale outside of Florida.

For all other states: a member from another state wanting to make a resale purchase should follow these instructions:

- Have the member complete the resale form.
- In the resale number field **DO NOT write out the state resale number** instead write, “**For resale in XX**” (i.e., two-letter state abbreviation).

Note: For additional tax information, refer to the [Tax Department's Intranet Site](#) intranet site for each state's tax requirements.

Tax Exempt (9/08)

Foreign Diplomats are exempt from all taxes including alcohol. Alcohol tax exempt purchases require supervisor involvement with the transaction and must be documented on a state specific resale card.

- Scan membership card
- Begin scanning the items
- When all tax exempt items have been scanned, <TOTAL>, <TAX EXEMPT>.
- After tendered, the display will read “INSERT DOCUMENT, PRESS CLEAR”.
- Insert resale card into the slip printer, <CLEAR>.

All items purchased for tax exempt will print at the end of the order onto the resale card.

Tiered Resale – (US) (limited locations) (12/19)

Some warehouses sell cigarettes for resale to members from jurisdictions with different tax rates. To accommodate these multiple tax rates, it is necessary to have cigarette "tiering". Tiering must be accomplished by creating an invoice on the Cigarette Tiering System then scanning it on the register.

Note: Specific procedures must be adhered to when a member is requesting a Cook County tobacco tax exemption. Failure to comply with these procedures may result in significant financial penalties levied against Costco. Further information can be found in the [Cook County Tobacco Exemptions](#) memorandum.

RESALE AND TAX EXEMPT

Precious Metals (02/26)

Precious metals/bullion are not eligible for resale.

Precious Metals Tax Exemption Threshold (US) (limited locations) (08/25)

Tax Exemption Threshold - CA, CT, MA, NY, NJ Locations

In the states listed below, precious metals receive a tax exemption when the pretax total exceeds a threshold. Items in which the total sell price of one unit surpasses the threshold will automatically exempt taxes. If multiple quantities of an item are required to meet the threshold in a given transaction, members must receive a manual exemption. In this case, taxes must be exempted using the following steps:

- Scan membership
- Ring precious metal bullion
- **<TOTAL>, <TAX EXEMPT>, <CLEAR>**
- Slip print resale card, writing precious metal bullion on the front of the card. Member signature is not required.

State	Tax Threshold
CT*, MA*, NY, NJ^	\$1,000
CA*	\$2,000

*= *Excluding Platinum bullion*

^= *Including Legal Tender Coins, see note.*

Precious metal bullion must be rung separately from other merchandise to avoid inadvertently removing the incorrect amount of tax.

^Note: Sale of coins in which the total value of a single coin exceeds \$1,000 will be exempt.

RESALE AND TAX EXEMPT

Alcohol – (US) (11/20)

Except in the states of Alaska, Washington and Iowa, Costco is not permitted to sell alcoholic beverages for resale.

Alaska

In the state of Alaska, Costco is permitted to sell alcoholic beverages for resale only to specific on-premises licensees. Specific rules regarding these sales can be found on the [Legal Site](#).

Washington

In the state of Washington, Costco is permitted to sell wine and spirits for resale to bars, restaurants, private clubs, and taverns. Specific rules regarding these sales can be found on the [Legal Site](#).

Iowa

In the state of Iowa, Costco is permitted to sell wine and spirits for resale to certain eligible businesses and organizations. Specific rules regarding these sales can be found on the [Legal Site](#).

Alcohol – (CN) (11/19)

Saskatchewan

Costco is permitted to sell wine and spirits for resale to holders of a Commercial Liquor Permit. To exempt taxes to Commercial Liquor Permit holders the **<RESALE>** key will need to be pressed before the liquor item(s) is scanned. Specific details regarding these sales can be found in the following links:

[**FE103aCN – Certificate for Saskatchewan Liquor Consumption Tax Exemption**](#)

[**FE103CN – Saskatchewan Resale Levy Certificate**](#)

[**LCT & Resale Levy Exemption Procedure**](#)

Note: The tax identifier for liquor items will be G, however, at the bottom of the receipt it will be identified with LCT. Alcohol items will not be able to be purchased on non-liquor registers.

ANTI-MONEY LAUNDERING

SECTION 10

ANTI-MONEY LAUNDERING

Introduction

Costco Wholesale Corporation, which sells certain Costco-branded shop cards, third-party gift cards, and other types of prepaid stored value products, along with certain precious metals items, has adopted and implemented an anti-money laundering program. Costco is also subject to other requirements, including reporting transactions of more than \$10,000 paid for in cash in the US, and foreign bank accounts with more than \$10,000 in them. This section contains some, but not all Anti-Money Laundering policies. Complete procedures on Costco's Anti-Money Laundering Compliance program can be found at the following links for the [US](#) / [CN](#).

Anti-Money Laundering Regulations (02/25)

To remain compliant with anti-money laundering regulations, it is imperative cashiers adhere to specific guidelines. These guidelines include:

- Shop cards are prohibited from being cashed out, except where required by law. A list of individual states can be found [Devaluing Shop Card](#) section of this manual
- Individual gift card balances may not be associated to more than \$2,000 per day (including refunds)
- Members may not purchase more than \$10,000 worth of gift cards per day (i.e., for restaurants, travel, events, etc.).

One exception to these guidelines is a member wishing to purchase more than \$10,000 worth of gift cards on behalf of their business. The member must complete form [#FE14 \\$10k Costco Shop Card and Gift Card Purchase Certification](#). The cashier will slip print the back of the form with transaction information and forward to Sales Audit with their daily paperwork.

Cashiers should also be trained to notify management immediately for the following behavior:

- Suspicious activity in the use or purchase of cards, including frequent purchasing of large quantities of cards.
- Members purchasing cards for illegal purposes. Illicit or illegal purposes may include cash transactions "structured" to stay under the \$10,000 reporting limit, threats or bribes made to employees or similar conduct.

Note: If danger is perceived in denying a sale of one or more cards, then the sale should proceed. A manager should be immediately notified after the sale occurs.

Report of Cash Transactions over \$10,000 - (US) (06/25)

The Internal Revenue Service (IRS) requires that any cash transaction, or series of transactions in excess of \$10,000, must be reported using the (IRS) Report of Cash Payments over \$10,000 ([Form 8300](#)). All transactions for the same member in a 24-hour period are considered related transactions. Transactions over 24 hours apart are considered related if the cashier (recipient) has reason to know or suspect that these are a series of related transactions. To assist in complying with federal regulations, the system will track cash accepted from a member at the same warehouse daily.

ANTI-MONEY LAUNDERING

Report of Cash Transactions over \$10,000 - (US) (cont.)

When a member tenders cash greater than \$10,000 in a transaction or series of transactions, you must:

- Complete the Form 8300 prior to allowing the member to leave the warehouse with the merchandise purchased
- Send a copy of the completed Form 8300 to form8300@costco.com.
- Mail a copy of the Form 8300 to the California tax authorities (applies only to warehouses in California)
- Retain a copy of Form 8300 for seven years.

Note: Please see the examples below on what is considered cash for the purposes of fulfilling this reporting requirement.

Cashiers may voluntarily report suspicious transactions. A suspicious transaction is a transaction where it appears that a person is attempting to cause a Form 8300 not to be filed, or to false or incomplete form, or in which the transaction otherwise appears suspicious.

Cash does not include a check drawn on the purchaser's own account, regardless of the check amount. This is because the check is already linked to the individual writing the check. Cashier's checks, bank drafts, traveler's checks, or money orders that are **\$10,000 or less** are considered cash. They are counted together with other cash receipts for purposes of the \$10,000 threshold. Cashier's checks, etc. over \$10,000 are already reported by the issuing bank, so are not considered cash.

For example, assume that a member purchases goods for \$17,000:

- The member pays \$17,000 in cash -- Form 8300 is required since cash received is greater than \$10,000 (i.e., \$17,000).
- The member pays \$11,000 in cash and \$6,000 by cashier's check -- Form 8300 is required since cash received is \$17,000. Since the cashier's check is \$10,000 or less, it is counted as cash together with the additional \$11,000 received.
- The member pays \$4,000 in cash and a \$13,000 by cashier check -- NO Form 8300 is required. The cashier's check is NOT cash since it exceeds \$10,000. Thus, cash received equals \$4,000.
- The member pays \$8,000 by cashier's check and \$9,000 by a separate cashier's check. Form 8300 is required since total cash received is \$17,000. Since each cashier's check is \$10,000 or less, they are both counted as cash.
- Box 32 if cashier checks are received put the check numbers of the cashier/money order down i.e. check number usually found in the right top corner of document.

The Form 8300 must be completed with all required information fields filled at the time the transaction is complete. Members are not allowed to leave the warehouse with merchandise until the Form 8300 is complete. Failure to supply required information results in penalties to Costco.

ANTI-MONEY LAUNDERING

Report of Cash Transactions over \$10,000 - (US) (cont.)

Costco is required to complete the Form 8300 (**the member does not complete the form**):

- When the register transaction is complete, the front end supervisor who provided the override must escort the member away from the register to complete Form 8300 while the member is present.
- Costco is required to verify the purchaser's identity and record the information in box 14. The identifying document information must include the (a) document type, (b) the issuer of the document, and (c) the document number.
- All boxes including box 8 Date of Birth, box 6 Social Security Number, box 13 Occupation must be completed.
- If the member is purchasing on behalf of another member, Part II must be completed.
- Merchandise cannot leave the building until IRS Form 8300 is complete.
- The completed form must be scanned and emailed to form8300@costco.com on the same day the transaction was completed.

Once completed, the form should be emailed to form8300@costco.com.

California locations must also mail the form to:

**Franchise Tax Board
P.O. Box 942857
Sacramento, CA 94257-0500**

It is not necessary to track all large purchases each day so that a series of transactions can be identified. However, if the same employee handles a series of cash transactions and is, therefore, aware of the previous cash transactions that day, the cashier should report these transactions to the IRS. With any large cash transactions, the cashier should always remain alert for the possibility that reporting a transaction may be required.

To help identify purchases subject to Form 8300 reporting, block **[B826 \$10K EXCEEDED, 8300 FORM REQUIRED]** will display if a cash payment over \$10,000 is applied in a single transaction. When the block is cleared, the total cash tendered by that member on that day will be displayed. If this block is displayed, the Supervisor is required to complete Form 8300 with respect to the transaction. An override will be required to complete the payment.

The Corporate Tax Department will also provide an annual statement to the person(s) for whom a Form 8300 was required. In order for Costco to comply with this reporting requirement, a copy of each completed Form 8300 should be emailed to form8300@costco.com on the same day the transaction was completed.

Copies of all completed forms should be maintained for seven years and should be filed by member name.

Note: If the member refuses to provide the required information, the transaction must be voided, the member must be refunded, and the merchandise must be returned to the sales floor.

ANTI-MONEY LAUNDERING

Report of Cash Transactions Over \$10,000 – (CN) (3/26)

Canada's Anti-Money Laundering (AML) laws apply to transactions involving precious metals, precious stones, or jewellery when certain conditions are met:

- **"Precious metal"** means gold, silver, palladium or platinum in the form of coins, bars, ingots or in any other similar form.
- **"Precious stones"** means diamonds, sapphires, emeralds and other high-value gemstones.
- **"Jewellery"** means objects that are made of precious metals and/or precious stones.

Canada's AML regulations require us to report large cash and suspicious transactions to the Financial Transactions and Reports Analysis Centre of Canada ("**FINTRAC**") under specific circumstances, as follows:

- A) **Large Cash Transaction Reporting**: We must report any transaction or multiple transactions within 24-hours that exceeds \$10,000 (including taxes) paid in cash for precious metals, precious stones or jewellery.
- B) **Suspicious Transaction Reporting**: We must report any transaction involving precious metals, precious stones or jewellery that appears suspicious or potentially linked to money laundering, terrorist financing or sanctions evasion, regardless of the transaction amount or whether the transaction was completed. See question #8 of the attached FAQs for examples of suspicious behaviour.

Warehouse Responsibilities

- **Forms**: Keep printed copies of the [Large Cash Transaction Form](#) and the [Suspicious Transaction Form](#) at the podium. Check the [Legal Intranet site](#) periodically to make sure you have the latest version of the forms. The completed forms must be retained for 5 years.
- **Stay Informed**: Ensure all front end employees are familiar with the reporting procedures and know where to find the applicable forms. Check the [Legal Intranet site](#) periodically to make sure you are aware of any changes to the reporting procedures.
- **Report Promptly**: If a transaction meets the reporting criteria, you must report it using the Google form [Precious Metals and Jewellery - Reporting](#) on the same day that the transaction occurred so that we can submit it to FINTRAC within our reporting deadlines.

Additional information can be found in the [Money Laundering Policy](#), available on the Legal Department's Intranet site. Email the Costco FINTRAC compliance team at fintrac.compliance@costco.com with any questions.

COUPONS

SECTION 11

COUPONS

Introduction

Costco offers a wide variety of coupons that can be used at the time of the member's purchase. These may come in the form of an IRC (Instant Rebate Coupon) which will have the coupon amount automatically deducted from the transaction total, or the coupon may need a bar code to be scanned in order to deduct the amount from the total. This section is meant to explain each type of coupon, and also explain how to assist a member if they request credit for a coupon they didn't originally receive.

Note: Costco does not accept manufacturer coupons.

Coupons redeemed prior to or after the validation dates printed on the coupon will be charged to the warehouse's margin and require an override. Vendors only honor those coupons used during the validation period.

Instant Rebate Coupons (IRCs) (8/03)

Instant Rebate coupons are coupons set up in the system to have a dollar amount automatically deducted from a specific item's sell price. A physical coupon is not needed for these items. When the item is scanned, the system will automatically link the coupon discount to the item and print the coupon information on the receipt tape.

Monthly Value Mailer (MVM) coupons (11/18)

Approximately once a month a new monthly value mailer will be issued to members advertising the coupon price for various items. All items in the MVM will be an IRC and does not require the coupon to be scanned.

Marketing Coupons (11/18)

The Marketing department will periodically offer coupons limited to only new members or members upgrading their membership. These coupons will have a separate barcode for each item, and each barcode will need to be scanned after the item is scanned and **<TOTAL>** is press in order to validate on the register. After these coupons are used, they should be destroyed at the register and never reused.

Note: Employee memberships are not eligible to use Marketing Coupons.

Tax on Coupons and Instant Rebates – (CN) (5/20)

Taxes are calculated differently on coupons versus instant rebates (often called temporary price discounts or TPD). For further information, refer to the [Tax on Coupons and Instant Rebates FAQ – CN](#).

COUPONS

Rain Checks (6/21)

Members who wish to purchase a coupon item that is out of stock may qualify to receive a rain check if applicable. Rain checks are honored for 30 days from the date issued and have no cash redemption value. Rain checks can only be redeemed at the issuing location.

Note: Rain checks may be honored up to 60 days in Canada from the date issued.

Issuing Rain Checks

- Scan the rain check trigger barcode on top of the rain check sheet using the **<QTY>** key if applicable.
- Scan the coupon barcode, either from the original paper coupon or from the rain check sheet.
- The trigger barcode must be scanned before each rain check item.
- The rain check receipt(s) will print at the end of the receipt.
- Notify the member that they must retain the rain check receipt and present it for redemption.

Issuing Rain Checks Separate Transaction

- Scan membership card, **<TOTAL>**
- Scan trigger barcode then item's redemption barcode. If quantity needed key in quantity first, **<QTY>**
- Message displays: **<TOTAL>**, **<0>**, **<CASH>**

Redeeming Rain Checks

- The member should have rain check receipt for processing.
- Scan the item.
- Scan the barcode on the rain check receipt.

Mail In Rebates (12/08)

After the merchandise receipt prints, a separate rebate receipt will print if applicable. The member can request the rebate via the US Mail or online at Costco.com (click on Rebates).

The date, warehouse number, membership number, transaction number and register number will print at the top of the receipt. Then the item number and description, rebate quantity purchased, rebate quantity limit, dollar value of each rebate and the expiration date will print.

Note: If three asterisk's (*) appear next to the item number, the original UPC code from the package must be mailed in with the submission form.**

COUPONS

Coupon Adjustments (06/24)

Occasionally members will request adjustments for items previously purchased that now have an IRC or have an IRC greater than at the time of the original purchase. When a member asks for a coupon adjustment for a previously purchased item, the member should have the original receipt for the qualifying item(s). If the original receipt is not present, the purchase may be researched in option WII by item number. The approved timeframe for adjustments in the warehouse is within 30 days from date of purchase. Costco's suppliers have agreed to honor coupons up to two weeks prior to the coupon start date and one week after. All coupon adjustments performed outside of that range will result in a direct margin loss to the warehouse.

Note: In the interest of member service, General Managers have the discretion to approve an adjustment beyond 30 days.

Due to known tax calculation issues, the preferred method for coupon adjustments is to use the [Adjustment Key](#). Coupon adjustments performed in "sale mode" will require a key flick for each individual coupon entered, where Adjustment mode will only require one key at the time of tender. **The supervisor performing the override must always verify that a member is present and receives the funds for the adjustment.**

Coupon Adjustments (Adjustment Mode):

- Scan Membership #
- **<ADJUSTMENT>** (sometimes labeled as Pre-Select Void)
- If original receipt is available, **<SLIP PRINT>** on
- **<VOID>**, scan/enter coupon
 - For multiple coupons, repeat as necessary
- **<TOTAL>**
- Select tender type, override will be required
- Slip print back of member's original receipt if applicable, and return to member
- Retain adjustment receipt, deface and attach to DRS (record date of original transaction if different day)

Coupon Adjustments (Sale Mode):

- Scan Membership #
- If original receipt is available, **<SLIP PRINT>** on
- Scan/key coupon, **<ENTER>**, override required
 - Repeat for multiple coupons
- **<TOTAL>**
- Select tender type
- Slip print back of member's original receipt if applicable, and return to member
- Retain adjustment receipt, deface and attach to DRS (record date of original transaction if different day)

Note: If a coupon does not scan at the register, a price adjustment may be performed.

COUPONS

Instant Rebate Coupon Price Adjustment (6/24)

If the price of an IRC has increased within 30 days of a member's purchase, an IRC price adjustment can be performed. Use Option IRCI or price verification (<6>, <SIGN ON>) on the register to obtain the coupon number of the current IRC. Use that number for the adjustment and override the price by the difference that is owed to the member. For example, if a member originally received a \$50 IRC, and has now increased to \$75, perform a coupon adjustment for \$25 using the new coupon number.

- Scan Membership #
- <ADJUSTMENT>
- <SLIP PRINT> on
- <VOID>, dollar amount owed to member, <PRICE>, current IRC number, <ENTER>
- <TOTAL>
- <SLIP PRINT> off, print adjustment on back of member's receipt if applicable, and return to member
- Select tender type, an override will be required
- Retain adjustment receipt, deface and attach to DRS (record date of original transaction if different day)

Note: Do not use original IRC numbers.

Bundled Instant Rebate Coupon Adjustment (5/23)

Bundled IRCs are IRCs that require the member to purchase specific items to qualify for a rebate. To ensure consistent handling of these adjustments, the following table should be consulted if the member is returning an item(s) that was part of a bundled IRC:

Member is returning:	Deduct IRC from refund?
All items	Yes
Items totaling more than half of the offer	Yes
Items totaling less than half of the offer	No

SUPERVISOR RESPONSIBILITIES

SECTION 12

SUPERVISOR RESPONSIBILITIES

Introduction (5/20)

In addition to the standard register functions there are several more supervisor responsibilities. This section will talk about the other tasks that supervisors should be aware of and may have to perform on a regular basis. This section will also outline some procedural issues that supervisors may encounter.

Overrides and Approvals (6/23)

Supervisor and Manager overrides serve to ensure a second person is involved with certain transactions. These reasons include but are not limited to:

- **Void Transactions:** Supervisor/manager involvement is required to void any transaction where the total does not equal zero. Void Transaction receipts with items rung must be defaced and affixed to the Daily Register Sheet, then forwarded to Sales Audit at closing. Supervisors/Managers should remain present to ensure the receipt is not handed to a member.
- **Department Rings/Price overrides:** Department rings bypass the item setup. An override is required to ensure the item is being rung at the appropriate price in the transaction. Price overrides will require an override to ensure that the price of any individual item is not being changed without a legitimate business reason.
- **Administration blocks on membership:** Supervisor/manager must ensure notes in the membership system are handled discreetly and that the block is removed once the issue is addressed.
- **Price/Coupon Adjustments:** An override is required to ensure a member is physically present and receives the appropriate amount of money. The overriding supervisor/manager must observe the entire transaction.
- **Membership system approvals:** Membership approvals serve to ensure Memberships are not fraudulently downgraded/cancelled, that the appropriate amount of membership fees are paid/refunded, and that member information is handled accurately (i.e. member blocks, expiration dates, etc.). As with register overrides, supervisor/manager must remain present until the membership transaction is complete. Further information regarding membership approvals may be found in the [Approval Prompts](#) job aid.
- **Manual keyed membership numbers (refund registers only):** Membership numbers should never be manually keyed when a membership card is available to be scanned. This is particularly important for refund transactions, as a supervisor/manager override is required to ensure the correct member is physically present and receiving the refund.

Note: Override codes and PINs should not be shared.

SUPERVISOR RESPONSIBILITIES

Register Blocks (1/25)

Item blocks are established in the register system to prevent the sale of specific merchandise or to require additional action related to the transaction.

“Do Not Sell” register block. The register will display the message “Do Not Sell” with the specific reason for the block as follows:

- **Pull and Hold:** The item is under evaluation/inspection and must not be sold. All remaining merchandise must be pulled from the sales floor and stored per instructions sent by Safety or Buying.
- **Recall/Defective:** The item has a safety or quality issue and must not be sold. All remaining merchandise must be pulled from the sales floor and stored per instructions sent by Safety or Buying.
- **Street Date:** A street date is the date set by the manufacturer or publisher as the first day a product may be sold. Items must not be sold, for any reason, prior to the street date. All remaining products must be removed from the sales floor and held until the street date.

Note: It is never acceptable to bypass a block on the register using a department ring.

Option ITMW will provide warehouse with detailed communication for pull and hold, recall/defective, and street date blocks. To research the details of the block press F19=Block in option ITMW and the details will display.

Supervisor Register Functions (5/22)

Supervisor operator models are less restricted than standard cashier models due to their authorization to provide overrides. There are several register functions that are restricted to Supervisors and Managers due to this authority. These register functions can be found in the [Supervisor Quick Reference Guide \(Supervisor Blue Book\)](#).

Duplicate Cashier Numbers for Supervisors and Managers (2/16)

Supervisor or managers may have only one operator number. If an employee is a combination supervisor/cashier, they must have only a supervisor number and their cashier number must be deleted. While working as a cashier, they must use their supervisor number. During seasonal supervisor periods, the seasonal supervisor’s cashier number must be deleted. Upon completion of the seasonal period, the supervisor number must be deleted and the cashier number re-created.

Monitoring Sales and Door Counts (7/03)

It is the responsibility of the front end management staff to monitor sales and member door counts throughout the day. Because the front end consumes a large percentage of warehouse payroll, it is important to constantly monitor sales, member needs and payroll. LSDT should be consistently monitored to ensure proper payroll hours are being used. LSDT is available to anyone with an AS400 sign on, however, this option is only available for the home warehouse. The dates may be altered and the sales date intervals can be viewed in 15, 30, or 60 minute intervals

SUPERVISOR RESPONSIBILITIES

Breaks and Lunches (12/04)

The issuance of breaks and lunches is a primary function of the front end management staff. It is imperative that all front end management personnel have a complete understanding of both the State and Federal laws regarding employee rest periods. In addition to State and Federal laws, where applicable, front end management must be aware of Union agreements and their implications regarding employee rest periods.

Running the Break Sheet (11/04)

Running the Break Sheet is a primary function of a front end supervisor. While running the Break Sheet, special attention should be made to door counts as this will translate to how many registers need to be open. Anticipate future needs and call for help before it is required. Close lanes and assign tasks at times of low business volume.

Export Compliance - (US) (12/23)

To ensure compliance with U.S. export laws, all transactions involving goods that will be exported require approval from Export Compliance prior to the sale or release of goods to the member. An order will be considered an export transaction if any of the following criteria is met:

- A member purchasing goods states the order will be shipped out of the country
- A member asks a warehouse to load an ocean container or truck for export
- The warehouse has knowledge that the order is for export
- A member submits an order by fax, phone, or email for shipment to a foreign country
- A business membership name lists one of the following keywords or words or similar meanings: International, Exports, Global, Trade, etc.

Before ringing an export transaction, approval must be obtained from the [Export Compliance Department](#). To obtain approval the warehouse must complete a Warehouse Request Form an Export Agreement Form, and Export Order Form for all transaction types. All Routed Transactions will also require an [Export Order Form](#) to be completed. These forms can be found on the Export Compliance site: [Resources](#). Once completed the forms must be emailed or faxed to the Export Compliance Department.

Export Compliance Department

Email: Exportcompliance@costco.com

Fax: (425) 313-2044

After approval is received from Export Compliance, the transaction can be processed and the merchandise can be released to the member.

Note: Every export transaction requires a new set of documents and approval from Export Compliance.

SUPERVISOR RESPONSIBILITIES

Export Compliance (US) (cont.)

Standard Transaction vs. Routed Transaction

A **standard export transaction** applies to members who are physically present in the warehouse at the time of the transaction or who have a valid U.S. residential or business address in the membership system.

A **routed export transaction** applies to a member that does not have a U.S. presence and is not physically present in the U.S. at the time of transaction.

Export Documents

No documentation should be signed for the member or the member's carrier. This includes bills of lading, trucker's receipts, certificates of origin, or export documents. The only documents that should be given to the member are register receipts, a copy of any HazMat issues, the Routed Export Transaction Detail (if it is a routed transaction) and, if requested, a copy of the Agreement for Goods Purchased for Export.

The warehouse must not give out Costco's tax identification number to members or freight forwarders/agent requesting it. If it is a routed transaction this information will be supplied on the Routed Export Transaction Detail sheet.

Export Compliance (CN) (4/21)

It is company policy and part of Costco's code of ethics to obey the law. This includes complying with all Canadian export laws. Export compliance procedures apply anytime a member makes a purchase or places an order (by fax, email, etc.) that is destined for a foreign country or that the warehouse knows is for export from Canada. These procedures also apply anytime a member asks a warehouse to load an ocean container or truck.

Note: Locations may never arrange transportation for a member exporting goods from Canada.

Before ringing an export transaction, locations must complete the following the export compliance forms located on the [Canada Customs Compliance](#) site:

- [Warehouse/Business Centre Agreement for Goods Purchased For Export](#) - This form must be accompanied by an item list including the item number, item description, and quantity of each item and the total dollar value of the export transaction
- [Warehouse/Business Centre Request for Clearance to Sell Goods for Export](#) – This contract must be signed and dated by both a Costco representative and by the member

Note: These forms can be obtained by emailing canadacompliance@costco.com

SUPERVISOR RESPONSIBILITIES

Export Compliance (CN) (cont.)

Once the forms are completed they must be emailed to Canada Customs Compliance at canadacompliance@costco.com for approval. Customs Compliance will send the forms to the appropriate buying departments and will return the signed request for the transaction, either approving or rejecting the request. The warehouse must ensure Customs Compliance has confirmed all items can be exported prior to finalizing the sale. All denied items must be removed from the order.

The entire approval process takes approximately 24 – 48 hours to complete. If the buying department must order the stock, the process will take longer. To avoid delays, ensure all information on the export forms are complete and legible.

The warehouse cannot sign any documents for the member, or from the trucker or carrier, including bills of lading, trucker's receipt, certificates of origin, or export documents. If Costco loads the goods, the member or their representative must be present at the warehouse.

The only documents to be given to the member is a register receipt, and if requested, a copy of the Agreement for Goods Purchased for Export. The warehouse must not give out Costco's tax identification number to members or freight forwarders / agents.

Credit Card Security (5/24)

Costco collects credit card information for a number of circumstances; fax and pull, salvage payments, and kiosk orders are the most common. When accepting, storing, and tendering credit card numbers for members not present certain security measures must be taken to ensure neither Costco nor the member is put at undue risk. Physical credit cards should never be kept on file for members to use.

Warehouses should only keep credit card numbers on file when it is necessary to do so. When initially obtaining credit card information members are required to supply the credit card in person. Credit card security codes (CVV) should never be retained. As a general rule, credit card information should not be taken via phone or fax. The warehouse should complete the Credit Card Retention form ([Form #FE01](#)), including a copy of the front side of the credit card, and store the form in a binder. The binder must be secured in the EDP room. Access to the credit card binder should be limited to supervisors or managers that need it to do their job. The binder must never be left unattended and must be immediately returned to EDP when no longer needed.

The credit card forms in the binder must be audited every month and only those being actively used should remain on file. Copies of credit cards stored for members that haven't been used within 3 months must be destroyed using a cross-cut shredder or stored in a locked bin provided and picked up by Recall. If it becomes necessary to store the member's credit card information again, a new Credit Card Retention form ([Form #FE01](#)) must be completed.

Note: Credit card numbers should never be emailed or stored outside of the credit card binder.

SUPERVISOR RESPONSIBILITIES

Credit Card Security (cont.)

Fax & Pull

Members participating in warehouse fax and pull programs must have their credit card information and signature on file on the Credit Card Retention form ([Form #FE01](#)).

Special Order Kiosk

Kiosk order forms with visible credit card numbers must be kept secure at all times. After the order has been keyed the card number should be blacked out before a copy is made and the original is shredded. Procedures memos specific to Special Order Kiosk forms were sent to both [US](#) and [Canada](#).

Salvage Vendors

Credit card information on file for active salvage companies must be kept secure. If the salvage company is not actively being used, delete the company in SVC and shred the credit card information.

Note: As an EMV enabled retailer, Costco is exposed to minimal liability in cases of chargebacks. However, if a card is manually keyed, Costco is fully liable if a member disputes the charge. See the [EMV Contactless Payments](#) section for more information.

Payment for High Volume Special Orders (2/20)

On occasion a warehouse may special order merchandise that is not regularly stocked, specifically for a high volume member. When this type of order is placed, a deposit should be obtained from the member prior to placing the order. Because accounting rules do not allow merchandise to be rung through the register before it has been received, item number 1408983 has been set up for this purpose. This item number must be used any time payment is taken in advance of the warehouse receiving the merchandise. If a member requests an item that is not currently carried, is on coupon or other temporary discount, or is in excess of \$10,000, the order must be approved by the Regional Operations Manager and the GMM of buying.

The deposit amount is typically 25% for large quantities of items normally carried at the warehouse. If the member requests an item that is not currently carried at the warehouse, the member may be required to pay 100% of the purchase price before the order is placed with the buyer. Only the Warehouse Manager can waive the deposit.

Special order deposits may be prepaid using a check, debit, cash, credit card, or wire transfer from the business member's bank account to Costco's bank account. If payment is made by wire transfer, please follow the procedures in the [Wire Transfer of Funds Memo – US](#) or [Wire Transfer of Funds Memo – CN](#).

SUPERVISOR RESPONSIBILITIES

Payment for High Volume Special Orders (cont.)

Processing the Deposit

When the special order is placed with the buyer, a deposit of at least 25% of the total purchase price should be obtained from the member. If the deposit is less than \$1,000.00, the member must pay with cash, debit, credit, or check, not wire transfer.

- Scan or key membership number and press **<SLIP PRINT>**
- Key in item #1408983, **<ENTER>**. Enter the deposit amount when prompted
- **<TOTAL>**. Tender the order following established procedures.
- When prompted to slip print, insert a **Prepaid Merchandise Deposit Form (#FE77)**

Note: Only the Warehouse Manager may waive the deposit. The order may be pre-paid in full, but the pre-paid item number must still be used to avoid an impact to inventory.

Processing the Order

When the merchandise is received in the warehouse, the order may be rung through the front end. After ringing all of the merchandise, it will be necessary to void the original deposit amount using the deposit item number. Both the positive sale of merchandise and the voided deposit must be done on the same order.

- Scan or key membership number
- **<SLIP PRINT>**, scan or key special order merchandise
- **<VOID>**, item #1408983, **<ENTER>**. When prompted for price, enter the amount of the original deposit. Override will be required
- **<TOTAL>**. Tender the order following established procedures.
- When prompted to slip print, insert a Prepaid Merchandise Deposit Form ([#FE77](#))

Note: For both the deposit and the final payment, the Prepaid Transaction Slip ([#FE77](#)) must be forwarded to sales audit.

Wire Transfers (2/20)

Occasionally members will request to pay for their order using a wire transfer. All wire transfers must be handled through Costco's Treasury Department and not between the member and the warehouse. Warehouses may contact the Treasury Department at (425) 427-7700. The status of a wire transfer can be checked at the following site: [Treasury Wire Transfer Status](#).

Once the wire transfer has been approved, the transaction should be rung through the register and tendered as a refund credit: **<2>**, **</>**, **<\$ Amount>**, **<MISC TENDER>**. When prompted for a control number, the warehouse number should be entered. When prompted to slip print a document, a Prepaid Merchandise Deposit Form ([#FE77](#)) should be used. Forward the Prepaid Merchandise Deposit Form and backup documentation to the vault.

SUPERVISOR RESPONSIBILITIES

Merchandise Price Check (2/25)

Merchandise price checks are no longer required for single item purchases or returns of \$300 or more. Although, the item price will print in inverse bold on the receipt, a supervisor or manager signature is not required. The price will continue to print in inverse bold to aid member service when checking receipts.

Merchandise Pickup Procedures (11/23)

For security reasons, some merchandise must be kept in a locked area. This merchandise is displayed and must be purchased using a **Merchandise Pickup Slip (Form [#MR04](#))**, or by scanning an empty (dummy) carton or blister pack.

The member fills out the Merchandise Pickup Slip with the item number, description, and quantity. The member presents the Merchandise Pickup Slip to the cashier at the register. The cashier should slip print on the back (blank side up) of the Merchandise Pickup Slip, and then notify a supervisor or manager to pick up the item from the MPU cage. When a merchandise pickup is requested, the supervisor or the employee responsible for the merchandise pickup cage **must**:

- Check the description printed on the Merchandise Pickup Slip and the item number on the register receipt to ensure they are the same and verify quantities.
- Verify with the member that this is the correct item.
- Initial the member's receipt to indicate transfer of merchandise to the member after inspecting the item in front of the member.

Sale of Jewelry (9/25)

- Jewelry items will be packaged in boxes that are either individually shrink-wrapped or have a security sticker attached. An article of description is included with each box.
- Unwrap the plastic wrap for all jewelry in front of member to verify the merchandise.
- All diamonds of .20ct or larger must be tested with a diamond tester before being given to the member.
- Initial the member's receipt to indicate transfer of merchandise to the member.

When a member wants to purchase a merchandise pickup item that is not available in back stock the member should be told the merchandise available is a display item. Follow established procedures for purchasing display items.

Members purchasing jewelry items with a single diamond of 1.00ct or larger must be advised of the refund policy at the time they purchase the item and that all important documents included in the sale must be returned alongside the item. If they decide to return the jewelry item, it will be sent to a Costco facility to verify it is a genuine diamond before any immediate refund is processed. This applies to items originally purchased in the warehouse and through E-Commerce. After several days, the warehouse will be notified if the return will be approved. The warehouse should call the member to make arrangements to come into the warehouse to complete the refund. If the member prefers, a check can be mailed to them.

SUPERVISOR RESPONSIBILITIES

High End Watches (US) (6/18)

Watches valued at \$4999.99 or more will require an override when sold. The supervisor or manager who performs the override must record the transaction in AS400 option SNM. Once the transaction has been recorded the supervisor or manager should initial the Verified Serial # line on the receipt. To record the sale in option SNM:

- Sign onto an AS400 and enter SNM
- Select transaction type A for Sale
- Key the item number and press **<Enter>**
- Put cursor in the serial number field and press **<F4>**
Only available serial numbers will display.
- Key an X in the Sel field to select the serial number
- Verify the serial number listed to the watch and paperwork
- Key the member number in the Member # field
- Key an A in the Add Note field, if desired
- Press **<F8>** to Accept
- The note field is available after **<F8>** has been pressed
- Key notes if needed, then press **<F8>** to Accept

Buy Online and Pick up in Warehouse (2/25)

Buy Online Pickup in Warehouse is available for both ecom and warehouse inventory and provides additional convenience for members making certain Costco.com purchases.

Ecom Fulfilled Orders

This option allows members to purchase certain laptops, handbags, and jewelry items online and have them shipped to a member-designated warehouse for pick up. Since the member is paying Costco.com, the items will not be received into warehouse inventory. The packages will be processed as a UPS shipment and moved to a secure area in the Merchandise Pick Up cage. MPU should have a dedicated section where all packages awaiting member pick up are stored.

Checking in Items

When these packages are delivered to the warehouse, they must be immediately given to a supervisor or manager to secure in MPU. Before securing the items in the MPU cage the front end supervisor or manager must check in the item using a new function key in Option EOI - F9 = Member Pickup. This process will trigger an email to the member indicating the item is in the warehouse and ready for pick up.

- Access Option EOI and enter the order number found on the shipping label
- Select F9 = Member Pickup
- The tracking numbers for the items shipped to warehouse will display. The person checking-in the prepaid item must verify the tracking number showing in EOI matches the UPS tracking number on the exterior label. Once the tracking number is confirmed use 1 = Check In to accept the package and select ENTER. Enter comments, including the name of the employee checking the package in. If the package is being stored in a location other than MPU, the location should be indicated in comments as well. Select F8 = Confirm Update.

SUPERVISOR RESPONSIBILITIES

Buy Online and Pickup in Warehouse (cont.)

Note: Packages shipped to warehouse should not be opened by warehouse staff for inspection prior to being given to the member.

Member Pickup

When the member arrives for pick up, member service should direct the member to go directly to MPU. A supervisor or manager must verify the order confirmation email (an image on the member's cell phone is acceptable), and member's photo ID. The order must be accessed again in Option EOI and F9 selected.

To indicate the package is being picked up by the member select 2 = Pickup and select ENTER. Enter comments including the membership number of the member picking up the order and the name of the employee. Select F8 = Confirm Update. This process will trigger a receipt to print on the printer associated with the workstation, which should be given to the member. The pickup process also removes the item from any aging reports and ensures that Ecom will not initiate the return process for aging items.

Warehouse Fulfilled Orders

Members that have their home warehouse set to participating locations have the ability to purchase Costco.com items currently in inventory and pick them up at the warehouse. Warehouses need to check for new Buy Online Pickup in Warehouse (BOPIW) orders via the Manhattan Active Omni (MAO) platform.

Manhattan Active Omni (MAO)

MAO is a program that can be found on thin clients via MyApps (titled Store – MAO), and on all RF Scanners.

Same Day Pickup and Warehouse Inventory

When warehouse merchandise is ordered online, a pending authorization will be applied to the member's credit card. Upon acknowledgment of the pick by the warehouse, the member will be charged and inventory will be moved to ecom. If the order is placed prior to 4pm local time, the member will be notified that same day pickup is available. Any orders not acknowledged by the warehouse within 4 hours will be automatically canceled. When new orders are submitted, staff management and above, majors, assistant front end managers and inventory audit will be notified via email.

To ensure there is adequate inventory of available items, Buying will maintain a minimum threshold that must be met in order to allow purchase of the item. Items with low inventory will not be available for purchase. In the event that an order is successfully placed and the item is out of stock, the warehouse will have the ability to cancel the order via the MAO platform.

SUPERVISOR RESPONSIBILITIES

Buy Online and Pickup in Warehouse (cont.)

Staging Locations / Member Pickup

Warehouses should designate a staging location away from the sales floor for all same day orders. Upon an order being picked, the member will receive a notification that their order is ready for pickup directing them to the Front End. The merchandise should be retrieved from the staging location and pickup confirmed in MAO. Once confirmed, a receipt will print from the Zebra printer that the member can use to exit the warehouse.

If the item is not picked up by the member within 72 hours, the order will be canceled, member refunded, and inventory transferred back to the warehouse. If an error occurs during printing, the receipt can be printed via the report printer. In which case, the receipt must be initialed by a manager.

Note: It is imperative that the order is confirmed in MAO when the member arrives for pickup. Failure to do so will cause the order to cancel after 72 hours, refunding the member and causing inventory discrepancies.

Member Orders

If the member wishes to cancel any portion of their order, cancellations can be processed in MAO prior to confirming the pickup and printing a receipt. In these instances, ecom will handle the refund and the merchandise can be placed back on the sales floor.

Note: Same day orders are only visible in EOI on the day of purchase. Orders will appear in WII the following day.

Returned Immediate Action Items (12/25)

Returned immediate action items such as propane tanks, gasoline powered devices and MPU/lockup items should be addressed immediately after refund. A supervisor should be notified as soon as an item is returned for immediate removal from refunds. Immediate Action items may include:

- Item not present refunds
- Automotive batteries and other hazmat items
- Items containing gasoline
- Propane tanks
- Lockup/MPU items
- Bulky/unsightly items

Merchandise Exchanges (4/21)

For security reasons, merchandise exchanges should not be done, however, if an exception is granted by the warehouse manager, the authorizing manager should monitor the merchandise being brought past the register (point of sale) and exiting the warehouse. The approving manager must have a Disposition/Adjustment Tag (Form [#MB09](#)) completed for the exchanged merchandise and must ensure the exchanged merchandise is immediately taken to RTV and not left in the membership department.

SUPERVISOR RESPONSIBILITIES

Lost and Left Items (5/21)

If paid merchandise is left behind by a member (i.e. found in the parking lot) it must be immediately turned into a supervisor or manager. Warehouses are responsible for maintaining a record of these items, however, they may not be written on the Destroy Log.

Note: This merchandise must never be kept behind the refund counter.

Door Audits (3/24)

Member service employees audit receipts as members exit the warehouse. This process is referred to as door auditing and is primarily used to identify errors made by front end cashiers at the register before members leave the building. When an error is identified, it is the responsibility of the member service employee to notify a front end supervisor as quickly as possible. The following steps should be followed for cash adjustments:

- Scan membership card
- **<SLIP PRINT>**
- **<VOID>**, key in the item number, **<ENTER>**, override required
- Repeat the above steps for additional items as needed
- **<TOTAL>**
- Tender transaction
- When prompted to slip print, insert the member's receipt into the printer upside down so the correction will print on the original receipt

The adjustment receipt should be attached to the daily register sheet (DRS, RDRS) and forwarded to sales audit. Record the date of the original transaction if different.

Refer to the Other Responsibilities section of the [Member Service Manual](#) for more information.

Price Adjustment (2/25)

Occasionally a member may request a refund for a price difference when an item has been marked down. The approval of price adjustments should be limited to 30 days after the original date of purchase. Warehouse Managers may make exceptions for member service situations. All price overrides, regardless of sell price, will create item movement.

Note: Due to known tax calculation issues, the preferred method for price adjustments is to use the [Adjustment Key](#).

SUPERVISOR RESPONSIBILITIES

Price Adjustment (cont.)

Keying Price Adjustment (Adjustment Mode):

- Verify price paid
- Scan membership card, <SLIP PRINT> if receipt is available
- <ADJUSTMENT>
- Enter dollar amount from original transaction, <PRICE>
- Scan or key item number of merchandise to be adjusted; if keyed press <ENTER>.
- <VOID>, scan or enter item number (at current price)
- <TOTAL>, supervisor override required.
- Tender the transaction.
- Slip print on the back of the member's original receipt, if available.
- Record the original date of purchase on the adjustment receipt and attach the receipt to the RDRS.

Note: Instructions on how to perform an adjustment on a special order items (e.g. hearing aids, roadshow items etc.) can be found in the [Adjustments on Special Order Item](#) job aid.

Government Contracts (1/16)

Limits on Federal Government Sales

While Costco welcomes the United States Government as a member, Costco will not accept certain levels of government purchasing that require extensive recordkeeping and reporting. Costco's policy is that any purchase by someone using a US government credit card or check OR any purchase by the US government and/or military personnel for use by the government may not equal or exceed \$50,000. Item selection available for sale to governmental entities is limited to items Costco sells in the warehouse, online or through Business Delivery. Warehouses are not to attempt to procure items not generally sold by Costco for the purpose of making sales to governmental entities.

Government Sales – Method of Payment

Any agency of the federal government must pay for its purchases either with a federal procurement card or on a cash and carry basis. Purchase order programs may be used for non-federal governmental purchasers.

Requests for Proposals

Responses to Requests for Proposals (also known as RFPs) should not be submitted unless they have been cleared by Derek Snead in the Legal Department. Legal can only review responses to RFPs that have been completely filled out by the warehouse.

Price Accuracy – (US) (Non-Michigan Locations) 2/24

In the event a member says they were overcharged for an item based on the posted price, the price and description on the sign should be validated against what the member paid. The member should be compensated if an overcharge occurred by performing a [price adjustment](#).

Note: In Arizona, a written policy must be available to members upon request. The following Legal Document can be used in those situations ([AZ-Price Accuracy Policy](#)).

SUPERVISOR RESPONSIBILITIES

Michigan Pricing Discrepancies (05/25)

In the state of Michigan, when the price of an item on the register is higher than the price of the marked price of the item, the member is owed the difference between the two prices plus a cash settlement. The settlement is calculated by taking the difference of the two prices and multiplying by ten. However, the settlement must be a minimum of \$1 and a maximum of \$5. Determine the overage, multiply by 10. If the result is over the maximum, the member is entitled to \$5.

Processing the Settlement

The settlement can be processed on the adjustment register as a void, or on a refund register in positive mode as a void, using item #26982. This item is a prompt for price item, and will require an override when voided. The transaction must be logged on the Daily Register Sheet following all established cash adjustment procedures.

- **<SLIP PRINT>**
- **<VOID>**
- Key proper adjustment item # **<ENTER>**,
- Key in the correct settlement amount, **<ENTER>** override required
- **<CREDIT/DEBIT>** or **<CASH>**, print on the back of the member's original receipt

National Scanner Price Accuracy Voluntary Code (CN) (4/25)

Scanner Price Accuracy Code will be increased to \$15 in Quebec locations. All other locations will remain at the \$10 threshold.

- If the item is less than \$10.00, the member will receive the item free.
- If the item is more than \$10.00, the member will receive the posted price plus a \$10.00 discount.
- The member will pay tax applied to the merchandise at the discounted price.

Register Adjustments

When an error is discovered during a transaction, charge the member the price that is in the register system. In the same transaction, use one of three item #'s for the adjustment. Each item number should be used in the following circumstances:

- **#26982** - the item is non-taxable
- **#326982** - tax category H or GP, located in the right hand margin of the receipt
- **#426982** - tax category G
- **#4426982**-tax category QST

Item less than \$10.00

- **<SLIP PRINT>**
- **<VOID>**
- Price charged to member **<PRICE>**
- Key proper adjustment item # **<ENTER>**, override required
- **<CASH>**, **<CASH>**, print on the back of the member's original receipt

SUPERVISOR RESPONSIBILITIES

National Scanner Price Accuracy Voluntary Code (CN) (cont.)

Item more than \$10.00

- <SLIP PRINT>
- <VOID> Original item #
- Correct price <PRICE>, item # <ENTER>, override required
- <VOID>, \$10.00 <PRICE>
- Key proper adjustment # <ENTER>
- <CASH>, <CASH>, print on the back of the member's original receipt

Log the transaction on the Daily Register Sheet or Refunds Daily Register Sheet.

Note: If the member purchases more than one quantity of the item that has the price discrepancy, they should be charged the lower price for all of the items. However, the free item or \$10.00 discount is only required to be given for one item.

The requirement of the free item or \$10.00 rebate does not apply to items that are subject to minimum pricing requirements which vary by province.

Supervisor Procedures Checklist (01/26)

The Supervisor Procedures Checklist ([Form FE68](#)) must be completed daily. The Supervisor Procedures Checklist can be found on the Front End section of the Forms Library. The form should be kept in a binder. Every Monday morning a new checklist should be started with the week ending date recorded. Each task should be signed off by the completing supervisor. Completed forms must be retained for six (6) months.

The checklist is broken into three sections; Daily (completed any time), opening and closing.

Daily – PIN Pad Inspections

See [PIN Pad & ATM Inspections](#) for more information.

Daily - Outside Observer

Thirty minutes prior to closing, one employee, who is not the staff or duty manager, should be staged away from the building as an isolated observer. This outside observer should be in an automobile, doors locked, with a clear view of the entry doors and sides of the building. The observer must perform perimeter building checks while remaining in their automobile and remain until the last manager or employee exits the building. Additional information can be found in the [Loss Prevention Manual](#).

Daily/Closing - Member Facing Device Inspection

Numerous IT approved devices (iPads, Ecom Kiosks, etc.) are in use throughout the location to enter member information or allow members to conduct online purchases. These member facing devices must be inspected daily to ensure they are secure, charging and functional. At closing, these devices must be accounted for, charging and secured nightly.

Opening - Verify Cash Recycler is Operational

Prior to opening, the opening supervisor must verify that the cash recycler is operational and able to dispense tills.

SUPERVISOR RESPONSIBILITIES

Supervisor Procedures Checklist (cont.)

Opening - Daily Receipt Security Code (9/24)

To assist in identifying fraudulent receipts a random two-character receipt security code is generated every day. This code will appear on the receipt in the same line as the membership number as well as in bold on the bottom of the receipt along with the total item count, transaction date and time. Additional information can be found in the [Member Service and Loss Prevention Manual](#).

To view the current day's security code:

- Sign-on to any register
- **<NO SALE>**
- **<TOTAL>**

The day's security code will appear in the bottom left section of the receipt.

Closing - Daily Paperwork

Daily paperwork such as resale and alcohol cards, daily register sheets, etc. are collected with the appropriate receipts attached and are forwarded to sales audit nightly.

Closing - Verify Tills Deposited/Checked-In

All tills must be deposited into the cash recycler or returned to the vault after the last member leaves the building and the exit door is closed. To verify all tills have been deposited into the cash recycler the Register Checked Out Report should be viewed.

To view the Registers Checked Out Report:

- Reports
 - or +Costco Reports (SUZO)
- Registers Checked Out
 - Displays registers that have dispensed Start of Day Loans, but did not have a Closing Till pick up completed
 - Deposit any till that is still checked out
 - If the till has been checked in, but is showing on the Registers Checked Out Report perform a Closing Till pick up and select done. This will close the till.

The Registers Checked Out Report can also be used throughout the day to help determine if the appropriate number of tills are still in use. Tills still in registers that will not be used for the remainder of the day should be closed.

Note: All tills should be physically verified and accounted for in addition to running the Registers Checked Out Report.

Closing - Refunds

Closing supervisors must ensure all refunded merchandise is removed from the refunds area.

SUPERVISOR RESPONSIBILITIES

Supervisor Procedures Checklist (cont.)

Closing - RF Scanners

RF Scanners must not be left unattended on a counter, receiving desk, forklift, etc. These devices need to be stored in a way that prevents unauthorized access to them. When not in use, scanners may be stored in any secure area, such as MPU, EDP or another secure location.

To further prevent unauthorized access, employees must sign off scanners when they are not in use. Due to security protocols all RF scanners will automatically have their license revoked if they lose connection to the network for more than 48 hours. Once the license is revoked, the RF scanner will lose all functionality and the Service Desk (425-313-8001) must be called to reinstate the license. To prevent this, supervisors must ensure all RF scanners are accounted for and charging.

Closing - Close All Standalone Terminals (CN)

All standalone terminals must be closed nightly. Instructions can be found on the [Closing Standalones - CN](#) job aid.

PIN Pad & ATM Inspection (01/26)

As part of their daily duties, front end supervisors must inspect all PIN pads, standalones and the ATM for evidence of tampering. All questions on the PIN Pad / ATM Inspection Form in Formworx must be completed.

Note: Only Costco personnel are authorized to work on PIN pads or standalones. Any suspicious behavior on or near PIN pads should be immediately reported to management.

Standalone

Standalones are point of sale devices that operate independently from Costco's payment network and communicate directly with our payment processor to accept Electronic Fund Transfer (EFT) payments. All standalones must be secured in a locking stand or be in the control of an employee at all times when in use. Standalone devices not secured in a locking stand must be secured in EDP when not in use. Standalones are included in the onsite count section of the PIN Pad / ATM Inspection Log.

PIN Pad Anti-Skimmer Brackets

An anti-skimmer bracket attaches to the bottom of the PIN pad mount, adding an obstruction to prevent an overlay or skimmer from being affixed to the PIN pad.

Anti-Skimmer Bumpers and Security Seals

Anti-skimmer bumpers (Costco "C") are no longer required. The bumpers on the PIN pads may be left in place, as removing them could leave a sticky residue. However, once removed, they should not be replaced.

Security Seals

All security seals (silver security seals or red gas station seals) previously placed on PIN pads and standalones should be removed.

SUPERVISOR RESPONSIBILITIES

PIN Pad and ATM Inspection (cont.)

Privacy Shields

A privacy shield on the PIN pad creates a physical barrier designed to block the view of the numbers being pressed when a user enters their PIN. These shields have been used to disguise overlays and must be removed from all PIN pads.

Spare PIN Pads

Spare PIN pads must be maintained in a locked EDP room. The quantity of spare PIN pads must be included in the on-site count section of the PIN Pad / ATM Inspection Log.

Master PIN Pad List

All warehouses must maintain a current Master PIN Pad Inventory List. The list includes all PIN pads and standalones. The location of all PIN pads, including spares, standalones and out for repair units, must be logged on the list. The Master PIN Pad Inventory list can be obtained via a CARTS+ request. To access:

- Sign onto [CARTS+](#)
- Select Knowledge
- Search “PIN Pad Report for Warehouse Users”
- Under the procedure section, click the “HERE” link

Note: The Master PIN Pad Inventory List, spare PIN pads and standalones must be kept together in a locked EDP room.

PIN Pad Discrepancies

If there is a discrepancy between the Master PIN Pad Inventory List total and the total quantity of PIN pads, including spares, standalones and out for repair units, you must reconcile the actual on site/out for repair count to the Master PIN Pad Inventory List by serial number. If a device is missing, if there is evidence of tampering, or if there are devices in the building not listed on the Master PIN Pad Inventory List, notify the warehouse manager immediately and contact the Service Desk at (425) 313-8001.

Note: The key to the PIN pad locking stands should be kept in a lock box accessible only to staff managers and above.

ATM

The ATM is to be inspected daily. The area where cards are inserted into the ATM must be carefully inspected visually using a flashlight. The visual inspection is to confirm no shimmers, skimmers or cameras are present. If the visual inspection reveals anything out of the ordinary, a plastic card (name badge, SCO card, etc.) can be inserted into the card reader. If a shimmer is present, the insertion and removal of the card may not be smooth and may feel sticky in spots. If any shimmers, skimmers or cameras are found, the ATM must immediately be taken out of service and reported to the Regional Loss Prevention Manager (RLPM), Banking Operations and Regional VP. Any member complaints in regards to using the ATM must also be reported to the RLPM and Banking Operations. Further information regarding ATM inspections can be found in the [ATM Security](#) memo.

SUPERVISOR RESPONSIBILITIES

Additional Closing Supervisor Responsibilities (5/23)

The closing front end supervisor's responsibilities may vary by warehouse and reflect front end and warehouse managers' priorities. In general, the closing front end supervisor must ensure that all members are processed through the front end as quickly as possible after the scheduled closing.

The closing supervisor should ensure that the following tasks are completed:

Closing Tasks
Retrieving shopping carts, flatbed carts, and trash from the parking lot.
Collecting and storing floor mats from the registers.
Stocking the check stands with necessary materials and supplies.
Washing and sanitizing all the check stands and register equipment.
Returning go backs to the sales floor.
Placing RTV merchandise in the appropriate area.
Assigning a front end cashier to collect all register paperwork and receipt tapes, place all paperwork in a storage box on sales audit's desk.

The closing supervisor should ensure all daily paperwork is collected and distributed:

Forward to Vault:	Forward to Sales Audit:
P.O. Tenders	Daily Register Sheets
Coupons	Resale Cards
	Alcohol/Tobacco Audit Forms
	Special Order Forms
	Standalone detail and day close reports

Alarms and Employee Exit (11/20)

After the last member leaves, all perimeter alarms must be set. One door may be bypassed if a local audible alarm is installed and activated. Throughout the night, permit employees to exit as soon as it is safe for them to do so.

All security controls should be in place for employees exiting (lunch boxes, briefcases, bags checked, etc.). Where safety or security concerns require delays in employees exiting, have them do "go backs" and use the time clock or exception log to claim compensation for delays. An exception log should be kept near the exit door nightly. Additional information is available in the [Loss Prevention Manual](#).

SUPERVISOR RESPONSIBILITIES

Pulling Jewelry (12/21)

In an attempt to limit Costco's exposure to burglaries, jewelry items over \$10,000 need to be pulled from the jewelry case, logged on the Jewelry Pull Log ([Form #FE03](#)), and stored in the vault.

- Management will assign two individuals, one must be a manager, to pull jewelry at night and replace it in the morning.
- The manager putting these items into the case in the morning will initial the Jewelry Pull Log "MGR AM" column after verifying the items are present.
- At closing, the manager responsible for pulling jewelry will initial the "MGR PM" column for each item pulled.
- The closing vault clerk or additional witness also needs to initial the "WITNESS" columns after receiving the pulled jewelry items in the vault.
- New jewelry items over \$10,000 should be added to the list as they are received and notated as sold on that column date. Similarly, any item marked as present at closing should be researched if missing at opening. If the number of items exceeds the space available on the log, additional logs can be used.

Note: The removal and replacement of jewelry from the cases should not begin unless the building is secured

Destroy Log (12/25)

Destroyed Merchandise Logs

Destroy Logs are system generated forms used to communicate merchandise not physically present that needs to be removed from inventory by RTV. Each destroy log is assigned a specific tracking number and must be accounted for. If a destroy log is full (front and back), a Staff Level manager or RTV clerk can print more logs as needed.

Spoiled or damaged items near the refunds counter that are not part of a refund can also be added to the membership destroy log to ensure proper inventory movement. Only items without a label should be written on the log to avoid double keying by RTV. If items are hand written on the destroy log, the item number must always be used to ensure accurate inventory movement. Before handling these items, ensure option STOP has been checked for disposal instructions. Items requiring specific disposal should be taken to RTV and not written on the log.

Note: Overcharges and adjustments should only be processed as voids in "sale" mode at refunds and never as refunds. Processing as a refund and affixing the label to the destroy log will cause item movement twice and shrink for the warehouse. Voids processed at refunds should never be keyed by RTV.

SUPERVISOR RESPONSIBILITIES

Destroy Log (cont.)

Types of Labels Affixed to the Destroy Log:

- **Perishable items:** If a perishable item is returned, the disposition tag must be placed on the destroy log.
- **Return of Service:** Sometimes refunds will be issued for services provided (inkjet refills, propane refills). These should be processed as “item not present.”
- **No Product Returns:** The supervisor who gave the override must place the label on the destroy log with the following exceptions: Department 44 special event refunds and Tire Center invoice refunds. Department 44 refunds should be forwarded to Inventory Audit rather than affixed to the destroy log. Tire returns should be affixed to the invoice and forwarded to RTV, automotive battery returns processed through the invoicing system should be affixed to the physical battery in the Tire Center.

Note: Only Supervisors/Managers can place a label on the destroy log.

For further destroy log questions refer to the [Merchandise Destroy Log](#) job aid.

No Item Present Returns (12/25)

On occasion, members will request refunds for items not physically present. A common example is when perishable items like produce or meat, which may have spoiled, get thrown away by the member before requesting a refund. This also includes items that do not physically exist (AppleCare+, extended warranties for electronics/white goods) or services like propane tank refills, as the member is requesting a refund for the service, not the product. The refund clerk will toggle on “No Item Present” and process the item. An override is required at the end of a *No Item Present* transaction. The supervisor who provided the override must affix the “No Item Present” label to the Destroyed Merchandise Log.

Cashiers are not authorized to place refund labels on the Destroyed Merchandise Log. A supervisor must place the label on the Destroyed Merchandise Log.

MAINTENANCE AND TROUBLESHOOTING

SECTION 13

MAINTENANCE AND TROUBLESHOOTING

Introduction

The Maintenance and Troubleshooting section of this manual is meant to show how to fix and avoid common issues on the front end. This section will explain how to handle hardware not working, or explain how to handle an item that is not scanning on the register. This section will also explain maintenance techniques that will prevent unnecessary breakdowns of hardware.

MAINTENANCE AND TROUBLESHOOTING

Register Service (12/04)

Warehouses are charged for maintenance on an “activity basis” (per service fee) each visit. Contact the Service Desk for service.

Register Maintenance - IBM Visit (1/08)

Register and check stand maintenance is the responsibility of each warehouse. Daily and weekly cleaning is needed for top efficiency for all register system equipment and all equipment in the EDP room. Every six months, each warehouse will receive a Maintenance visit. Additional information is available from the [IS Maintenance Services](#) site.

Register Receipt Paper (5/22)

Register receipt paper is purchased through the [Shop IT](#) site for US and English Canadian locations. Two colors are available and should be used in the appropriate areas as follows:

Color	Location
White	All Registers (excluding SCO)
White with blue stripes on each side	Self-Checkout

Hand Scanners (9/14)

Hand scanners may sometimes become de-synced with the register that they are on. Scanning a series of barcodes available on the intranet should fix any syncing issues. First, the model number of the hand scanner must be located on the underside of the scanner. Once the model number has been located, the appropriate barcodes can be found on the [Warehouse Operations Scanner Configuration Page](#).

Follow the instruction on the barcode sheet, and test the hand scanner. If it has been determined that the hand scanner will not work, and needs to be replaced, new hand scanners can be order from [Shop IT](#).

PIN Pad Repairs – (US) (11/18)

Use the following procedure to send a defective PIN pad out for repair:

- Contact the Service Desk to confirm the PIN pad is in need of service
- If a repair request is required, the Service Desk will provide further instruction
- Note the status of the PIN pad on the Master PIN Pad Inventory List

MAINTENANCE AND TROUBLESHOOTING

PIN Pad Repairs – (CN) (01/26)

The Service Desk Canada (613-221-2100) must be contacted prior to moving or replacing any PIN pads. The Service Desk will need the following information:

- Defective PIN pad serial number
- Register number
- Issue with defective unit
- Replacement PIN pad serial number
- Name and email address of employee handling PIN pad repairs

The Service Desk will provide a ticket number starting with INC and an email will be sent to the email address supplied to the Service Desk with a Moneris reference number. Moneris will ship a replacement PIN pad to your location. When the PIN pad arrives, the following steps must be followed:

- Receiving should deliver the unopened box to the employee responsible for PIN pad repairs.
- Secure new PIN pad with other spares.
- Place the defective PIN pad in the box which contained the new PIN pad.
- Attach the prepaid return shipping label to the outside of the box.
- Submit box to RTV to be shipped out same day.
- Update Master PIN Pad Inventory List.

Note: If the email containing the Moneris reference number is not received within 2 hours of the initial call, the Service Desk must be contacted.

Emergency Price Change, Item Download - Block/Unblock (10/24)

Periodically it will be necessary for an item in the warehouse to be marked down at the warehouse level. In order to ensure accuracy of inventory and book value, this will require an employee with the authority (password) to perform the EPC.

Emergency Price Change:

EPC cannot be entered after 6:30 p.m. Pacific Standard Time.

- Select **Option EPC**, enter an authorized password
- Press **F6** to add, enter the item number
- Enter reason for the price change (example: comp shops, produce markdown, etc.)
- Enter new price, press **F8** to update the new price

Note: EPC will notify users when entering a price change for an item that has an existing entry. This message can be bypassed and an additional price change may be entered if needed. If a sign is requested in the designated field, the requested sign will print after F12 is selected to return to the overview screen.

MAINTENANCE AND TROUBLESHOOTING

Emergency Price Change, Item Download – Block/Unblock (cont.)

Copy EPC record(s):

Records may be copied from day to day eliminating the need to re-key each item.

- From **Option EPC**, select a previous day's record, place a 3 in the Opt field for each item, press **<ENTER>**
- The copied record displays on the current day's Emergency Price Change

Item Download:

If an item(s) doesn't scan or is not in the register system, but it is in the AS400 then an Item Download can be performed. This pulls the record(s) and loads it to the registers.

- From **Option EPC**, press **F15 Download**, key in reason and item number, repeat for additional items
- **F8 – Update**, "all items sent" will display

It will take approximately 15 minutes for the system to update the request to the register system. A price/item lookup should be done on the register system to verify that the price change has applied. If the request has not applied, a second check should be done within approximately another 15 minutes.

Price changes entered through this option are temporary. The day following the price change, the price in the register system will return to the original price set up for the item in the AS400. If the price is to be different than the AS400 price on multiple days it will be necessary to copy the record day to day.

If the price change has not been applied to the register, the Service Desk should be contacted. Changes done by the Service Desk will remain in the controller unless new maintenance has been downloaded for the item.

Block/Unblock Item Record:

Occasionally it will be necessary to block or unblock an item on the register. This may be done if an item's number has been changed, or if there is a recall on an item. Blocks can be controlled by regional buyers, or by the warehouse. To block an item at the warehouse, use the following steps in option EPC:

- Press **F18 Block**. Key item number, select **K** (to require a manager override on sales) or **P** (to completely prohibit sales of the item). Press **F8** to update.
- A block is only valid at the warehouse who applied the block and that warehouse is the only location that can remove the block. Blocked items will display "EPC Block" on the register.

Option IXI (2/08)

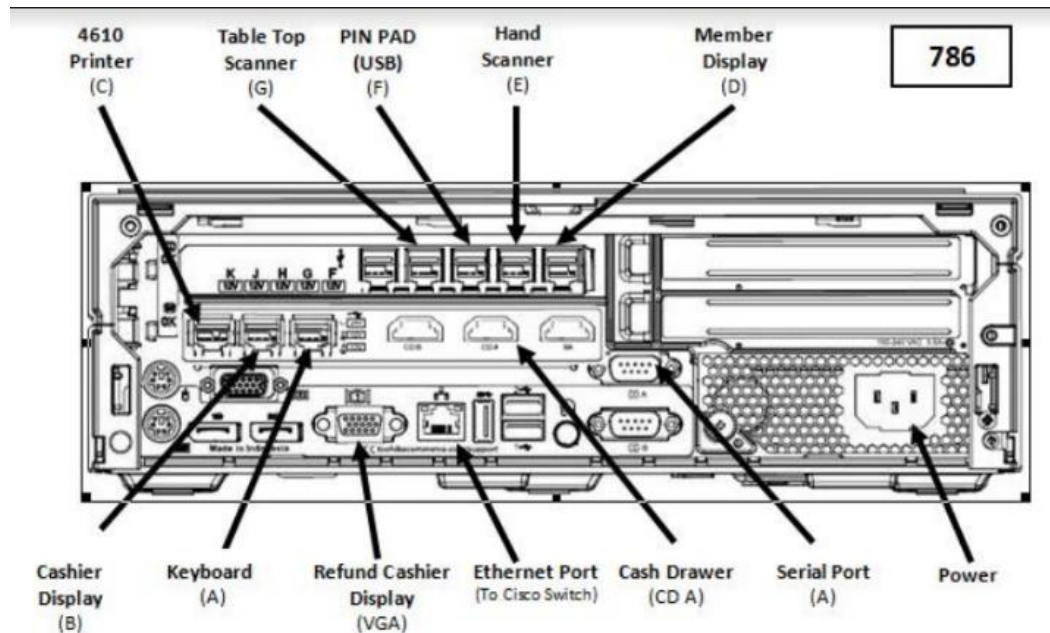

On occasion the front end may come across a UPC that does not scan or that may scan as a different item. This most likely happens as a result of the UPC not being correctly linked to the item. This can be verified by using AS400 option IXI and the item number, and checking the UPC links. If the UPC is linked, an item download will fix the issue. If the UPC is not linked, the buying team for the item should be contacted to add the UPC to the item. After the UPC is added, an item download will fix the issue.

MAINTENANCE AND TROUBLESHOOTING

Register Diagrams (8/17)

To use the following diagrams, first locate the model of your register. This can be located on the front side of the CPU of the register. To facilitate any hardware repairs on the register, it is recommended that a copy of the diagram of the register is adhered to the back, slide down cover.

CASHIER TRAINING

SECTION 14

CASHIER TRAINING

Introduction:

It is often necessary to train new cashiers on the register system. This section is meant to give managers and supervisors a general idea of how to train new cashiers. This section will begin by showing front end management how to turn registers into training mode, give some helpful handouts for cashiers, and will end with a training checklist for training cashiers.

Training Mode (12/15)

In order to demonstrate to a new cashier how the register system operates and allow them to practice on the register without affecting inventory or sales, training mode was developed. A supervisor/manager will sign on to any register with the training code. Operator numbers 500 through 505 are training sign on codes. Passwords are all 9999 in US locations. The operator code and password are the same in Canadian locations, for example 501/501. Once signed on press <7>, <**SIGN ON/OFF**>. Register display screen displays, “**Training Mode**”. The word **VOID** will print next to each item number on the receipt tape. The cash drawer will not open during training mode.

Note: Training receipts must be defaced, attached/logged on the Daily Register Sheet.

Cashier Training (11/20)

The following cashier job aids are essential for proper cashier training. It is recommended that cashiers use this cheat sheet when they first begin cashiering, and use it until they are comfortable with all processes on the Reference Guide. The second job aid is entitled, “Check that Check”. This job aid will explain the things that cashiers are looking for on checks, and also go into detail about check velocity information that prints on the backside of the check.

Cashier Quick Reference Guide (4/25)

[Cashier Quick Reference Guide - US](#) | [CN](#)

[Check That Check](#)

CASHIER TRAINING

Cashier Training Checklist (09/24)

The following checklist can be used to train new cashiers. This will give them an idea of all scenarios they may see on any given day. Please note, when practicing transactions, the registers should be put into training mode. Cashier's should review the [Anti-Money Laundering](#) section of this manual prior to using a register.

1. Tour of register equipment

- a. Loading belt: Stress the importance to productivity of keeping the belt full
- b. Display screens: Member & cashier. Explain the differences between the two displays
- c. Keyboard: Use a light touch on the keys and keep free of debris
- d. Table top scanner: Important to keep clean to ensure accuracy and productivity.
- e. Hand scanner: Stress the importance of keeping scanner at correct register. Describe the range of the wireless gun
- f. Printer: Demonstrate loading paper. Explain the receipt section is thermal and the lower section has an actual ribbon. Show them how to advance the receipt using blue triangles
- g. PIN pad: Explain methods of payment we accept
- h. On /Off switch for belt and scanner
- i. Take-away area: Describe the power slide method and importance of getting product all the way to the end
- j. Check writer platform: Point out signage displayed here
- k. Box storage area: Keep the area clean and organized

2. Load paper - Have cashier practice loading and unloading receipt paper

3. Sign On/Off Register

- a. Have cashier sign on and sign off the register a minimum of 5 times
- b. First time they sign on will prompt them to change password.

Note: Passwords should never be shared.

4. Terminal Secured

- a. Have every cashier secure and unsecure their terminal
- b. Explain that terminal will automatically secure after 180 seconds of no keyboard activity
- c. Terminal securing negatively impacts productivity and should not be done unless they are attempting to resync the PIN pad

5. No Sale

- a. Have cashiers practice opening their drawer. Food court registers will not open without a supervisor override.

6. Processing Order

- a. Have cashier scan generic membership card and scan an item from the floor using the table top scanner, hand scanner and by keying the item #
- b. Total transaction and tender using cash

CASHIER TRAINING

Cashier Training Checklist (cont.)

7. Void Membership Number

- a. Have cashier scan generic membership card and then void that membership number out.

8. Cash Pickups

- a. Have cashier perform cash pickup and practice filling in Daily Register sheet
- b. Review pickup restrictions in section 5.7 of the Front End Manual

9. EBT Tender - US

- a. The register system will recognize items eligible for purchase with SNAP benefits (EBT Food), noted with an "E" on the receipt.
- b. EBT cards are PIN protected, employees should never ask a member for their PIN or verify whether the name on the EBT card matches the membership card.
- c. EBT is tendered the same as debit/credit cards using **<CREDIT/DEBIT>**
- d. More EBT information can be found in the [Cashier Training](#) presentation

10. Check Tender

- a. Have cashier scan generic member number and ring up a small transaction
- b. Total order and tender using sample checks
- c. Review check acceptance policy memo ("Check that Check") with cashiers

11. Check Writer

- a. Have cashier scan generic member number and ring up a small transaction
- b. Total order and tender using Check writer

12. Check Pickups

- a. Have cashier perform a check pickup and practice filling in Daily Register sheet

13. Multiple Quantities

- a. Have cashier practice ringing up multiple quantities using both the <QTY> key and the <ENTER> key
- b. Total and tender using cash or check

14. Print Subtotal

15. Print Item Count

16. Voids

- a. Practice voiding the previous item
- b. Practice voiding any item in the order
- c. Describe "Void Transactions" and when they might be used

17. Resale

- a. Review resale cards
- b. Practice transactions using the resale key and filling out resale card

CASHIER TRAINING

Cashier Training Checklist (cont.)

18. Tax Exempt

- a. Rarely used. Only used to exempt tax on liquor for foreign diplomats

19. Traveler's Check

- a. Have cashier ring up a small order and tender using a traveler's check (use one of the sample checks ... no traveler's check will be provided)

20. Merchandise Pickup Slips

- a. Explain the slip print feature and practice entering MPU items
- b. Explain the printed slip needs to be forwarded to a supervisor or manager
- c. Discuss how to handle MPU items

21. Coupons

- a. Practice ringing up items in the multi-vendor mailer (MVM)

22. Purchase Order Program

- a. Review the Purchase Order section of the manual if the warehouse will be doing purchase orders

23. Mail In Rebates

- a. Using option CRI on the AS400 find an item with a mail in rebate
- b. Show cashiers what prints on receipt for mail in rebates
- c. They need to explain process to member – can also be redeemed at costco.com

24. Executive 2% Reward Certificates

- a. Review this section of the manual with cashiers
- b. Have cashiers practice ringing up small orders and tendering with 2% reward
- c. Remind cashiers that 2% rewards must be applied towards merchandise

25. Citi Reward Certificate

- a. Review this section of the manual with cashiers
- b. Have cashiers practice ringing up small orders and tendering with rebate certificate

26. Standalone Credit / Debit transactions

- a. Discuss situations where it might be necessary to perform
- b. **Discuss that tap enabled payment cards must NEVER be placed on or near the PIN pad to avoid unintentionally charging the member's card for the next transaction**

27. Liquor/Tobacco Prompts

- a. Have cashiers ring up alcohol or tobacco items (if sold in warehouse) to see the age verification prompt
- b. Explain the importance of verifying ID

It is recommended new cashiers review this presentation as well as complete the Cashier Training checklist prior to cashiering on their own. Click this link to view the presentation:

[Cashier Training Presentation](#)

CASH RECYCLERS

SECTION 15

CASH RECYCLERS

Introduction (3/21)

The Front End management team is responsible for the cash recycler. This includes: daily operations, weekly cleaning/maintenance, maintaining the operator listing and ensuring proper funds are maintained in the machine throughout the day. This section of the manual will cover basic cash recycler functions and procedures.

Note: For SUZOHAPP and Revolution specific instructions, see the [Cash Recycler](#) page.

Cash Recycler Receipts (5/24)

The cash recycler will prompt to print (REVO) or automatically generate receipts (SUZO) each time funds are deposited/loaned from the machine. To clarify which receipts should be logged versus which receipts should be kept near the recycler, refer to the table below:

Receipt Type	Logging	Requirements
Start of Day Loan: Self-dispensed	No	The receipt may be discarded/not printed and the opening count does not need to be logged.
Start of Day Loan: Dispensed by another employee	Yes	The cash recycler receipt must be attached to the DRS and the opening cashier must verify and log actual counts on the DRS.
Loan: Self-dispensed	No	Receipt may be discarded/not printed.
Loan: Dispensed by another employee	No	The receipt should be printed, verified and initialed by the cashier, then attached to the DRS.
Pickup: Self-deposited	No	Receipt may be discarded/not printed.
Pickup: Deposited by another employee	Yes	The total should be logged on the DRS and initialed by the employee and the witness. The cash recycler receipt listing the totals deposited in to the cash recycler should be printed attached to the DRS.
Vault Drop (REVO / SUZO)	No	The vault drop receipt that does not display totals should be forwarded with rejected notes to the vault via the air tubes. The receipt that displays the totals may be discarded/not printed if self-deposited or returned to the cashier if deposited by another employee.
Closing Till	No	The receipt from the closing till may be discarded/not printed

CASH RECYCLERS

Start of Day Loans (Dispensing a Till) (9/20)

It is strongly recommended cashiers dispense their own tills from the cash recycler. Tills dispensed by the initial user do not need verification. If a supervisor or an employee other than the cashier dispenses a till, the cash must be verified by the cashier. Outside marketing tills must be dispensed from the cash recycler and deposited back into the cash recycler at the end of the day. Valid marketing till numbers are 151 through 159.

Increase / Loan (9/20)

If a cashier dispenses their own loan, a count of the bills is not needed. If another employee dispenses a loan for a cashier (e.g. Sup/Manager, assistant, etc.), the cashier must verify the bills prior to placing them in their tills. Coins should never be verified.

Pickup (8/22)

Pickups should be completed at times when the business is impacted the least. Breaks, lunches and end of shifts are ideal. Do not count the funds you are gathering to deposit at the cash recycler. Non-cash tenders must never be inserted into the cash recycler, and must still be processed using an air tube to the vault.

- Once all money is counted the screen will display the total amount being deposited
- **[Add More] or [Finish]**
- Pickups must not be keyed at register unless the register's cash threshold has been met. It is not necessary to log cash pickup on DRS (MIMO and SUZO locations only)

Note: If a note is sent to the rejected area, the shutter will open. Straighten the note and place back in shutter. If the note continues to be rejected, see "Processing Rejected Bill".

Occasionally a till cash threshold will be exceeded. The register will display **[PICKUP NEEDED SOON]** when the cash exceeds \$2,000.00. The register will display **[PICKUP REQUIRED NOW]** when the cash exceeds \$2,500.00 and will not allow another transaction to be completed until a pickup is done. A cashier, along with the witness, must count the bills together, the pickup must be keyed, logged on the DRS and taken to the cash recycler by the witness to process. The cashier is then free to continue helping members.

Note (Cash Recycler Locations Only): Once the pickup is complete at the cash recycler the pickup must be voided at the register to avoid a double pickup.

Process Rejected Bill (Suzohapp and Revolution) (9/20)

There is not an option to force rejected bills from Suzohapp or Revolution. Rejected notes will need to be manually sent to the vault using the tube system.

For specific information on how to account for these funds on the cash recycler, see the [Loans and Pickups on Revolution](#) or [SuzoHapp Cashier Cheat Sheet](#).

CASH RECYCLERS

Depositing Ending Till Fund (9/20)

A final count or pickup is not required when depositing an ending till. Tills need to be organized and bills straightened prior to approaching the cash recycler. This will minimize the amount of time spent at the cash recycler and reduce the possibility of a line buildup.

If a cashier is not able to deposit their own till into the cash recycler, the till must be counted down and logged on the daily register sheet. In addition to counting down the till, the last cashier on the register must also perform a check pickup.

Water Vending (10/21)

Once the water machine is refilled and the sales are ready to be rung through the register:

- Empty coin into the coin sorter (cash recycler only)
- Insert bills into the note sorter (cash recycler locations only)
- Ring the water sales up on a register
- Follow established cash recycler specific procedures for a cash and coin pickup

Note: Because Revolution is not integrated with the point of sale system, all pickups processed for the water vending sales must be keyed on the register.

Changing Password (9/20)

Cashiers must be setup in the cash recycler with the same operator number as they use on the register system. Passwords are maintained independently. The recycler will prompt the cashier to change their password every 90 days but cashiers should manually update their password anytime they are prompted to do so at the register.

Reset Password (3/21)

After 90 days of inactivity or five consecutive unsuccessful login attempts, the user will be locked out of the recycler. If a user forgets their password, or is locked out of the recycler, supervisors and managers are required to reset the password for the cashier in their main log in screen.

CASH RECYCLERS

Edit Users (9/20)

The cash recyclers are set up to mirror the CC controller operator listing. All operator numbers must match on both the recycler and the registers. User authorities and daily dispense limits are set and must not be changed. Daily dispense limits are as follows:

- Cashiers - \$500
- Refund Cashiers - \$5,000
- Vault Clerk - \$0 (unlimited)
- Sales Audit - \$1
- Supervisor, Manager - \$0 (unlimited)

User authorities are set to allow employees to only dispense/use registers of that which they are authorized to operate. The operator authorities are as follows:

- Cashiers – All FE registers and ancillary registers
- Refund Cashiers – All of the above plus refunds
- Sales Audit – Register 600, inquiry only
- Vault – All available registers, except 600, 800, 900
- Supervisors – All available registers except 500, 900
- Managers – All available registers

Note: The operator listing should be maintained and audited on a monthly basis.

Cash Recycler Down / Fall Back Plan – Front End (2/20)

In the event of a cash recycler being down, the Service Desk must be contacted at (425) 313-8001. Procedures to implement can be found on the [Cash Recycler Down Flow Chart](#).

Prior to Opening

Since opening tills will not be distributed by the cash recycler, a manager will have to get the “Back Up” tills from the vault. Cashiers will need to verify the register’s start of day funds manually and compare them to the “Start of Day” till fund 10-key tape. Any discrepancies should be noted on the Daily Register Sheet.

During Business Hours

Any loans/FI’s ([Form #VT01](#)) will need to be obtained from the vault.

Cash pickups will need to be logged on the Daily Register Sheet and sent to the vault using the tube system.

If a register needs small bills, the vault clerk will make an exchange using funds from the safe. Or the vault may establish a temporary “Control Till.”

If coin is needed, the vault clerk will need to physically take it out of the MIMO coin safe to exchange with the register

CASH RECYCLERS

Cash Recycler Down / Fall Back Plan – Front End (cont.)

After Closing

Final cash pickups will need to be logged on the Daily Register Sheet and sent to the vault using the tube system.

If the recycler is down at closing, the tills must be pulled by the closing supervisor, loaded into a cart and put in the vault.

A vault clerk will need to be called in to open the next morning.

Note: If the power goes out, the recycler is on the same battery backup as the front end registers. Once the recycler is operational, the PC and monitor will need to be turned back on.

Cash Recyclers Needing Service (5/20)

A call to the Service Desk at (425) 313-8001 must always be placed to open a ticket requesting service on your cash recycler.

SELF CHECKOUT

SECTION 16

SELF CHECKOUT

Introduction (05/25)

Self-Checkout registers are not setup to take cash, checks or rebates. Debit, Visa credit in US, MasterCard in Canada, any Co-branded credit, EBT and shop cards are the only tender types accepted. Although SCO registers accept shop cards for payment, they do not allow members to add funds to a shop card. In addition, SCO does not have a slip print feature so it is unable to process transactions requiring printing on a separate form. (E.g. resale transactions, kiosk orders, etc.) The exception to this is MPU items, which requires employee assistance to process. The use of SCO registers is limited to open warehouse hours. SCO registers must not be used before the warehouse opens or after the warehouse is closed.

Note: Third Party Delivery Shoppers (Instacart, Uber, etc.) are not permitted to use Self Checkout while shopping.

Self Checkout Staffing (3/20)

SCO lanes should typically be staffed with one clerk for every three lanes. During slow periods staffing can be reduced to one clerk. SCO lanes must never be left unattended. During periods of heavy volume, such as weekends, additional staffing may be added to facilitate increased speed and efficiency of the SCO lanes.

Suspend and Retrieve Transactions (9/22)

Occasionally members will begin a transaction at the SCO lane and are unable to complete it there. This generally happens when the member wishes to pay with cash or check but is unaware the register only accepts electronic forms of payment. It can also occur when the member's debit or credit card is declined. To handle these transactions, suspend the order at the SCO lane and retrieve it on another Front End till, typically the same register used by the supervisors as the CA till.

If the member has made a partial payment with a shop card and has no other form of acceptable payment, the transaction will have to be suspended or voided. This will automatically return the tendered amount back to the shop card.

Self Checkout Clerk (8/19)

The term self checkout clerk is assigned to employees responsible for monitoring the SCO lanes. The SCO clerk's primary responsibility is to ensure a smooth flow through the SCO lanes. Job functions for the SCO clerk include:

- Greeting members and encouraging the use of the SCO system
- Identifying large or heavy items that should not be lifted and placed on the scale
- Monitoring lane lights and providing intervention and issue resolution as necessary

The SCO clerk should be positioned to easily monitor the lane lights for the lanes they are assigned to. Responding quickly to resolve issues is critical to positive member service.

SELF CHECKOUT

Self Checkout Shopper Assistant (SA) Card (04/26)

An individually assigned SCO Shopper Assistant (SA) card is used to access the Shopper Assistant menu on an SCO register. There are two levels of access for SA cards: cashier and supervisor/manager. Access levels allow the SA to respond to interventions, assist members in the check out process, zero tear security trays (scales) and adjust security settings. SCO SA cards can be assigned to an employee by a supervisor or higher with a [CARTS+](#) request. Additional SCO SA cards can be ordered through [Shop IT](#). The difference between each access level are listed below:

Cashier SA Card:

Cashier SA cards can access the following:

- Respond to cashier clearable interventions
 - Age validation, member blocks, etc.
- Item issues
 - Manual entry, not on file, mis-scans, weight validation issues, etc.
- Transaction
 - Void item or transaction
 - Suspend transaction
- Adjust Volume
- Open/Close/Restart/Shutdown terminal

Supervisor/Manager SA Card:

Supervisor/Manager SA cards can access all Cashier SA card function in addition to the following:

- Adjust security modes

Note: For security reasons cashiers are not to use SA cards with supervisor/manager access.

Lane Intervention (3/18)

When the white light is flashing on the SCO lane, intervention by the SCO clerk is required. This assistance may be necessary for a variety of reasons including:

- Member's card not accepted
- Age or quantity restriction
- Incorrect barcode was scanned (books and multi packs)

To resolve the issue, the SCO clerk must scan their card. In most cases the screen will display the reason for the flashing light. In some cases it will be necessary to re-scan the item in question after scanning the SCO card.

Item Security (3/18)

SCO scales "learn" item weights as they are sold so very little input is necessary by support personnel. If intervention is required because the SCO lane has rejected a single item multiple times, the Service Desk must be contacted.

SELF CHECKOUT

SCO Hand Scanners (3/24)

Each SCO register will be equipped with a hand scanner. Each night the scanners need to be placed in their charging cradles. These scanners should only be used to scan large items that cannot be placed on the scale. The SCO clerk should proactively look for these items and scan them to expedite the order. Each register has a unique barcode that **MUST** be scanned prior to scanning items for that particular SCO lane. Scanning the barcode on the register links the hand scanner to that lane ensuring scanned items are charged to the correct member. Scanning items with the wireless hand scanner will bypass all security on the scale. Scanners should be in the possession of the SCO clerk or secured at all times.

Note: SCO hand scanners have specific configuration to allow for identification scanning for age verification, as well as to allow scanners to be enabled during tender time. Swapping the scanners with non-SCO scanners will disable this functionality and they will need to be reprogrammed to utilize these features.

Point of Sale Activated Cards at SCO (12/21)

POSA cards (shop cards, Xbox Live, Microsoft Office, etc.) are immediately activated once scanned, regardless of the transaction being completed. To avoid having these cards leave the warehouse unpaid, their activation has been disabled on SCO lanes.

Not On File (02/25)

Some items sold in the warehouse have multiple barcodes, and in some instances, only one of the barcodes is linked to the item and able to be scanned. Self Checkout displays the message "Scan the alternate barcode" and plays a different tone when an incorrect barcode is scanned. After three unsuccessful scans of an item, cashier intervention will be required.

Reports (3/18)

Option IAFEP includes the option to view productivity on SCO lanes only.

Member Service (6/22)

Blue striped receipt tape must be loaded at self checkout to ensure SCO transactions are easily identifiable at the exit door. Receipts should be checked at the door following established procedures; however, increased scrutiny is warranted since employees are not generally involved in the transaction. Particular attention should be paid to merchandise like wine and clothing where two items may be the same size and weight but vary dramatically in price.

Daily Register Sheets (11/17)

SCO lanes do not require a Daily Register Sheet (DRS).

Costco Wallet at Self Checkout (US) (8/25)

When a QR code is scanned at Self Checkout to initiate an order and the wallet is enabled, the member will be prompted if they would like to use their Costco Wallet if they do not have auto-apply enabled. If the member does have auto apply enabled the Costco Wallet will tender after the member selects "Finish and Pay". For more information, refer to the [Costco Wallet Acceptance Memo](#) or the [Costco Wallet](#) section.

SELF CHECKOUT

Opening / Closing Procedures (8/21)

SCO registers are only to be used during open warehouse hours. Lanes should be opened each morning and closed each night using the following procedures:

Opening:

- Scan a Self Checkout card
- Press **<Open Lane – cancel pending transactions>**

Closing:

- Scan a Self Checkout card
- Press **<Shopper Assistant Menu>**
- Press **<Close Lane>**

Employee SCO Usage (12/23)

Costco employees are welcome to use SCO register during open business hours. Employees who use SCO must have their items physically present at the SCO lane during the checkout process. Employees must never use their own Shopper Assistant card to access the cashier menu or approve an intervention on their own transaction.

SCO Employee Receipt Verification

Warehouse employees must have their receipts from these registers initialed by the SCO clerk. In the absence of clerk, a supervisor or manager may sign the receipt.

SCO Age Restricted Items (03/25)

When purchasing age restricted items such as alcohol, tobacco, or certain pharmaceuticals, the SCO register will allow members to proceed with their order until “Finish and Pay” is selected. Once an age restricted item is scanned the lane light will flash, alerting the SCO clerks that an intervention is pending before the transaction can be completed. SCO clerks can complete age verification at any point after the item is scanned.

Note: In select states, age restricted items will require an immediate intervention when the item is scanned.

SELF CHECKOUT

SCO Security Modes (04/26)

The SCO registers have three types of security modes: Full Security, Cashier Speed, and Shopper Speed. Each mode affects the performance and requirements for various functions differently. The SCO will display which mode the system is currently in at the top of the on-screen receipt. When no security mode is displayed, the system is in “full security” mode. Security modes can only be accessed/changed by the Shopper Assistant (SA) screen when supervisor/manager SA card is scanned outside of a transaction. If the system is placed in either “cashier speed” or “shopper speed” mode it will automatically return to default when the unit is closed or during the overnight process. Full Security is the recommend mode during all hours of operations. The differences between each mode are listed below:

Full Security Mode (Default)

Full Security mode is on by default. This mode requires the following:

- Items scanned by the tabletop will be weight validated on the tray (scale)
- SA cards must be scanned to respond to system alerts (age validation, member blocks, interventions, etc.)

Shopper Speed Mode

Shopper Speed mode, sometimes displayed as “Cashier Mode (Unattended)”, when in this mode the system prioritizes speed over security. In this mode the SCO will perform in the following manner;

- Item scanned by the tabletop will **NOT** be weight validated on the tray (scale)
- SA card is required be scanned to respond to system alerts (age validation, member blocks, interventions, etc.)

Cashier Speed Mode

Cashier Speed mode, sometimes displayed as “Cashier Mode (Attended)”, when in this mode the system assumes a cashier is stationed at the SCO lane at all times, similar to a front-end manned register. In this mode the SCO will perform in the following manner;

- Item scanned by the tabletop will **NOT** be weight validated on the tray (scale)
- Does **NOT** require a SA card to be scanned to respond to system alerts (age validation, member blocks, interventions, etc.)

Note: Warehouse Manager is approval to operate outside of Full Security Mode.
